INVESTMENT OBJECTIVE

The U.S. All Cap Index Fund seeks investment results that correspond generally to the performance of an index that measures the investment return of the broad U.S. stock market, excluding companies whose policies and practices are inconsistent with the USCCB.

INVESTMENT PROCESS

The U.S. All Cap Index Fund attempts to replicate the Knights of Columbus U.S. All Cap Index ("Index") by investing all, or substantially all, of its assets in the companies that make up the Index, holding each company in approximately the same proportion as its weighting in the Index.

PERFORMANCE (As of 03/31/2021, inception date: 12/31/2019)

The performance data quoted represents past performance. Past performance is not a guarantee of future results. The investment return and principal value of an investment will fluctuate so that an investor's shares, when redeemed, may be worth less than their original cost and current performance may be higher or lower than the performance quoted. The Fund charges a 2.00% redemption fee on shares held less than 30 days. Investment performance does not reflect this redemption fee; if it was reflected, the total return would be lower than shown. For performance data current to the most recent month end, please call 1-844-KC-FUNDS.

GROWTH OF \$10,000 (As of 03/31/2021)

Chart depicts the value of a hypothetical \$10,000 investment in the Fund over the past 10 years (or since inception for funds lacking 10-year history). Investment performance is for Class I shares, and assumes the reinvestment of dividends and capital gains. The performance would have been lower if the Class A sales charges were deducted.

QUARTERLY COMMENTARY

The broad U.S. stock market, as defined by the Knights of Columbus U.S. All Cap Index, rose 7.13% with dividends reinvested and 6.77% based on price for the 3 months ended March 31, 2021.

Reflecting this environment, The Knights of Columbus Index Fund rose 6.96% in the first quarter as the portfolio continues to execute on its objective to maintain securities' weightings in accordance with the index. We look forward to moving the Fund into stock lending like its peers which will allow the Fund to track the index even more tightly.

This is compared to the Russell 3000 Index first quarter performance of 6.35%.

The fund, which offers investors exposure to every segment, size, and style of the U.S. equity market that is consistent with USCCB guidelines closely tracked its target index, the Knights of Columbus U.S. All Cap Index.

Average market cap – A calculation of the average market capitalization that irrespective of the underlying weight of each component; large companies would, account for the same contribution to market capitalization as smaller stocks. **Dividend yield** – This figure is expressed as a percentage, and represents a financial ratio that shows how much a company pays out in dividends each year relative to its stock price. **Price-to-earnings ratio** – A ratio for valuing a company that measures its current share price relative to its per-share earnings. **Price-to-cash flow** – A ratio is a stock valuation indicator or multiple that measures the value of a stock's price relative to its operating cash flow per share. **Price-to-book** – A ratio that compares a firm's market capitalization to its book value. It's calculated by dividing the company's stock price per share by its book value per share; an asset's book value is equal to its carrying value on the balance sheet, and companies calculate it netting the asset against its accumulated depreciation. **Weighted average market capitalization** – A calculation of the average market capitalization that considers the underlying weight of each component; large companies would, therefore, account for a greater contribution to market capitalization than smaller stocks.

Knights of Columbus® U.S. All Cap Index – Consists of all common stocks and real estate investment trusts in the Solactive US Broad Market Index excluding companies that are determined by Institutional Shareholder Services to be involved with enterprises that conflict with the USCCB Guidelines. The Market Index includes the 3,000 U.S. companies with the largest free-float market capitalizations.

Lipper Multi-Cap Core Classification – Funds that, by portfolio practice, invest in a variety of market capitalization ranges without concentrating 75% of their equity assets in any one market capitalization range over an extended period of time.
