Effective on or about February 28, 2021 (the “Conversion Date”), each Fund will automatically convert its outstanding Investor Shares to I Shares of the Fund (the “Conversion”). After the Conversion Date, Investor Shares will no longer be offered by the Funds, and will be terminated as a separately designated class of the Funds.

In connection with the Conversion, effective immediately, Investor Shares are closed to new investors and new accounts. Until the Conversion Date, existing Investor Shares shareholders (i) may continue to make additional purchases of Investor Shares and (ii) will continue to have their dividend and capital gains distributions reinvested.

The Conversion of each Fund's Investor Shares into I Shares on the Conversion Date is not expected to be a taxable event for federal income tax purposes or to result in the recognition of gain or loss by converting shareholders, although shareholders should consult their own tax advisors.

Shareholders who are subject to the Conversion will be deemed to be eligible investors for purposes of the I Shares' minimum initial investment requirement.

For each Fund, I Shares currently have a lower total expense ratio than Investor Shares and are not subject to the distribution and/or service (12b-1) fees or the shareholder servicing fees payable by the Fund with respect to Investor Shares.

### Annual Fund Operating Expenses (expenses that you pay each year as a percentage of the value of your investment)

	I Shares	Class S Shares	Investor Shares
Management Fees	0.90%	0.90%	0.90%
Distribution and/or Service (12b-1) Fees	None	None	0.25%
Other Expenses	0.46%	0.56%	0.46%

Total Annual Fund Operating Expenses After Fee Reductions and/or Expense Reimbursements	1.10%	1.20%	1.35%

<sup>1</sup> Amounts designated as “—” are zero or have been rounded to zero.

<sup>2</sup> Knights of Columbus Asset Advisors LLC (“Knights of Columbus Asset Advisors” or the “Adviser”) has contractually agreed to waive fees and/or to reimburse expenses to the extent necessary to keep Total Annual Fund Operating Expenses (excluding interest, taxes, brokerage commissions and other costs and expenses relating to the securities that are purchased and sold by the Fund, acquired fund fees and expenses, other expenditures which are capitalized in accordance with generally accepted accounting principles, non-routine expenses and any class-specific expenses (including Distribution and/or Service (12b-1) Fees and Shareholder Servicing Fees) (collectively, “excluded expenses”)) from exceeding 1.10% of the average daily net assets of each of the Fund’s share classes until February 28, 2021 (the “contractual expense limit”). In addition, the Adviser may receive from the Fund the difference between the Total Annual Fund Operating Expenses (not including excluded expenses) and the contractual expense limit to recoup all or a portion of its prior fee waivers or expense reimbursements made during the rolling three-year period preceding the recoupment if at any point Total Annual Fund Operating Expenses (not including excluded expenses) are below the contractual expense limit (i) at the time of the fee waiver and/or expense reimbursement and (ii) at the time of

the recoupment. This agreement may be terminated: (i) by the Board of Trustees (the "Board") of The Advisors' Inner Circle Fund III (the "Trust"), for any reason at any time; or (ii) by the Adviser, upon ninety (90) days' prior written notice to the Trust, effective as of the close of business on February 28, 2021.

### **Example**

This Example is intended to help you compare the cost of investing in the Fund with the cost of investing in other mutual funds.

The Example assumes that you invest \$10,000 in the Fund for the time periods indicated and then redeem all of your shares at the end of those periods. The Example also assumes that your investment has a 5% return each year and that the Fund's operating expenses (including one year of capped expenses in each period) remain the same. Although your actual costs may be higher or lower, based on these assumptions your costs would be:

	<b>1 Year</b>	<b>3 Years</b>	<b>5 Years</b>	<b>10 Years</b>
I Shares	\$112	\$405	\$720	\$1,612
Class S Shares	\$122	\$436	\$773	\$1,724
Investor Shares	\$137	\$483	\$852	\$1,889

### **Portfolio Turnover**

The Fund pays transaction costs, such as commissions, when it buys and sells securities (or "turns over" its portfolio). A higher portfolio turnover rate may indicate higher transaction costs and may result in higher taxes when Fund shares are held in a taxable account. These costs, which are not reflected in total annual Fund operating expenses or in the example, affect the Fund's performance. During its most recent fiscal year, the Fund's portfolio turnover rate was 49% of the average value of its portfolio.

### **Principal Investment Strategies**

---

Under normal circumstances, the Fund invests at least 80% of its net assets, plus any borrowings for investment purposes, in equity securities. This investment policy can be changed by the Fund upon 60 days' prior written notice to shareholders. The equity securities in which the Fund invests are primarily common stocks, but may also include American Depositary Receipts ("ADRs"), which are traded on U.S. exchanges and represent an ownership in a foreign security. The Fund may invest in securities of companies with any market capitalization.

Under normal market conditions, the Fund will invest in at least three countries, including the United States, and at least 40% of its assets will be invested in non-U.S. companies, in both developed and emerging market countries. For purposes of this policy, a company is considered to be a non-U.S. company if: (i) 50% of the company's assets are located outside of the United States; (ii) 50% of the company's revenues are generated outside of the United States; or (iii) the company maintains its principal place of business outside of the United States.

The Fund makes investment decisions consistent with the United States Conference of Catholic Bishops' Socially Responsible Investing Guidelines (the "USCCB Guidelines"), and therefore, the Fund is designed to avoid investments in companies that are believed to be involved with abortion, contraception, pornography, stem cell research/human cloning, weapons of mass destruction, or other enterprises that conflict with the USCCB Guidelines. The policies and practices of the companies selected for the Fund are monitored for various issues contemplated by the USCCB Guidelines. If the Adviser becomes aware that the Fund is invested in a company whose policies and practices are inconsistent with the USCCB Guidelines, the Adviser may sell the company's securities or otherwise exclude future investments in such company.

In selecting investments for the Fund, the Adviser combines quantitative and qualitative analyses that together seek to identify companies that have above-average investment potential. The Adviser first ranks the individual stocks in which the Fund may invest through the use of models that incorporate multiple fundamental factors, with the weightings of the factors in the models varying in relation to the stock's sector and region and the current market environment. The Adviser then evaluates highly-ranked securities for purchase based on fundamental data and macroeconomic considerations, while managing the Fund's exposures to sectors and regions to ensure broad diversification. The Adviser will generally sell a stock on behalf of the Fund if the stock experiences a rankings decline or extreme price movements, or for risk management purposes.

## **Principal Risks**

---

As with all mutual funds, there is no guarantee that the Fund will achieve its investment objective. You could lose money by investing in the Fund. **A Fund share is not a bank deposit and is not insured or guaranteed by the FDIC or any government agency.** The principal risk factors affecting shareholders' investments in the Fund are set forth below.

**Equity Risk** – Since it purchases equity securities, the Fund is subject to the risk that stock prices will fall over short or extended periods of time. Historically, the equity markets have moved in cycles, and the value of the Fund’s equity securities may fluctuate drastically from day to day. Individual companies may report poor results or be negatively affected by industry and/or economic trends and developments. The prices of securities issued by such companies may suffer a decline in response. These factors contribute to price volatility, which is the principal risk of investing in the Fund.

**Foreign Company Risk** – Investing in foreign companies, including direct investments and investments through ADRs, poses additional risks since political and economic events unique to a country or region will affect those markets and their issuers. These risks will not necessarily affect the U.S. economy or similar issuers located in the United States. Securities of foreign companies may not be registered with the U.S. Securities and Exchange Commission (the “SEC”) and foreign companies are generally not subject to the regulatory controls imposed on U.S. issuers and, as a consequence, there is generally less publicly available information about foreign securities than is available about domestic securities. Income from foreign securities owned by the Fund may be reduced by a withholding tax at the source, which tax would reduce income received from the securities comprising the Fund’s portfolio. Foreign securities may also be more difficult to value than securities of U.S. issuers. While ADRs provide an alternative to directly purchasing the underlying foreign securities in their respective national markets and currencies, investments in ADRs continue to be subject to many of the risks associated with investing directly in foreign securities.

**Emerging Markets Securities Risk** – The Fund’s investments in emerging markets securities are considered speculative and subject to heightened risks in addition to the general risks of investing in foreign securities. Unlike more established markets, emerging markets may have governments that are less stable, markets that are less liquid and economies that are less developed. In addition, the securities markets of emerging market countries may consist of companies with smaller market capitalizations and may suffer periods of relative illiquidity; significant price volatility; restrictions on foreign investment; and possible restrictions on repatriation of investment income and capital. Furthermore, foreign investors may be required to register the proceeds of sales, and future economic or political crises could lead to price controls, forced mergers, expropriation or confiscatory taxation, seizure, nationalization or creation of government monopolies.

**Foreign Currency Risk** – As a result of the Fund’s investments in securities denominated in, and/or receiving revenues in, foreign currencies, the Fund will be subject to currency risk. Currency risk is the risk that foreign currencies will decline in value relative to the U.S. dollar, in which case, the dollar value of an investment in the Fund would be adversely affected.

**Catholic Values Investing Risk** – The Fund considers the USCCB Guidelines in its investment process and may choose not to purchase, or may sell, otherwise profitable investments in companies which have been identified as being in conflict with the USCCB Guidelines. This means that the Fund may underperform other similar mutual funds that do not consider the USCCB Guidelines when making investment decisions. In addition, there can be no guarantee that the activities of the companies identified by the Fund’s investment process will align (or be perceived to align) with the principles contained in the USCCB Guidelines.

**Quantitative Investing Risk** – There is no guarantee that a quantitative model or algorithm used by the Adviser, and the investments selected based on the model or algorithm, will perform as expected or produce the desired results. The Fund may be adversely affected by imperfections, errors or limitations in the construction and implementation of the model or algorithm and the Adviser’s ability to properly analyze or timely adjust the metrics or update the data underlying the model or features of the algorithm.

**Large Purchase and Redemption Risk** – Large purchases or redemptions of the Fund’s shares may force the Fund to purchase or sell securities at times when it would not otherwise do so, and may cause the Fund’s portfolio turnover rate and transaction costs to rise, which may negatively affect the Fund’s performance and have adverse tax consequences for Fund shareholders.

## **Performance Information**
