Effective on or about February 28, 2021 (the “Conversion Date”), each Fund will automatically convert its outstanding Investor Shares to I Shares of the Fund (the “Conversion”). After the Conversion Date, Investor Shares will no longer be offered by the Funds, and will be terminated as a separately designated class of the Funds.

In connection with the Conversion, effective immediately, Investor Shares are closed to new investors and new accounts. Until the Conversion Date, existing Investor Shares shareholders (i) may continue to make additional purchases of Investor Shares and (ii) will continue to have their dividend and capital gains distributions reinvested.

The Conversion of each Fund's Investor Shares into I Shares on the Conversion Date is not expected to be a taxable event for federal income tax purposes or to result in the recognition of gain or loss by converting shareholders, although shareholders should consult their own tax advisors.

Shareholders who are subject to the Conversion will be deemed to be eligible investors for purposes of the I Shares' minimum initial investment requirement.

For each Fund, I Shares currently have a lower total expense ratio than Investor Shares and are not subject to the distribution and/or service (12b-1) fees or the shareholder servicing fees payable by the Fund with respect to Investor Shares.

Investment Objective

The Knights of Columbus U.S. All Cap Index Fund (the “U.S. All Cap Index Fund” or the “Fund”) seeks investment results that, before fees and expenses, correspond generally to the performance of an index that measures the investment return of the broad U.S. stock market, excluding companies whose policies and practices are inconsistent with the United States Conference of Catholic Bishops’ Socially Responsible Investing Guidelines (the “USCCB Guidelines”).

Fund Fees and Expenses

This table describes the fees and expenses that you may pay if you buy and hold shares of the Fund. You may be required to pay commissions and/or other forms of compensation to a broker for transactions in I Shares, which are not reflected in the table or the example below.

Total Annual Fund Operating Expenses After Fee Reductions and/or Expense Reimbursements	0.25%	0.45%	0.70%

¹ Other Operating Expenses are based on estimated amounts for the current fiscal year.

² Knights of Columbus Asset Advisors LLC (“Knights of Columbus Asset Advisors” or the “Adviser”) has contractually agreed to waive fees and/or to reimburse expenses to the extent necessary to keep Total Annual Fund Operating Expenses (excluding interest, taxes, brokerage commissions and other costs and expenses relating to the securities that are purchased and sold by the Fund, acquired fund fees and expenses, other expenditures which are capitalized in accordance with generally accepted accounting principles, non-routine expenses and any class-specific expenses (including Distribution and/or Service (12b-1) Fees and Shareholder Servicing Fees) (collectively, “excluded expenses”)) from exceeding 0.25% of the average daily net assets of each of the Fund’s share classes until February

28, 2021 (the “contractual expense limit”). In addition, the Adviser may receive from the Fund the difference between the Total Annual Fund Operating Expenses (not including excluded expenses) and the contractual expense limit to recoup all or a portion of its prior fee waivers or expense reimbursements made during the rolling three-year period preceding the recoupment if at any point Total Annual Fund Operating Expenses (not including excluded expenses) are below the contractual expense limit (i) at the time of the fee waiver and/or expense reimbursement and (ii) at the time of the recoupment. This agreement may be terminated: (i) by the Board of Trustees (the “Board”) of The Advisors’ Inner Circle Fund III (the “Trust”), for any reason at any time; or (ii) by the Adviser, upon ninety (90) days’ prior written notice to the Trust, effective as of the close of business on February 28, 2021.

Example

This Example is intended to help you compare the cost of investing in the Fund with the cost of investing in other mutual funds.

The Example assumes that you invest \$10,000 in the Fund for the time periods indicated and then redeem all of your shares at the end of those periods. The Example also assumes that your investment has a 5% return each year and that the Fund’s operating expenses (including one year of capped expenses in each period) remain the same. Although your actual costs may be higher or lower, based on these assumptions your costs would be:

	1 Year	3 Years
I Shares	\$26	\$291
Class S Shares	\$46	\$354
Investor Shares	\$72	\$432

Portfolio Turnover

The Fund pays transaction costs, such as commissions, when it buys and sells securities (or “turns over” its portfolio). A higher portfolio turnover rate may indicate higher transaction costs and may result in higher taxes when Fund shares are held in a taxable account. These costs, which are not reflected in total annual Fund operating expenses or in the example, affect the Fund’s performance. Because the Fund was not in operation as of the fiscal year ended October 31, 2019, it does not have portfolio turnover information to report.

Principal Investment Strategies

Under normal circumstances, the Fund invests at least 80% of its net assets, plus any borrowings for investment purposes, in securities included in the Knights of Columbus U.S. All Cap Index (the “Index”) and other instruments with economic characteristics similar to such

securities. This investment policy can be changed by the Fund upon 60 days' prior written notice to shareholders.

The Index consists of all common stocks and real estate investment trusts ("REITs") in the Solactive US Broad Market Index (the "Parent Index"), excluding companies that are determined by Institutional Shareholder Services ("ISS") to be involved with abortion, contraception, pornography, stem cell research/human cloning, weapons of mass destruction, or other enterprises that conflict with the USCCB Guidelines. The Parent Index includes the 3,000 U.S. companies with the largest free-float market capitalizations. The Index is the exclusive property of the Adviser. The Index is calculated and administered by Solactive AG ("Solactive"). Neither ISS nor Solactive is affiliated with the Fund, the Adviser or L2 Asset Management, LLC ("L2 Asset Management" or the "Sub-Adviser"), the Fund's sub-adviser. Solactive will deem a company to be a U.S. company if its securities are primarily listed in the United States, its country of risk is the United States, and it meets certain requirements with respect to its jurisdiction of incorporation and domicile. A company's "country of risk" is determined based on a number of criteria, including its country of domicile, the primary stock exchange on which it trades, the location from which the majority of its revenue comes, and its reporting currency. The Index is reconstituted and rebalanced on a semi-annual basis in May and November to reflect changes in the constituents of the Parent Index. New securities from initial public offerings are also added to the Index on a semi-annual basis in February and August, subject to fulfillment of certain eligibility criteria. Any companies in the Index whose policies and practices are determined by ISS to be inconsistent with the USCCB Guidelines are removed from the Index on a monthly basis.

The Fund attempts to replicate the Index by investing all, or substantially all, of its assets in the companies that make up the Index, holding each company in approximately the same proportion as its weighting in the Index.

The Fund will concentrate its investments (i.e., hold 25% or more of its total assets) in a particular industry or group of industries to approximately the same extent that the Index is so concentrated.

Principal Risks

As with all mutual funds, there is no guarantee that the Fund will achieve its investment objective. You could lose money by investing in the Fund. **A Fund share is not a bank deposit and is not insured or guaranteed by the FDIC or any government agency.** The principal risk factors affecting shareholders' investments in the Fund are set forth below.

Equity Risk – Since it purchases equity securities, the Fund is subject to the risk that stock prices will fall over short or extended periods of time. Historically, the equity markets have moved in cycles, and the value of the Fund’s equity securities may fluctuate drastically from day to day. Individual companies may report poor results or be negatively affected by industry and/or economic trends and developments. The prices of securities issued by such companies may suffer a decline in response. These factors contribute to price volatility, which is the principal risk of investing in the Fund.

Indexing Strategy/Index Tracking Risk – The Fund is managed with an indexing investment strategy, attempting to track the performance of an unmanaged index of securities, regardless of the current or projected performance of the Index or of the actual securities comprising the Index. This differs from an actively-managed fund, which typically seeks to outperform a benchmark index. As a result, the Fund’s performance may be less favorable than that of a portfolio managed using an active investment strategy. The structure and composition of the Index will affect the performance, volatility, and risk of the Index and, consequently, the performance, volatility, and risk of the Fund. While the Sub-Adviser seeks to track the performance of the Index (i.e., achieve a high degree of correlation with the Index), the Fund’s return may not match or achieve a high degree of correlation with the return of the Index. The Fund incurs a number of operating expenses not applicable to the Index, and incurs costs in buying and selling securities. In addition, the Fund may not be fully invested at times, generally as a result of cash flows into or out of the Fund or reserves of cash held by the Fund to meet redemptions.

Catholic Values Investing Risk – The Fund considers the USCCB Guidelines in its investment process and may choose not to purchase, or may sell, otherwise profitable investments in companies which have been identified as being in conflict with the USCCB Guidelines. This means that the Fund may underperform other similar mutual funds that do not consider the USCCB Guidelines when making investment decisions. In addition, there can be no guarantee that the activities of the companies identified by the Fund’s investment process will align (or be perceived to align) with the principles contained in the USCCB Guidelines.

Small- and Mid- Capitalization Company Risk – The small- and mid-capitalization companies in which the Fund invests may be more vulnerable to adverse business or economic events than larger, more established companies. In particular, investments in these small- and mid-sized companies may pose additional risks, including liquidity

risk, because these companies tend to have limited product lines, markets and financial resources, and may depend upon a relatively small management group. Therefore, small- and mid-capitalization stocks may be more volatile than those of larger companies. These securities may be traded over-the-counter or listed on an exchange.

Large-Capitalization Company Risk – The large-capitalization companies in which the Fund invests may not respond as quickly as smaller companies to competitive challenges, and their growth rates may lag the growth rates of well-managed smaller companies during strong economic periods.

Real Estate Investment Trusts Risk – REITs are pooled investment vehicles that own, and usually operate, income-producing real estate. REITs are susceptible to the risks associated with direct ownership of real estate, such as the following: declines in property values; increases in property taxes, operating expenses, interest rates or competition; overbuilding; zoning changes; and losses from casualty or condemnation. REITs typically incur fees that are separate from those of the Fund. Accordingly, the Fund's investments in REITs will result in the layering of expenses such that shareholders will indirectly bear a proportionate share of the REITs' operating expenses, in addition to paying Fund expenses. REIT operating expenses are not reflected in the fee table and example in this prospectus.

Industry Concentration Risk – The Fund will concentrate its investments (i.e., hold 25% or more of its total assets) in a particular industry or group of industries to approximately the same extent that the Index is so concentrated. Concentrating Fund investments in companies conducting business in the same industry will subject the Fund to a greater risk of loss as a result of adverse economic, business or other developments affecting that industry than if its investments were not so concentrated.

Large Purchase and Redemption Risk – Large purchases or redemptions of the Fund's shares may force the Fund to purchase or sell securities at times when it would not otherwise do so, and may cause the Fund's portfolio turnover rate and transaction costs to rise, which may negatively affect the Fund's performance and have adverse tax consequences for Fund shareholders.

New Fund Risk – Because the Fund is new, investors in the Fund bear the risk that the Fund may not be successful in implementing its investment strategy, may not employ a successful investment strategy, or may fail to attract sufficient assets under management to realize economies of scale, any of which could result in the Fund

being liquidated at any time without shareholder approval and at a time that may not be favorable for all shareholders. Such liquidation could have negative tax consequences for shareholders and will cause shareholders to incur expenses of liquidation.

Performance Information

The Fund commenced operations on December 31, 2019, and therefore does not have performance history for a full calendar year. Once the Fund has completed a full calendar year of operations, a bar chart and table will be included that will provide some indication of the risks of investing in the Fund by showing the variability of the Fund's returns and comparing the Fund's performance to a broad measure of market performance. Of course, the Fund's past performance (before and after taxes) does not necessarily indicate how the Fund will perform in the future.

Payments to Broker-Dealers and Other Financial Intermediaries

Ask your salesperson or visit your financial intermediary’s web site for more information.
