Knights of Columbus Real Estate Fund
(each, a “Fund” and together, the “Funds”)**

Supplement dated January 20, 2021 to:

- the Knights of Columbus Real Estate Fund’s Summary Prospectus, dated July 20, 2020 (the “Real Estate Fund Summary Prospectus”);
- the Knights of Columbus Core Bond Fund’s Summary Prospectus, the Knights of Columbus Limited Duration Fund’s Summary Prospectus, the Knights of Columbus Large Cap Growth Fund’s Summary Prospectus, the Knights of Columbus Large Cap Value Fund’s Summary Prospectus, the Knights of Columbus Small Cap Fund’s Summary Prospectus, the Knights of Columbus International Equity Fund’s Summary Prospectus, the Knights of Columbus Long/Short Equity Fund’s Summary Prospectus and the Knights of Columbus U.S. All Cap Index Fund’s Summary Prospectus, each dated March 1, 2020 (together with the Real Estate Fund Summary Prospectus, the “Summary Prospectuses”);
- the Prospectus for the Knights of Columbus Real Estate Fund, dated July 20, 2020 (the “Real Estate Fund Prospectus”);
- the Prospectus for the Knights of Columbus Core Bond Fund, Knights of Columbus Limited Duration Fund, Knights of Columbus Large Cap Growth Fund, Knights of Columbus Large Cap Value Fund, Knights of Columbus Small Cap Fund, Knights of Columbus International Equity Fund, Knights of Columbus Long/Short Equity Fund and Knights of Columbus U.S. All Cap Index Fund, dated March 1, 2020, as supplemented July 20, 2020 (together with the Real Estate Fund Prospectus, the “Prospectuses”);
- the Statement of Additional Information for the Knights of Columbus Real Estate Fund, dated July 20, 2020 (the “Real Estate Fund SAI”); and
- the Statement of Additional Information for the Knights of Columbus Core Bond Fund, Knights of Columbus Limited Duration Fund, Knights of Columbus Large Cap Growth Fund, Knights of Columbus Large Cap Value Fund, Knights of Columbus Small Cap Fund, Knights of Columbus International Equity Fund, Knights of Columbus Long/Short Equity Fund and Knights of Columbus U.S. All Cap Index Fund, dated March 1, 2020, as supplemented July 20, 2020 (together with the Real Estate Fund SAI, the “SAIs”).

This supplement provides new and additional information beyond that contained in the Summary Prospectuses, Prospectuses and SAIs, and should be read in conjunction with the Summary Prospectuses, Prospectuses and SAIs.

Effective on or about February 28, 2021 (the “Conversion Date”), each Fund will automatically convert its outstanding Investor Shares to I Shares of the Fund (the “Conversion”). After the Conversion Date, Investor Shares will no longer be offered by the Funds, and will be terminated as a separately designated class of the Funds.

In connection with the Conversion, effective immediately, Investor Shares are closed to new investors and new accounts. Until the Conversion Date, existing Investor Shares shareholders (i) may continue to make additional purchases of Investor Shares and (ii) will continue to have their dividend and capital gains distributions reinvested.

The Conversion of each Fund's Investor Shares into I Shares on the Conversion Date is not expected to be a taxable event for federal income tax purposes or to result in the recognition of gain or loss by converting shareholders, although shareholders should consult their own tax advisors.

Shareholders who are subject to the Conversion will be deemed to be eligible investors for purposes of the I Shares' minimum initial investment requirement.

For each Fund, I Shares currently have a lower total expense ratio than Investor Shares and are not subject to the distribution and/or service (12b-1) fees or the shareholder servicing fees payable by the Fund with respect to Investor Shares.

PLEASE RETAIN THIS SUPPLEMENT FOR FUTURE REFERENCE.

THE ADVISORS' INNER CIRCLE FUND III
(the "Trust")

Knights of Columbus Global Real Estate Fund (the "Fund")

Supplement dated June 8, 2020
to the Fund's Summary Prospectus, Prospectus and
Statement of Additional Information ("SAI"), each dated March 1, 2020

This Supplement provides new and additional information beyond that contained in the Summary Prospectus, Prospectus and SAI, and should be read in conjunction with the Summary Prospectus, Prospectus and SAI.

On or around July 20, 2020 (the "Effective Date"), the name of the Fund will be changed to "Knights of Columbus Real Estate Fund" and the Fund's principal investment strategies and risks will be revised in connection therewith. Accordingly, as of the Effective Date, the Summary Prospectus, Prospectus and SAI are hereby amended and supplemented as follows:

1. *All references to "Knights of Columbus Global Real Estate Fund" in the Summary Prospectus, Prospectus and SAI are hereby deleted and replaced with "Knights of Columbus Real Estate Fund."*
2. *The second and third paragraphs of the "Principal Investment Strategies" section of the Summary Prospectus and the Prospectus are hereby deleted and replaced with the following:*

For purposes of the Fund's 80% investment policy, real estate securities include common stocks, preferred stocks and other equity securities issued by real estate companies, including real estate investment trusts ("REITs") and real estate operating companies ("REOCs"), as well as derivatives and other instruments that have economic characteristics similar to such securities. REITs are pooled investment vehicles that own, and usually operate, income-producing real estate, or finance real estate. REOCs are publicly traded corporations that engage in the development, management or financing of real estate. The Fund considers a company to be a real estate company if the company derives the majority of its earnings before interest, depreciation and amortization from the ownership, management and development of income-producing real estate, or the financing of real estate. The Fund may invest in securities of companies with any market capitalization.

3. *In the "Principal Risks" section of the Summary Prospectus and the Prospectus, the "Foreign Company Risk" and "Foreign Currency Risk" disclosures are hereby deleted.*
4. *In the "More Information about Principal Risks" section of the Prospectus, the "Foreign/Emerging Markets Securities Risk" disclosure, solely as it relates to the Fund, is hereby deleted.*

THE TRUST

General. Each Fund is a separate series of the Trust. The Trust is an open-end investment management company established under Delaware law as a Delaware statutory trust under a Declaration of Trust dated December 4, 2013 (the “Declaration of Trust”). The Declaration of Trust permits the Trust to offer separate series (“funds”) of shares of beneficial interest (“shares”). The Trust reserves the right to create and issue shares of additional funds. Each fund is a separate mutual fund, and each share of each fund represents an equal proportionate interest in that fund. All consideration received by the Trust for shares of any fund, and all assets of such fund, belong solely to that fund and would be subject to any liabilities related thereto. Each fund of the Trust pays its (i) operating expenses, including fees of its service providers, expenses of preparing prospectuses, proxy solicitation material and reports to shareholders, costs of custodial services and registering its shares under federal and state securities laws, pricing and insurance expenses, brokerage costs, interest charges, taxes and organization expenses and (ii) pro rata share of the fund’s other expenses, including audit and legal expenses. Expenses attributable to a specific fund shall be payable solely out of the assets of that fund. Expenses not attributable to a specific fund are allocated across all of the funds on the basis of relative net assets. The other funds of the Trust are described in one or more separate statements of additional information.

Effective March 1, 2018, the Funds’ names were changed from the Knights of Columbus Core Bond Fund, Knights of Columbus Limited Duration Bond Fund, Knights of Columbus Large Cap Growth Fund, Knights of Columbus Large Cap Value Fund, Knights of Columbus Small Cap Equity Fund and Knights of Columbus International Equity Fund to the Catholic Investor Core Bond Fund, Catholic Investor Limited Duration Fund, Catholic Investor Large Cap Growth Fund, Catholic Investor Large Cap Value Fund, Catholic Investor Small Cap Fund and Catholic Investor International Equity Fund, respectively.

Effective March 1, 2020, the Funds’ names were changed from the Catholic Investor Core Bond Fund, Catholic Investor Limited Duration Fund, Catholic Investor Large Cap Growth Fund, Catholic Investor Large Cap Value Fund, Catholic Investor Small Cap Fund, Catholic Investor International Equity Fund, Catholic Investor Long/Short Equity Fund, Catholic Investor U.S. All Cap Index Fund and Catholic Investor Global Real Estate Fund to the Knights of Columbus Core Bond Fund, Knights of Columbus Limited Duration Fund, Knights of Columbus Large Cap Growth Fund, Knights of Columbus Large Cap Value Fund, Knights of Columbus Small Cap Fund, Knights of Columbus International Equity Fund, Knights of Columbus Long/Short Equity Fund, Knights of Columbus U.S. All Cap Index Fund and Knights of Columbus Global Real Estate Fund, respectively.

Description of Multiple Classes of Shares. The Trust is authorized to offer shares of the Funds in I Shares, Class S Shares, and Investor Shares. The different classes provide for variations in distribution and shareholder servicing fees and minimum investment requirements. Minimum investment requirements and investor eligibility are described in the Prospectus. For more information on distribution and shareholder servicing expenses, see “Payments to Financial Intermediaries” in this SAI. The Trust reserves the right to create and issue additional classes of shares.

Voting Rights. Each shareholder of record is entitled to one vote for each share held on the record date for the meeting. Each Fund will vote separately on matters relating solely to it. As a Delaware statutory trust, the Trust is not required, and does not intend, to hold annual meetings of shareholders. Approval of shareholders will be sought, however, for certain changes in the operation of the Trust and for the election of members of the Board of Trustees of the Trust (each, a “Trustee” and collectively, the “Trustees” or the “Board”) under certain circumstances. Under the Declaration of Trust, the Trustees have the power to liquidate each Fund without shareholder approval. While the Trustees have no present intention of exercising this power, they may do so if any Fund fails to reach a viable size within a reasonable amount of time or for such other reasons as may be determined by the Board.

In addition, a Trustee may be removed by the remaining Trustees or by shareholders at a special meeting called upon written request of shareholders owning at least 10% of the outstanding shares of the Trust. In the event that such a meeting is requested, the Trust will provide appropriate assistance and information to the shareholders requesting the meeting.

Any series of the Trust may reorganize or merge with one or more other series of the Trust or of another investment company. Any such reorganization or merger shall be pursuant to the terms and conditions specified in an agreement and plan of reorganization authorized and approved by the Trustees and entered into by the relevant series in connection therewith. In addition, such reorganization or merger may be authorized by vote of a majority of the Trustees then in office and, to the extent permitted by applicable law and the Declaration of Trust, without the approval of shareholders of any series.

DESCRIPTION OF PERMITTED INVESTMENTS

Each Fund's investment objective and principal investment strategies are described in the Prospectus. The Funds are diversified, as that term is defined under the Investment Company Act of 1940, as amended (the "1940 Act"). The following information supplements, and should be read in conjunction with, the Prospectus. The following are descriptions of the permitted investments and investment practices of the Funds and the associated risk factors. The Funds may invest in any of the following instruments or engage in any of the following investment practices unless such investment or activity is inconsistent with or is not permitted by a Fund's stated investment policies, including those stated below.

American Depositary Receipts ("ADRs"). ADRs, as well as other "hybrid" forms of ADRs, including European Depositary Receipts ("EDRs") and Global Depositary Receipts ("GDRs"), are certificates evidencing ownership of shares of a foreign issuer. Depositary receipts are securities that evidence ownership interests in a security or a pool of securities that have been deposited with a "depository" and may be sponsored or unsponsored. These certificates are issued by depository banks and generally trade on an established market in the United States or elsewhere. The underlying shares are held in trust by a custodian bank or similar financial institution in the issuer's home country. The depository bank may not have physical custody of the underlying securities at all times and may charge fees for various services, including forwarding dividends and interest and corporate actions. ADRs are alternatives to directly purchasing the underlying foreign securities in their national markets and currencies. However, ADRs continue to be subject to many of the risks associated with investing directly in foreign securities.

For ADRs, the depository is typically a U.S. financial institution and the underlying securities are issued by a foreign issuer. For other depositary receipts, the depository may be a foreign or a U.S. entity, and the underlying securities may have a foreign or a U.S. issuer. Depositary receipts will not necessarily be denominated in the same currency as their underlying securities. Generally, ADRs are issued in registered form, denominated in U.S. dollars, and designed for use in the U.S. securities markets. Other depositary receipts, such as GDRs and EDRs, may be issued in bearer form and denominated in other currencies, and are generally designed for use in securities markets outside the U.S. While the two types of depositary receipt facilities (unsponsored or sponsored) are similar, there are differences regarding a holder's rights and obligations and the practices of market participants. A depository may establish an unsponsored facility without participation by (or acquiescence of) the underlying issuer; typically, however, the depository requests a letter of non-objection from the underlying issuer prior to establishing the facility. Holders of unsponsored depositary receipts generally bear all the costs of the facility. The depository usually charges fees upon deposit and withdrawal of the underlying securities, the conversion of dividends into U.S. dollars or other currency, the disposition of non-cash distributions, and the performance of other services.

Sponsored depositary receipt facilities are created in generally the same manner as unsponsored facilities, except that sponsored depositary receipts are established jointly by a depository and the underlying issuer through a deposit agreement. The deposit agreement sets out the rights and responsibilities of the underlying issuer, the depository, and the depositary receipt holders. With sponsored facilities, the underlying issuer typically bears some of the costs of the depositary receipts (such as dividend payment fees of the depository), although most sponsored depositary receipts agree to distribute notices of shareholders meetings, voting instructions, and other shareholder communications and information to the depositary receipt holders at the underlying issuer's request. The depository of an unsponsored facility frequently is under no obligation to distribute shareholder communications received from the issuer of the deposited security or to pass through, to the holders of the receipts, voting rights with respect to the deposited securities.

For purposes of a Fund's investment policies, investments in depositary receipts will be deemed to be investments in the underlying securities. Thus, a depositary receipt representing ownership of common stock will be treated as common stock. Depositary receipts do not eliminate all of the risks associated with directly investing in the securities of foreign issuers.

Investments in the securities of foreign issuers may subject a Fund to investment risks that differ in some respects from those related to investments in securities of U.S. issuers. Such risks include future adverse political and economic developments, possible imposition of withholding taxes on income, possible seizure, nationalization or expropriation of foreign deposits, possible establishment of exchange controls or taxation at the source or greater fluctuation in value due to changes in exchange rates. Foreign issuers of securities often engage in business practices different from those of domestic issuers of similar securities, and there may be less information publicly available about foreign issuers. In addition, foreign issuers are, generally speaking, subject to less government supervision and regulation and different accounting treatment than are those in the United States.

Equity Securities. Equity securities represent ownership interests in a company or partnership and consist of common stocks, preferred stocks, warrants and rights to acquire common stock, securities convertible into common stock, and investments in master limited partnerships ("MLPs"). Investments in equity securities in general are subject to market risks that may cause their prices to fluctuate over time. Fluctuations in the value of equity securities in which a Fund invests will cause the net asset value of the Fund to fluctuate. The Funds may purchase equity securities traded on global securities exchanges or the over-the-counter market. Equity securities are described in more detail below:

- **Common Stock.** Common stock represents an equity or ownership interest in an issuer. In the event an issuer is liquidated or declares bankruptcy, the claims of owners of bonds and preferred stock take precedence over the claims of those who own common stock.
- **Preferred Stock.** Preferred stock represents an equity or ownership interest in an issuer that pays dividends at a specified rate and that has precedence over common stock in the payment of dividends. In the event an issuer is liquidated or declares bankruptcy, the claims of owners of bonds take precedence over the claims of those who own preferred and common stock.
- **Alternative Entity Securities.** Alternative entity securities are the securities of entities that are formed as limited partnerships, limited liability companies, business trusts or other non-corporate entities that are similar to common or preferred stock of corporations.
- **Exchange-Traded Funds ("ETFs").** An ETF is a fund whose shares are bought and sold on a securities exchange as if it were a single security. An ETF holds a portfolio of securities designed to track a particular market segment or index. Some examples of ETFs are SPDRs[®], DIAMONDSSM, NASDAQ 100 Index Tracking StockSM ("QQQsSM"), and iShares[®]. A Fund could purchase an ETF to temporarily gain exposure to a portion of the U.S. or foreign market while awaiting an opportunity to purchase securities directly. Similarly, a Fund may establish a short position in an ETF to gain inverse exposure to a portion of the U.S. or foreign markets. The risks of owning an ETF generally reflect the risks of owning the securities comprising the index which an index ETF is designed to track or the other holdings of an active or index ETF, although lack of liquidity in an ETF could result in it being more volatile than the tracked index or underlying holdings, and ETFs have management fees that increase their costs versus the costs of owning the underlying holdings directly. See also "Securities of Other Investment Companies" below.

- **Warrants.** Warrants are instruments that entitle the holder to buy an equity security at a specific price for a specific period of time. Changes in the value of a warrant do not necessarily correspond to changes in the value of its underlying security. The price of a warrant may be more volatile than the price of its underlying security, and a warrant may offer greater potential for capital appreciation as well as capital loss. Warrants do not entitle a holder to dividends or voting rights with respect to the underlying security and do not represent any rights in the assets of the issuing company. A warrant ceases to have value if it is not exercised prior to its expiration date. These factors can make warrants more speculative than other types of investments.
- **Convertible Securities.** Convertible securities are bonds, debentures, notes, preferred stocks or other securities that may be converted or exchanged (by the holder or by the issuer) into shares of the underlying common stock (or cash or securities of equivalent value) at a stated exchange ratio. A convertible security may also be called for redemption or conversion by the issuer after a particular date and under certain circumstances (including a specified price) established upon issue. If a convertible security held by a Fund is called for redemption or conversion, that Fund could be required to tender it for redemption, convert it into the underlying common stock, or sell it to a third party.

Convertible securities generally have less potential for gain or loss than common stocks. Convertible securities generally provide yields higher than the underlying common stocks, but generally lower than comparable non-convertible securities. Because of this higher yield, convertible securities generally sell at a price above their “conversion value,” which is the current market value of the stock to be received upon conversion. The difference between this conversion value and the price of convertible securities will vary over time depending on changes in the value of the underlying common stocks and interest rates. When the underlying common stocks decline in value, convertible securities will tend not to decline to the same extent because of the interest or dividend payments and the repayment of principal at maturity for certain types of convertible securities. However, securities that are convertible other than at the option of the holder generally do not limit the potential for loss to the same extent as securities convertible at the option of the holder. When the underlying common stocks rise in value, the value of convertible securities may also be expected to increase. At the same time, however, the difference between the market value of convertible securities and their conversion value will narrow, which means that the value of convertible securities will generally not increase to the same extent as the value of the underlying common stocks. Because convertible securities may also be interest-rate sensitive, their value may increase as interest rates fall and decrease as interest rates rise. Convertible securities are also subject to credit risk, and are often lower-quality securities.

General Risks of Investing in Stocks. While investing in stocks allows investors to participate in the benefits of owning a company, such investors must accept the risks of ownership. Unlike bondholders, who have preference to a company’s earnings and cash flow, preferred stockholders, followed by common stockholders in order of priority, are entitled only to the residual amount after a company meets its other obligations. For this reason, the value of a company’s stock will usually react more strongly to actual or perceived changes in the company’s financial condition or prospects than its debt obligations. Stockholders of a company that fares poorly can lose money.

Stock markets tend to move in cycles with short or extended periods of rising and falling stock prices. The value of a company’s stock may fall because of:

- Factors that directly relate to that company, such as decisions made by its management or lower demand for the company's products or services;
- Factors affecting an entire industry, such as increases in production costs; and
- Changes in general financial market conditions that are relatively unrelated to the company or its industry, such as changes in interest rates, currency exchange rates or inflation rates.

Because preferred stock is generally junior to debt securities and other obligations of the issuer, deterioration in the credit quality of the issuer will cause greater changes in the value of a preferred stock than in a more senior debt security with similar stated yield characteristics.

Moreover, changing economic, political, social or financial market conditions in one country or geographic region could adversely affect the market value of the securities held by a Fund in a different country or geographic region because of the increasingly interconnected global economies and financial markets. The investment managers potentially will be prevented from executing investment decisions at an advantageous time or price as a result of any domestic or global market disruptions, particularly disruptions causing heightened market volatility and reduced market liquidity. The current domestic political environment, as well as political and diplomatic events within the United States and abroad, such as the U.S. budget and deficit reduction plan and trade tensions with foreign nations, has in the past resulted, and may in the future result, in developments that present additional risks to a Fund's investments and operations. For example, additional and/or prolonged U.S. federal government shutdowns or global trade tensions may affect investor and consumer confidence and may adversely impact financial markets and the broader economy, perhaps suddenly and to a significant degree. Any such market, economic and other disruptions could also prevent a Fund from executing its investment strategies and processes in a timely manner.

Real Estate Investment Trusts ("REITs"). A REIT is a corporation or business trust (that would otherwise be taxed as a corporation) which meets the definitional requirements of the Internal Revenue Code of 1986, as amended (the "Code"). The Code permits a qualifying REIT to deduct from taxable income the dividends paid, thereby effectively eliminating corporate level federal income tax and making the REIT a pass-through vehicle for federal income tax purposes. To meet the definitional requirements of the Code, a REIT must, among other things: invest substantially all of its assets in interests in real estate (including mortgages and other REITs), cash and government securities; derive most of its income from rents from real property or interest on loans secured by mortgages on real property; and distribute annually 90% or more of its otherwise taxable income to shareholders. Although the REIT structure originated in the U.S., a number of countries around the world have adopted, or are considering adopting, similar REIT and REIT-like structures.

REITs are sometimes informally characterized as Equity REITs and Mortgage REITs. An Equity REIT invests primarily in the fee ownership or leasehold ownership of land and buildings; a Mortgage REIT invests primarily in mortgages on real property, which may secure construction, development or long-term loans.

REITs in which a Fund invests may be affected by changes in underlying real estate values, which may have an exaggerated effect to the extent that REITs in which the Fund invests may concentrate investments in particular geographic regions or property types. Additionally, rising interest rates may cause investors in REITs to demand a higher annual yield from future distributions, which may in turn decrease market prices for equity securities issued by REITs. Rising interest rates also generally increase the costs of obtaining financing, which could cause the value of the Fund's investments to decline. During periods of declining interest rates, certain Mortgage REITs may hold mortgages that the mortgagors elect to prepay, which prepayment may diminish the yield on securities issued by such Mortgage REITs. In addition, Mortgage REITs may be affected by the ability of borrowers to repay when due the debt extended by the REIT and Equity REITs may be affected by the ability of tenants to pay rent.

Certain REITs have relatively small market capitalization, which may tend to increase the volatility of the market price of securities issued by such REITs. Furthermore, REITs are dependent upon specialized management skills, have limited diversification and are, therefore, subject to risks inherent in operating and financing a limited number of projects. By investing in REITs indirectly through a Fund, a shareholder will bear not only his proportionate share of the expenses of the Fund, but also, indirectly, similar expenses of the REITs. REITs depend generally on their ability to generate cash flow to make distributions to shareholders.

In addition to these risks, Equity REITs may be affected by changes in the value of the underlying property owned by the trusts, while Mortgage REITs may be affected by the quality of any credit extended. Further, Equity and Mortgage REITs are dependent upon management skills and generally may not be diversified. Equity and Mortgage REITs are also subject to heavy cash flow dependency defaults by borrowers and self-liquidation. In addition, Equity and Mortgage REITs could possibly fail to qualify for tax free pass-through of income under the Code or to maintain their exemptions from registration under the 1940 Act. The above factors may also adversely affect a borrower's or a lessee's ability to meet its obligations to the REIT. In the event of default by a borrower or lessee, the REIT may experience delays in enforcing its rights as a mortgagee or lessor and may incur substantial costs associated with protecting its investments.

Real Estate Operating Companies ("REOCs"). REOCs are real estate companies that engage in the development, management or financing of real estate. Typically, they provide services such as property management, property development, facilities management and real estate financing. REOCs are publicly traded corporations that have not elected to be taxed as REITs. The three primary reasons for such an election are (i) availability of tax-loss carryforwards, (ii) operation in non-REIT-qualifying lines of business and (iii) the ability to retain earnings.

Micro, Small and Medium Capitalization Issuers. Investing in equity securities of micro, small and medium capitalization companies often involves greater risk than is customarily associated with investments in larger capitalization companies. This increased risk may be due to the greater business risks of smaller size, limited markets and financial resources, narrow product lines and frequent lack of depth of management. The securities of micro and smaller companies are often traded in the over-the-counter market and even if listed on a national securities exchange may not be traded in volumes typical for that exchange. Consequently, the securities of micro and smaller companies are less likely to be liquid, may have limited market stability, and may be subject to more abrupt or erratic market movements than securities of larger, more established growth companies or the market averages in general.

Initial Public Offerings ("IPOs"). A Fund may invest a portion of its assets in securities of companies offering shares in IPOs. IPOs may have a magnified performance impact on a fund with a small asset base. A Fund may hold IPO shares for a very short period of time, which may increase the turnover of a Fund's portfolio and may lead to increased expenses for the Fund, such as commissions and transaction costs. By selling IPO shares, a Fund may realize taxable gains it will subsequently distribute to shareholders. In addition, the market for IPO shares can be speculative and/or inactive for extended periods of time. The limited number of shares available for trading in some IPOs may make it more difficult for a Fund to buy or sell significant amounts of shares without an unfavorable impact on prevailing prices. Holders of IPO shares can be affected by substantial dilution in the value of their shares, by sales of additional shares and by concentration of control in existing management and principal shareholders.

A Fund's investment in IPO shares may include the securities of unseasoned companies (companies with less than three years of continuous operations), which presents risks considerably greater than common stocks of more established companies. These companies may have limited operating histories and their prospects for profitability may be uncertain. These companies may be involved in new and evolving businesses and may be vulnerable to competition and changes in technology, markets and economic conditions. They may be more dependent on key managers and third parties and may have limited product lines.

Master Limited Partnerships. MLPs are limited partnerships or limited liability companies, whose partnership units or limited liability interests are listed and traded on a U.S. securities exchange, and are treated as publicly traded partnerships for federal income tax purposes. To qualify to be treated as a partnership for tax purposes, an MLP must receive at least 90% of its income from qualifying sources as set forth in Section 7704(d) of the Code. These qualifying sources include activities such as the exploration, development, mining, production, processing, refining, transportation, storage and marketing of mineral or natural resources. To the extent that an MLP's interests are concentrated in a particular industry or sector, such as the energy sector, the MLP will be negatively impacted by economic events adversely impacting that industry or sector. MLPs that are formed as limited partnerships generally have two classes of owners, the general partner and limited partners, while MLPs that are formed as limited liability companies generally have two analogous classes of owners, the managing member and the members. For purposes of this section, references to general partners also apply to managing members and references to limited partners also apply to members.

The general partner is typically owned by a major energy company, an investment fund, the direct management of the MLP or is an entity owned by one or more of such parties. The general partner may be structured as a private or publicly traded corporation or other entity. The general partner typically controls the operations and management of the MLP through an equity interest of as much as 2% in the MLP plus, in many cases, ownership of common units and subordinated units. A holder of general partner interests can be liable under certain circumstances for amounts greater than the amount of the holder's investment in the general partner interest. General partner interests are not publicly traded and generally cannot be converted into common units. The general partner interest can be redeemed by the MLP if the MLP unitholders choose to remove the general partner, typically with a supermajority vote by limited partner unitholders.

Limited partners own the remainder of the MLP through ownership of common units and have a limited role in the MLP's operations and management. Common units are listed and traded on U.S. securities exchanges, with their value fluctuating predominantly based on prevailing market conditions and the success of the MLP. Unlike owners of common stock of a corporation, owners of common units have limited voting rights and have no ability annually to elect directors. In the event of liquidation, common units have preference over subordinated units, but not over debt or preferred units, to the remaining assets of the MLP.

MLPs are typically structured such that common units and general partner interests have first priority to receive quarterly cash distributions up to an established minimum amount ("minimum quarterly distributions" or "MQD"). Common and general partner interests also accrue arrearages in distributions to the extent the MQD is not paid. Once common and general partner interests have been paid, subordinated units receive distributions of up to the MQD; however, subordinated units do not accrue arrearages. Distributable cash in excess of the MQD paid to both common and subordinated units is distributed to both common and subordinated units generally on a pro rata basis. The general partner is also eligible to receive incentive distributions if the general partner operates the business in a manner which results in distributions paid per common unit surpassing specified target levels. As the general partner increases cash distributions to the limited partners, the general partner receives an increasingly higher percentage of the incremental cash distributions. A common arrangement provides that the general partner can reach a tier where it receives 50% of every incremental dollar paid to common and subordinated unit holders. These incentive distributions encourage the general partner to streamline costs, increase capital expenditures and acquire assets in order to increase the partnership's cash flow and raise the quarterly cash distribution in order to reach higher tiers. Such results benefit all security holders of the MLP.

Foreign Securities. Foreign securities include equity securities of foreign entities, obligations of foreign branches of U.S. banks and of foreign banks, including, without limitation, European Certificates of Deposit, European Time Deposits, European Bankers' Acceptances, Canadian Time Deposits, Europaper and Yankee Certificates of Deposit, and investments in Canadian Commercial Paper and foreign securities. These instruments have investment risks that differ in some respects from those related to investments in obligations of U.S. domestic issuers. Such risks include future adverse political and economic developments, the possible imposition of withholding taxes on interest or other income, possible seizure, nationalization, or expropriation of foreign deposits, the possible establishment of exchange controls or taxation at the source, greater fluctuations in value due to changes in exchange rates, or the adoption of other foreign governmental restrictions which might adversely affect the payment of principal and interest on such obligations. Such investments may also entail higher custodial fees and sales commissions than domestic investments. Foreign issuers of securities or obligations are often subject to accounting treatment and engage in business practices different from those respecting domestic issuers of similar securities or obligations. Foreign branches of U.S. banks and foreign banks may be subject to less stringent reserve requirements than those applicable to domestic branches of U.S. banks.

Emerging Markets. An "emerging market country" is generally a country that the International Bank for Reconstruction and Development ("World Bank") and the International Finance Corporation would consider to be an emerging or developing country. Typically, emerging markets are in countries that are in the process of industrialization, with lower gross national products ("GNP") than more developed countries.

Investment Funds. Some emerging countries currently prohibit direct foreign investment in the securities of their companies. Certain emerging countries, however, permit indirect foreign investment in the securities of companies listed and traded on their stock exchanges through investment funds that they have specifically authorized. Investments in these investment funds are subject to the provisions of the 1940 Act. If a Fund invests in such investment funds, shareholders will bear not only their proportionate share of the expenses (including operating expenses and the fees of Knights of Columbus Asset Advisors LLC ("Knights of Columbus Asset Advisors" or the "Adviser")), but also will indirectly bear similar expenses of the underlying investment funds. In addition, these investment funds may trade at a premium over their net asset value.

Risks of Foreign Securities:

Foreign securities, foreign currencies, and securities issued by U.S. entities with substantial foreign operations may involve significant risks in addition to the risks inherent in U.S. investments.

Political and Economic Factors. Local political, economic, regulatory, or social instability, military action or unrest, or adverse diplomatic developments may affect the value of foreign investments. Listed below are some of the more important political and economic factors that could negatively affect an investment in foreign securities:

- The economies of foreign countries may differ from the economy of the United States in such areas as growth of GNP, rate of inflation, capital reinvestment, resource self-sufficiency, budget deficits and national debt;
- Foreign governments sometimes participate to a significant degree, through ownership interests or regulation, in their respective economies. Actions by these governments could significantly influence the market prices of securities and payment of dividends;

- The economies of many foreign countries are dependent on international trade and their trading partners and they could be severely affected if their trading partners were to enact protective trade barriers and economic conditions;
- The internal policies of a particular foreign country may be less stable than in the United States. Other countries face significant external political risks, such as possible claims of sovereignty by other countries or tense and sometimes hostile border clashes; and
- A foreign government may act adversely to the interests of U.S. investors, including expropriation or nationalization of assets, confiscatory taxation and other restrictions on U.S. investment. A country may restrict or control foreign investments in its securities markets. These restrictions could limit a Fund's ability to invest in a particular country or make it very expensive for the Fund to invest in that country. Some countries require prior governmental approval or limit the types or amount of securities or companies in which a foreigner can invest. Other countries may restrict the ability of foreign investors to repatriate their investment income and capital gains.

Certain foreign countries have experienced outbreaks of infectious illnesses and may be subject to other public health threats, infectious illnesses, diseases or similar issues in the future. Any spread of an infectious illness, public health threat or similar issue could reduce consumer demand or economic output, result in market closures, travel restrictions or quarantines, and generally have a significant impact on the economies of the affected country and other countries with which it does business, which in turn could adversely affect a Fund's investments in that country and other affected countries.

On June 23, 2016, the United Kingdom (the "UK") voted in a referendum to leave the European Union (the "EU") (commonly known as "Brexit"), which led to significant global market volatility, as well as political, economic, and legal uncertainty. On January 31, 2020, the UK left the EU and entered into a transition period scheduled to last until December 31, 2020. There is still considerable uncertainty regarding the potential consequences of Brexit, including with respect to the negotiations of new trade agreements during the transition period and whether Brexit will have a negative impact on the UK, the broader global economy or the value of the British pound sterling. UK businesses are increasingly preparing for a disorderly Brexit because of the risks that trade negotiations between the UK and the EU may not be completed by the end of the transition period or the outcomes of such negotiations may be undesirable. Brexit may cause both the British pound sterling and the Euro to depreciate in relation to the U.S. dollar, which could adversely affect a Fund's investments denominated in British pound sterling or Euros that are not fully hedged, irrespective of the performance of the underlying issuer. As a result of Brexit, the UK may be less stable than it has been in recent years, and investments in the UK may be difficult to value or subject to greater or more frequent volatility. Brexit could adversely affect European or worldwide political, regulatory, economic or market conditions and could contribute to instability in global political institutions, regulatory agencies and financial markets. Brexit could also lead to legal uncertainty and politically divergent national laws and regulations while a new relationship between the UK and the EU is defined and the UK determines which EU laws to replace or replicate. Further, Brexit may cause additional member states to contemplate departing from the EU, which would likely perpetuate political and economic instability in the region and cause additional market disruption in global financial markets. The UK and European economies and the broader global economy could be significantly impacted during this period of uncertainty, which may result in increased volatility and illiquidity, and potentially lower economic growth in markets in the UK, Europe and globally that could potentially have an adverse effect on the value of a Fund's investments.

Information and Supervision. There is generally less publicly available information about foreign companies than companies based in the United States. For example, there are often no reports and ratings published about foreign companies comparable to the ones written about U.S. companies. Foreign companies are typically not subject to uniform accounting, auditing and financial reporting standards, practices and requirements comparable to those applicable to U.S. companies. The lack of comparable information makes investment decisions concerning foreign companies more difficult and less reliable than those concerning domestic companies.

Stock Exchange and Market Risk. The investment managers anticipate that in most cases an exchange or over-the-counter market located outside of the United States will be the best available market for foreign securities. Foreign stock markets, while growing in volume and sophistication, are generally not as developed as the markets in the United States. Foreign stock markets tend to differ from those in the United States in a number of ways.

Foreign stock markets:

- are generally more volatile than, and not as developed or efficient as, those in the United States;
- have substantially less volume;
- trade securities that tend to be less liquid and experience rapid and erratic price movements;
- have generally higher commissions and are subject to set minimum rates, as opposed to negotiated rates;
- employ trading, settlement and custodial practices less developed than those in U.S. markets; and
- may have different settlement practices, which may cause delays and increase the potential for failed settlements.

Foreign markets may offer less protection to shareholders than U.S. markets because:

- foreign accounting, auditing, and financial reporting requirements may render a foreign corporate balance sheet more difficult to understand and interpret than one subject to U.S. law and standards;
- adequate public information on foreign issuers may not be available, and it may be difficult to secure dividends and information regarding corporate actions on a timely basis;
- in general, there is less overall governmental supervision and regulation of securities exchanges, brokers, and listed companies than in the United States;
- over-the-counter markets tend to be less regulated than stock exchange markets and, in certain countries, may be totally unregulated;
- economic or political concerns may influence regulatory enforcement and may make it difficult for shareholders to enforce their legal rights; and
- restrictions on transferring securities within the United States or to U.S. persons may make a particular security less liquid than foreign securities of the same class that are not subject to such restrictions.

Foreign Currency Risk. While the Funds denominate their net asset value in U.S. dollars, the securities of foreign companies are frequently denominated in foreign currencies. Thus, a change in the value of a foreign currency against the U.S. dollar will result in a corresponding change in value of securities denominated in that currency. Some of the factors that may impair the investments denominated in a foreign currency are:

- It may be expensive to convert foreign currencies into U.S. dollars and vice versa;

- Complex political and economic factors may significantly affect the values of various currencies, including the U.S. dollar, and their exchange rates;
- Government intervention may increase risks involved in purchasing or selling foreign currency options, forward contracts and futures contracts, since exchange rates may not be free to fluctuate in response to other market forces;
- There may be no systematic reporting of last sale information for foreign currencies or regulatory requirement that quotations available through dealers or other market sources be firm or revised on a timely basis;
- Available quotation information is generally representative of very large round-lot transactions in the inter-bank market and thus may not reflect exchange rates for smaller odd-lot transactions (less than \$1 million) where rates may be less favorable; and
- The inter-bank market in foreign currencies is a global, around-the-clock market. To the extent that a market is closed while the markets for the underlying currencies remain open, certain markets may not always reflect significant price and rate movements.

Taxes. Certain foreign governments levy withholding taxes on dividend and interest income. Although in some countries it is possible for the Funds to recover a portion of these taxes, the portion that cannot be recovered will reduce the income the Funds receive from their investments.

Emerging Markets. Investing in emerging markets may magnify the risks of foreign investing. Security prices in emerging markets can be significantly more volatile than those in more developed markets, reflecting the greater uncertainties of investing in less established markets and economies. In particular, countries with emerging markets may:

- Have relatively unstable governments;
- Present greater risks of nationalization of businesses, restrictions on foreign ownership and prohibitions on the repatriation of assets;
- Offer less protection of property rights than more developed countries; and
- Have economies that are based on only a few industries, may be highly vulnerable to changes in local or global trade conditions, and may suffer from extreme and volatile debt burdens or inflation rates.

Local securities markets may trade a small number of securities and may be unable to respond effectively to increases in trading volume, potentially making prompt liquidation of holdings difficult or impossible at times.

Money Market Securities. Money market securities include short-term U.S. government securities; custodial receipts evidencing separately traded interest and principal components of securities issued by the U.S. Treasury; commercial paper rated in the highest short-term rating category by a nationally recognized statistical ratings organization (“NRSRO”), such as Standard & Poor’s Rating Services (“S&P”) or Moody’s Investor Services, Inc. (“Moody’s”), or determined by the investment managers to be of comparable quality at the time of purchase; short-term bank obligations (certificates of deposit, time deposits and bankers’ acceptances) of U.S. commercial banks with assets of at least \$1 billion as of the end of their most recent fiscal year; and repurchase agreements involving such securities. Each of these money market securities are described in this section. For a description of ratings, see “Appendix A – Description of Ratings” to this SAI.

U.S. Government Securities. The Funds may invest in U.S. government securities. Securities issued or guaranteed by the U.S. government or its agencies or instrumentalities include U.S. Treasury securities, which are backed by the full faith and credit of the U.S. Treasury and which differ only in their interest rates, maturities, and times of issuance. U.S. Treasury bills have initial maturities of one year or less; U.S. Treasury notes have initial maturities of one to ten years; and U.S. Treasury bonds generally have initial maturities of greater than ten years. U.S. Treasury notes and bonds typically pay coupon interest semi-annually and repay the principal at maturity. Certain U.S. government securities are issued or guaranteed by agencies or instrumentalities of the U.S. government including, but not limited to, obligations of U.S. government agencies or instrumentalities such as the Federal National Mortgage Association (“Fannie Mae”), the Government National Mortgage Association (“Ginnie Mae”), the Small Business Administration, the Federal Farm Credit Administration, the Federal Home Loan Banks, Banks for Cooperatives (including the Central Bank for Cooperatives), the Federal Land Banks, the Federal Intermediate Credit Banks, the Tennessee Valley Authority, the Export-Import Bank of the United States, the Commodity Credit Corporation, the Federal Financing Bank, the Student Loan Marketing Association, the National Credit Union Administration and the Federal Agricultural Mortgage Corporation (“Farmer Mac”).

Some obligations issued or guaranteed by U.S. government agencies and instrumentalities, including, for example, Ginnie Mae pass-through certificates, are supported by the full faith and credit of the U.S. Treasury. Other obligations issued by or guaranteed by federal agencies, such as those securities issued by Fannie Mae, are supported by the discretionary authority of the U.S. government to purchase certain obligations of the federal agency. Additionally, some obligations are issued by or guaranteed by federal agencies, such as those of the Federal Home Loan Banks, which are supported by the right of the issuer to borrow from the U.S. Treasury. While the U.S. government provides financial support to such U.S. government-sponsored federal agencies, no assurance can be given that the U.S. government will always do so, since the U.S. government is not so obligated by law. Guarantees of principal by U.S. government agencies or instrumentalities may be a guarantee of payment at the maturity of the obligation so that in the event of a default prior to maturity there might not be a market and thus no means of realizing on the obligation prior to maturity. Guarantees as to the timely payment of principal and interest do not extend to the value or yield of these securities nor to the value of the Funds’ shares.

On September 7, 2008, the Federal Housing Finance Agency (“FHFA”) placed Fannie Mae and the Federal Home Loan Mortgage Corporation (“Freddie Mac”) in conservatorship. At the same time, the U.S. Treasury agreed to acquire \$1 billion of senior preferred stock of each instrumentality and obtained warrants for the purchase of common stock of each instrumentality (the “Senior Preferred Stock Purchase Agreement” or “Agreement”). Under the Agreement, the U.S. Treasury pledged to provide up to \$200 billion per instrumentality as needed, including the contribution of cash capital to the instrumentalities in the event their liabilities exceed their assets. This was intended to ensure that the instrumentalities maintain a positive net worth and meet their financial obligations, preventing mandatory triggering of receivership. On December 24, 2009, the U.S. Treasury announced that it was amending the Agreement to allow the \$200 billion cap on the U.S. Treasury’s funding commitment to increase as necessary to accommodate any cumulative reduction in net worth through the end of 2012. The unlimited support the U.S. Treasury extended to the two companies expired at the beginning of 2013 – Fannie Mae’s support is now capped at \$125 billion and Freddie Mac has a limit of \$149 billion.

On August 17, 2012, the U.S. Treasury announced that it was again amending the Agreement to terminate the requirement that Fannie Mae and Freddie Mac each pay a 10% annual dividend. Instead, the companies will transfer to the U.S. Treasury on a quarterly basis all profits earned during a quarter that exceed a capital reserve amount. The capital reserve amount was \$3 billion in 2013, and decreased by \$600 million in each subsequent year through 2017. As part of the new terms, Fannie Mae and Freddie Mac also will be required to reduce their investment portfolios over time. On December 21, 2017, the U.S. Treasury announced that it was again amending the Agreement to reinstate the \$3 billion capital reserve amount.

Fannie Mae and Freddie Mac are the subject of several continuing class action lawsuits and investigations by federal regulators over certain accounting, disclosure or corporate governance matters, which (along with any resulting financial restatements) may adversely affect the guaranteeing entities. Importantly, the future of the entities is in serious question as the U.S. government reportedly is considering multiple options, ranging from nationalization, privatization, consolidation, or abolishment of the entities.

Under the direction of the FHFA, Fannie Mae and Freddie Mac developed a common securitization platform that in June 2019 began issuing a uniform mortgage-backed security (“UMBS”) (the “Single Security Initiative”) that aligned the characteristics of Fannie Mae and Freddie Mac certificates. The effects that the Single Security Initiative may have on the market for mortgage-backed securities are uncertain.

The FHFA has announced plans to consider taking Fannie Mae and Freddie Mac out of conservatorship. Should Fannie Mae and Freddie Mac be taken out of conservatorship, it is unclear whether the U.S. Treasury would continue to enforce its rights or perform its obligations under the Agreement. It also unclear how the capital structure of Fannie Mae and Freddie Mac would be constructed post-conservatorship, and what effects, if any, the privatization of the enterprises will have on their creditworthiness and guarantees of certain mortgage-backed securities. Accordingly, should the FHFA take the enterprises out of conservatorship, there could be an adverse impact on the value of their securities which could cause a Fund to lose value.

U.S. Treasury Obligations. U.S. Treasury obligations consist of direct obligations of the U.S. Treasury, including Treasury bills, notes and bonds, and separately traded interest and principal component parts of such obligations, including those transferable through the Federal book-entry system known as Separate Trading of Registered Interest and Principal of Securities (“STRIPS”). The STRIPS program lets investors hold and trade the individual interest and principal components of eligible Treasury notes and bonds as separate securities. Under the STRIPS program, the principal and interest components are separately issued by the U.S. Treasury at the request of depository financial institutions, which then trade the component parts separately.

Municipal Securities. Municipal securities, including municipal bonds and municipal notes, consist of: (i) debt obligations issued by or on behalf of public authorities to obtain funds to be used for various public facilities, for refunding outstanding obligations, for general operating expenses and for lending such funds to other public institutions and facilities, and (ii) certain private activity and industrial development bonds issued by or on behalf of public authorities to obtain funds to provide for the construction, equipment, repair or improvement of privately operated facilities.

Municipal bonds are debt obligations issued to obtain funds for various public purposes. Municipal bonds include general obligation bonds, revenue or special obligation bonds, private activity and industrial development bonds, moral obligation bonds and participation interests in municipal bonds. General obligation bonds are backed by the taxing power of the issuing municipality. Revenue or special obligation bonds are backed by the revenues of a project or facility, such as tolls from a toll bridge. Private activity or industrial development bonds are issued by or on behalf of public authorities to raise money to finance various privately-owned or -operated facilities for business and manufacturing, housing, sports and pollution control. These bonds are also used to finance public facilities such as airports, mass transit systems, ports, parking or sewage or solid waste disposal facilities and certain other facilities. The payment of the principal and interest on such bonds is dependent solely on the ability of the facility’s user to meet its financial obligations and the pledge, if any, of real and personal property financed as security for such payment. Moral obligation bonds are normally issued by special purpose authorities. Moral obligation bonds are not backed by the full faith and credit of the issuing municipality, but are generally backed by the agreement of the issuing authority to request appropriations from the municipality’s legislative body. Certificates of participation represent an interest in an underlying obligation or commitment, such as an obligation issued in connection with a leasing arrangement.

Municipal notes consist of general obligation notes, tax anticipation notes (notes sold to finance working capital needs of the issuer in anticipation of receiving taxes on a future date), revenue anticipation notes (notes sold to provide needed cash prior to receipt of expected non-tax revenues from a specific source), bond anticipation notes, tax and revenue anticipation notes, certificates of indebtedness, demand notes and construction loan notes. The maturities of the instruments at the time of issue will generally range from three months to one year.

Commercial Paper. Commercial paper is the term used to designate unsecured short-term promissory notes issued by corporations and other entities. Maturities on these issues vary from a few to 270 days.

Investment Grade Fixed Income Securities. Fixed income securities are considered investment grade if they are rated in one of the four highest rating categories by an NRSRO, or, if not rated, are determined to be of comparable quality by the investment managers. See “Appendix A - Description of Ratings” for a description of the bond rating categories of several NRSROs. Ratings of each NRSRO represent its opinion of the safety of principal and interest payments (and not the market risk) of bonds and other fixed income securities it undertakes to rate at the time of issuance. Ratings are not absolute standards of quality and may not reflect changes in an issuer’s creditworthiness. Fixed income securities rated BBB- or Baa3 lack outstanding investment characteristics, and have speculative characteristics as well. Securities rated Baa3 by Moody’s or BBB- by S&P or higher are considered by those rating agencies to be “investment grade” securities, although Moody’s considers securities rated in the Baa category to have speculative characteristics. While issuers of bonds rated BBB by S&P are considered to have adequate capacity to meet their financial commitments, adverse economic conditions or changing circumstances are more likely to lead to a weakened capacity to pay interest and principal for debt in this category than debt in higher rated categories. In the event a security owned by a Fund is downgraded below investment grade, the investment managers will review the situation and take appropriate action with regard to the security, including the actions discussed below.

Debt Securities. Corporations and governments use debt securities to borrow money from investors. Most debt securities promise a variable or fixed rate of return and repayment of the amount borrowed at maturity. Some debt securities, such as zero coupon bonds, do not pay current interest and are purchased at a discount from their face value.

Types of Debt Securities:

- **Corporate Bonds.** Corporations issue bonds and notes to raise money for working capital or for capital expenditures such as plant construction, equipment purchases and expansion. In return for the money loaned to the corporation by investors, the corporation promises to pay investors interest, and repay the principal amount of the bond or note.
- **Mortgage-Backed Securities.** Mortgage-backed securities are interests in pools of mortgage loans that various governmental, government-related and private organizations assemble as securities for sale to investors. Unlike most debt securities, which pay interest periodically and repay principal at maturity or on specified call dates, mortgage-backed securities make monthly payments that consist of both interest and principal payments. In effect, these payments are a “pass-through” of the monthly payments made by the individual borrowers on their mortgage loans, net of any fees paid to the issuer or guarantor of such securities. Since homeowners usually have the option of paying either part or all of the loan balance before maturity, the effective maturity of a mortgage-backed security is often shorter than is stated.

Governmental entities, private insurers and mortgage poolers may insure or guarantee the timely payment of interest and principal of these pools through various forms of insurance or guarantees, including individual loan, title, pool and hazard insurance and letters of credit. The investment managers will consider such insurance and guarantees and the creditworthiness of the issuers thereof in determining whether a mortgage-related security meets its investment quality standards. It is possible that the private insurers or guarantors will not meet their obligations under the insurance policies or guarantee arrangements.

Although the market for such securities is becoming increasingly liquid, securities issued by certain private organizations may not be readily marketable.

Commercial Banks, Savings and Loan Institutions, Private Mortgage Insurance Companies, Mortgage Bankers and other Secondary Market Issuers. Commercial banks, savings and loan institutions, private mortgage insurance companies, mortgage bankers and other secondary market issuers also create pass-through pools of conventional mortgage loans. In addition to guaranteeing the mortgage-related security, such issuers may service and/or have originated the underlying mortgage loans. Pools created by these issuers generally offer a higher rate of interest than pools created by Ginnie Mae, Fannie Mae and Freddie Mac because they are not guaranteed by a government agency.

Risks of Mortgage-Backed Securities. Yield characteristics of mortgage-backed securities differ from those of traditional debt securities in a variety of ways. The most significant differences of mortgage-backed securities are: 1) payments of interest and principal are more frequent (usually monthly) and 2) falling interest rates generally cause individual borrowers to pay off their mortgage earlier than expected, which results in prepayments of principal on the securities, thus forcing a Fund to reinvest the money at a lower interest rate. In addition to risks associated with changes in interest rates described in “Factors Affecting the Value of Debt Securities,” a variety of economic, geographic, social and other factors, such as the sale of the underlying property, refinancing or foreclosure, can cause investors to repay the loans underlying a mortgage-backed security sooner than expected. When prepayment occurs, the Fund may have to reinvest its principal at a rate of interest that is lower than the rate on existing mortgage-backed securities.

Other Asset-Backed Securities. These securities are interests in pools of a broad range of assets other than mortgages, such as automobile loans, computer leases and credit card receivables. Like mortgage-backed securities, these securities are pass-through. In general, the collateral supporting these securities is of shorter maturity than mortgage loans and is less likely to experience substantial prepayments with interest rate fluctuations, but may still be subject to prepayment risk.

Asset-backed securities present certain risks that are not presented by mortgage-backed securities. Primarily, these securities may not have the benefit of any security interest in the related assets, which raises the possibility that recoveries on repossessed collateral may not be available to support payments on these securities. For example, credit card receivables are generally unsecured and the debtors are entitled to the protection of a number of state and federal consumer credit laws, many of which allow debtors to reduce their balances by offsetting certain amounts owed on the credit cards. Most issuers of asset-backed securities backed by automobile receivables permit the servicers of such receivables to retain possession of the underlying obligations. If the servicer were to sell these obligations to another party, there is a risk that the purchaser would acquire an interest superior to that of the holders of the related asset-backed securities. Due to the quantity of vehicles involved and requirements under state laws, asset-backed securities backed by automobile receivables may not have a proper security interest in all of the obligations backing such receivables.

To lessen the effect of failures by obligors on underlying assets to make payments, the entity administering the pool of assets may agree to ensure the receipt of payments on the underlying pool occurs in a timely fashion (“liquidity protection”). In addition, asset-backed securities may obtain insurance, such as guarantees, policies or letters of credit obtained by the issuer or sponsor from third parties, for some or all of the assets in the pool (“credit support”). Delinquency or loss more than that anticipated or failure of the credit support could adversely affect the return on an investment in such a security.

The Funds may also invest in residual interests in asset-backed securities, which consist of the excess cash flow remaining after making required payments on the securities and paying related administrative expenses. The amount of residual cash flow resulting from a particular issue of asset-backed securities depends in part on the characteristics of the underlying assets, the coupon rates on the securities, prevailing interest rates, the amount of administrative expenses and the actual prepayment experience on the underlying assets.

Senior Loans and Bank Loans. Senior loans and bank loans typically are arranged through private negotiations between a borrower and several financial institutions or a group of lenders which are represented by one or more lenders acting as agent. The agent is often a commercial bank that originates the loan and invites other parties to join the lending syndicate. The agent will be primarily responsible for negotiating the loan agreement and will have responsibility for the documentation and ongoing administration of the loan on behalf of the lenders after completion of the loan transaction. A Fund can invest in a senior loan or bank loan either as a direct lender or through an assignment or participation.

When a Fund acts as a direct lender, it will have a direct contractual relationship with the borrower and may participate in structuring the loan, may enforce compliance by the borrower with the terms of the loan agreement and may have voting, consent and set-off rights under the loan agreement.

Loan assignments are investments in all or a portion of certain senior loans or bank loans purchased from the lenders or from other third parties. The purchaser of an assignment typically will acquire direct rights against the borrower under the loan. While the purchaser of an assignment typically succeeds to all the rights and obligations of the assigning lender under the loan agreement, because assignments are arranged through private negotiations between potential assignees and assignors, or other third parties whose interests are being assigned, the rights and obligations acquired by a Fund may differ from and be more limited than those held by the assigning lender.

A holder of a loan participation typically has only a contractual right with the seller of the participation and not with the borrower or any other entities interpositioned between the seller of the participation and the borrower. As such, the purchaser of a loan participation assumes the credit risk of the seller of the participation, and any intermediary entities between the seller and the borrower, in addition to the credit risk of the borrower. When a Fund holds a loan participation, it will have the right to receive payments of principal, interest and fees to which it may be entitled only from the seller of the participation and only upon receipt of the seller of such payments from the borrower or from any intermediary parties between the seller and the borrower. Additionally, the Fund generally will have no right to enforce compliance by the borrower with the terms of the loan agreement, will have no voting, consent or set-off rights under the loan agreement and may not directly benefit from the collateral supporting the loan although lenders that sell participations generally are required to distribute liquidation proceeds received by them pro rata among the holders of such participations. In the event of the bankruptcy or insolvency of the borrower, a loan participation may be subject to certain defenses that can be asserted by the borrower as a result of improper conduct by the seller or intermediary. If the borrower fails to pay principal and interest when due, the Fund may be subject to greater delays, expenses and risks than those that would have been involved if the Fund had purchased a direct obligation of such borrower.

Direct loans, assignments and loan participations may be considered liquid, as determined by the investment managers based on criteria approved by the Board.

A Fund may have difficulty disposing of bank loans because, in certain cases, the market for such instruments is not highly liquid. The lack of a highly liquid secondary market may have an adverse impact on the value of such instruments and on the Fund's ability to dispose of the bank loan in response to a specific economic event, such as deterioration in the creditworthiness of the borrower. Furthermore, transactions in many loans settle on a delayed basis, and the Fund may not receive the proceeds from the sale of a loan for a substantial period of time after the sale. As a result, those proceeds will not be available to make additional investments or to meet the Fund's redemption obligations. To the extent that extended settlement creates short-term liquidity needs, a Fund may satisfy these needs by holding additional cash or selling other investments (potentially at an inopportune time, which could result in losses to a Fund).

Bank loans may not be considered "securities," and purchasers, such as a Fund, therefore may not be entitled to rely on the anti-fraud protections of the federal securities laws.

The investment managers may from time to time have the opportunity to receive material, non-public information ("Confidential Information") about the borrower, including financial information and related documentation regarding the borrower that is not publicly available. Pursuant to applicable policies and procedures, the investment managers may (but are not required to) seek to avoid receipt of Confidential Information from the borrower so as to avoid possible restrictions on their ability to purchase and sell investments on behalf of a Fund and other clients to which such Confidential Information relates (e.g., publicly traded securities issued by the borrower). In such circumstances, the Fund (and other clients of the investment managers) may be disadvantaged in comparison to other investors, including with respect to the price the Fund pays or receives when it buys or sells a bank loan. Further, the investment managers' abilities to assess the desirability of proposed consents, waivers or amendments with respect to certain bank loans may be compromised if they are not privy to available Confidential Information. The investment managers may also determine to receive such Confidential Information in certain circumstances under their applicable policies and procedures. If the investment managers intentionally or unintentionally come into possession of Confidential Information, they may be unable, potentially for a substantial period of time, to purchase or sell publicly traded securities to which such Confidential Information relates.

Repurchase Agreements. The Funds may enter into repurchase agreements with financial institutions. A repurchase agreement is an agreement under which a Fund acquires a fixed income security (generally a security issued by the U.S. government or an agency thereof, a banker's acceptance, or a certificate of deposit) from a commercial bank, broker, or dealer, and simultaneously agrees to resell such security to the seller at an agreed upon price and date (normally, the next business day). Because the security purchased constitutes collateral for the repurchase obligation, a repurchase agreement may be considered a loan that is collateralized by the security purchased. The acquisition of a repurchase agreement may be deemed to be an acquisition of the underlying securities as long as the obligation of the seller to repurchase the securities is collateralized fully. The Funds follow certain procedures designed to minimize the risks inherent in such agreements. These procedures include effecting repurchase transactions only with creditworthy financial institutions whose condition will be continually monitored by the investment managers. The repurchase agreements entered into by the Funds will provide that the underlying collateral at all times shall have a value at least equal to 102% of the resale price stated in the agreement and consist only of securities permissible under Section 101(47)(A)(i) of the Bankruptcy Code (the investment managers monitor compliance with this requirement). Under all repurchase agreements entered into by the Funds, the custodian or its agent must take possession of the underlying collateral. In the event of a default or bankruptcy by a selling financial institution, a Fund will seek to liquidate such collateral. However, the exercising of a Fund's right to liquidate such collateral could involve certain costs or delays and, to the extent that proceeds from any sale upon a default of the obligation to repurchase were less than the repurchase price, the Fund could suffer a loss. The Funds may also enter into "tri-party" repurchase agreements. In "tri-party" repurchase agreements, an unaffiliated third party custodian maintains accounts to hold collateral for a Fund and its counterparties and, therefore, the Fund may be subject to the credit risk of those custodians. The investments of the Funds in repurchase agreements, at times, may be substantial when, in the view of the investment managers, liquidity or other considerations so warrant.

Reverse Repurchase Agreements. Reverse repurchase agreements are transactions in which the Funds sell portfolio securities to financial institutions, such as banks and broker-dealers, and agree to repurchase them at a mutually agreed-upon date and price that is higher than the original sale price. Reverse repurchase agreements are similar to a fully collateralized borrowing by the Funds. At the time a Fund enters into a reverse repurchase agreement, it will earmark on the books of the Fund or place in a segregated account cash or liquid securities having a value equal to the repurchase price (including accrued interest) and will subsequently monitor the account to ensure that such equivalent value is maintained.

Reverse repurchase agreements involve risks. Reverse repurchase agreements are a form of leverage, and the use of reverse repurchase agreements by a Fund may increase the Fund's volatility. Reverse repurchase agreements are also subject to the risk that the other party to the reverse repurchase agreement will be unable or unwilling to complete the transaction as scheduled, which may result in losses to a Fund. Reverse repurchase agreements also involve the risk that the market value of the securities sold by a Fund may decline below the price at which it is obligated to repurchase the securities. In addition, when a Fund invests the proceeds it receives in a reverse repurchase transaction, there is a risk that those investments may decline in value. In this circumstance, the Fund could be required to sell other investments in order to meet its obligations to repurchase the securities.

Securities of Other Investment Companies. The Funds may invest in shares of other investment companies, to the extent permitted by applicable law and any applicable exemptive relief, subject to certain restrictions. These investment companies typically incur fees that are separate from those fees incurred directly by a Fund. A Fund's purchase of such investment company securities results in the layering of expenses, such that shareholders would indirectly bear a proportionate share of the operating expenses of such investment companies, including advisory fees, in addition to paying the Fund's expenses. Unless an exception is available, Section 12(d)(1)(A) of the 1940 Act prohibits a fund from (i) acquiring more than 3% of the voting shares of any one investment company, (ii) investing more than 5% of its total assets in any one investment company, and (iii) investing more than 10% of its total assets in all investment companies combined, including its ETF investments.

For hedging or other purposes, a Fund may invest in investment companies that seek to track the composition and/or performance of specific indexes or portions of specific indexes. Certain of these investment companies, known as ETFs, are traded on a securities exchange. (See "Exchange-Traded Funds" above). The market prices of index-based investments will fluctuate in accordance with changes in the underlying portfolio securities of the investment company and also due to supply and demand of the investment company's shares on the exchange upon which the shares are traded. Index-based investments may not replicate or otherwise match the composition or performance of their specified index due to transaction costs, among other things.

Pursuant to orders issued by the U.S. Securities and Exchange Commission (the "SEC") to certain ETFs and procedures approved by the Board, the Funds may invest in such ETFs in excess of the 3% limitation prescribed by Section 12(d)(1)(A) described above, provided that the Funds otherwise comply with the conditions of the applicable SEC order, as it may be amended, and any other applicable investment limitations. Neither such ETFs nor their investment advisers make any representations regarding the advisability of investing in the ETFs.

Derivatives. Derivatives are financial instruments whose value is based on an underlying asset (such as a stock or a bond), an underlying economic factor (such as an interest rate) or a market benchmark. Unless otherwise stated in the Prospectus, the Funds may use derivatives for a number of purposes including managing risk, gaining exposure to various markets in a cost-efficient manner, reducing transaction costs, remaining fully invested and speculating. The Funds may also invest in derivatives with the goal of protecting themselves from broad fluctuations in market prices, interest rates or foreign currency exchange rates (a practice known as “hedging”). When hedging is successful, a Fund will have offset any depreciation in the value of its portfolio securities by the appreciation in the value of the derivative position. Although techniques other than the sale and purchase of derivatives could be used to control the exposure of the Funds to market fluctuations, the use of derivatives may be a more effective means of hedging this exposure. In the future, to the extent such use is consistent with the Funds’ investment objectives and is legally permissible, the Funds may use instruments and techniques that are not presently contemplated, but that may be subsequently developed.

There can be no assurance that a derivative strategy, if employed, will be successful. Because many derivatives have a leverage or borrowing component, adverse changes in the value or level of the underlying asset, reference rate or index can result in a loss substantially greater than the amount invested in the derivative itself. Certain derivatives have the potential for unlimited loss, regardless of the size of the initial investment. Accordingly, certain derivative transactions may be considered to constitute borrowing transactions for purposes of the 1940 Act. Such a derivative transaction will not be considered to constitute the issuance of a “senior security” by a Fund, and therefore such transaction will not be subject to the 300% asset coverage requirement otherwise applicable to borrowings by the Fund, if the Fund covers the transaction or segregates sufficient liquid assets (or such assets are “earmarked” on the Fund’s books) in accordance with the requirements and interpretations of the SEC and its staff. Futures contracts, forward contracts and other applicable securities and instruments that settle physically, and written options on such contracts, will be treated as cash settled for asset segregation purposes when a Fund has entered into a contractual arrangement with a third party futures commission merchant or other counterparty to off-set the Fund’s exposure under the contract and, failing that, to assign its delivery obligation under the contract to the counterparty.

Pursuant to rules adopted under the Commodity Exchange Act (“CEA”) by the Commodity Futures Trading Commission (“CFTC”), a Fund must either operate within certain guidelines and restrictions with respect to the Fund’s use of futures, options on such futures, commodity options and certain swaps, or the Adviser will be subject to registration with the CFTC as a “commodity pool operator” (“CPO”).

Consistent with the CFTC’s regulations, the Trust, on behalf of the Funds, has filed a notice of exclusion from the definition of the term CPO under the CEA pursuant to CFTC Rule 4.5 and, therefore, the Funds are not subject to registration or regulation as CPOs under the CEA. As a result, the Funds will be limited in their ability to use futures, options on such futures, commodity options and certain swaps. Complying with the limitations may restrict the investment managers’ ability to implement the Funds’ investment strategies and may adversely affect the Funds’ performance.

Types of Derivatives:

Futures. A futures contract is an agreement between two parties whereby one party agrees to sell and the other party agrees to buy a specified amount of a financial instrument at an agreed upon price and time. The financial instrument underlying the contract may be a stock, stock index, bond, bond index, interest rate, foreign exchange rate or other similar instrument. Agreeing to buy the underlying financial instrument is called buying a futures contract or taking a long position in the contract. Likewise, agreeing to sell the underlying financial instrument is called selling a futures contract or taking a short position in the contract.

Futures contracts are traded in the United States on commodity exchanges or boards of trade (known as “contract markets”) approved for such trading and regulated by the CFTC. These contract markets standardize the terms, including the maturity date and underlying financial instrument, of all futures contracts.

Unlike other securities, the parties to a futures contract do not have to pay for or deliver the underlying financial instrument until some future date (the “delivery date”). Contract markets require both the purchaser and seller to deposit “initial margin” with a futures broker, known as a futures commission merchant or custodian bank, when they enter into the contract. Initial margin deposits are typically equal to a percentage of the contract’s value. Initial margin is similar to a performance bond or good faith deposit on a contract and is returned to the depositing party upon termination of the futures contract if all contractual obligations have been satisfied. After they open a futures contract, the parties to the transaction must compare the purchase price of the contract to its daily market value. If the value of the futures contract changes in such a way that a party’s position declines, that party must make additional “variation margin” payments so that the margin payment is adequate. On the other hand, the value of the contract may change in such a way that there is excess margin on deposit, possibly entitling the party that has a gain to receive all or a portion of this amount. This process is known as “marking to the market.” Variation margin does not represent a borrowing or loan by a party but is instead a settlement between the party and the futures broker of the amount one party would owe the other if the futures contract terminated. In computing daily net asset value, each party marks to market its open futures positions.

Although the terms of a futures contract call for the actual delivery of and payment for the underlying security, in many cases the parties may close the contract early by taking an opposite position in an identical contract. If the sale price upon closing out the contract is less than the original purchase price, the party closing out the contract will realize a loss. If the sale price upon closing out the contract is more than the original purchase price, the party closing out the contract will realize a gain. Conversely, if the purchase price upon closing out the contract is more than the original sale price, the party closing out the contract will realize a loss. If the purchase price upon closing out the contract is less than the original sale price, the party closing out the contract will realize a gain.

A Fund may incur commission expenses when it opens or closes a futures position.

Options. An option is a contract between two parties for the purchase and sale of a financial instrument for a specified price (known as the “strike price” or “exercise price”) at any time during the option period. Unlike a futures contract, an option grants a right (not an obligation) to buy or sell a financial instrument. Generally, a seller of an option can grant a buyer two kinds of rights: a “call” (the right to buy the security) or a “put” (the right to sell the security). Options have various types of underlying instruments, including specific securities, indices of securities prices, foreign currencies, interest rates and futures contracts. Options may be traded on an exchange (exchange-traded options) or may be customized agreements between the parties (over-the-counter or “OTC” options). Like futures, a financial intermediary, known as a clearing corporation, financially backs exchange-traded options. However, OTC options have no such intermediary and are subject to the risk that the counterparty will not fulfill its obligations under the contract. The principal factors affecting the market value of an option include supply and demand, interest rates, the current market value of the underlying instrument relative to the exercise price of the option, the volatility of the underlying instrument, and the time remaining until the option expires.

- **Purchasing Put and Call Options**

When a Fund purchases a put option, it buys the right to sell the instrument underlying the option at a fixed strike price. In return for this right, the Fund pays the current market price for the option (known as the “option premium”). A Fund may purchase put options to offset or hedge against a decline in the market value of its securities (“protective puts”) or to benefit from a decline in the price of securities that it does not own. A Fund would ordinarily realize a gain if, during the option period, the value of the underlying securities decreased below the exercise price sufficiently to cover the premium and transaction costs. However, if the price of the underlying instrument does not fall enough to offset the cost of purchasing the option, a put buyer would lose the premium and related transaction costs.

Call options are similar to put options, except that a Fund obtains the right to purchase, rather than sell, the underlying instrument at the option's strike price. A Fund would normally purchase call options in anticipation of an increase in the market value of securities it owns or wants to buy. A Fund would ordinarily realize a gain if, during the option period, the value of the underlying instrument exceeded the exercise price plus the premium paid and related transaction costs. Otherwise, the Fund would realize either no gain or a loss on the purchase of the call option.

The purchaser of an option may terminate its position by:

- Allowing it to expire and losing its entire premium;
 - Exercising the option and either selling (in the case of a put option) or buying (in the case of a call option) the underlying instrument at the strike price; or
 - Closing it out in the secondary market at its current price.
- **Selling (Writing) Put and Call Options**

When a Fund writes a call option it assumes an obligation to sell specified securities to the holder of the option at a fixed strike price if the option is exercised at any time before the expiration date. Similarly, when a Fund writes a put option it assumes an obligation to purchase specified securities from the option holder at a fixed strike price if the option is exercised at any time before the expiration date. The Fund may terminate its position in an exchange-traded put option before exercise by buying an option identical to the one it has written. Similarly, the Fund may cancel an OTC option by entering into an offsetting transaction with the counterparty to the option.

A Fund could try to hedge against an increase in the value of securities it would like to acquire by writing a put option on those securities. If security prices rise, the Fund would expect the put option to expire and the premium it received to offset the increase in the security's value. If security prices remain the same over time, the Fund would hope to profit by closing out the put option at a lower price. If security prices fall, the Fund may lose an amount of money equal to the difference between the value of the security and the premium it received. Writing covered put options may deprive a Fund of the opportunity to profit from a decrease in the market price of the securities it would like to acquire.

The characteristics of writing call options are similar to those of writing put options, except that call writers expect to profit if prices remain the same or fall. A Fund could try to hedge against a decline in the value of securities it already owns by writing a call option. If the price of that security falls as expected, the Fund would expect the option to expire and the premium it received to offset the decline of the security's value. However, the Fund must be prepared to deliver the underlying instrument in return for the strike price, which may deprive it of the opportunity to profit from an increase in the market price of the securities it holds.

The Funds are permitted to write only "covered" options. At the time of selling a call option, a Fund may cover the option by owning, among other things:

- The underlying security (or securities convertible into the underlying security without additional consideration), index, interest rate, foreign currency or futures contract;

- A call option on the same security or index with the same or lesser exercise price;
- A call option on the same security or index with a greater exercise price, provided that the Fund also segregates cash or liquid securities in an amount equal to the difference between the exercise prices;
- Cash or liquid securities equal to at least the market value of the optioned securities, interest rate, foreign currency or futures contract; or
- In the case of an index, the portfolio of securities that corresponds to the index.

At the time of selling a put option, a Fund may cover the option by, among other things:

- Entering into a short position in the underlying security;
- Purchasing a put option on the same security, index, interest rate, foreign currency or futures contract with the same or greater exercise price;
- Purchasing a put option on the same security, index, interest rate, foreign currency or futures contract with a lesser exercise price and segregating cash or liquid securities in an amount equal to the difference between the exercise prices; or
- Maintaining the entire exercise price in liquid securities.

▪ **Options on Securities Indices**

Options on securities indices are similar to options on securities, except that the exercise of securities index options requires cash settlement payments and does not involve the actual purchase or sale of securities. In addition, securities index options are designed to reflect price fluctuations in a group of securities or segment of the securities market rather than price fluctuations in a single security.

▪ **Options on Credit Default Swaps**

An option on a credit default swap gives the holder the right to enter into a credit default swap at a specified future date and under specified terms in exchange for a purchase price or premium. The writer of the option bears the risk of any unfavorable move in the value of the credit default swap relative to the market value on the exercise date, while the purchaser may allow the option to expire unexercised.

▪ **Options on Futures**

An option on a futures contract provides the holder with the right to buy a futures contract (in the case of a call option) or sell a futures contract (in the case of a put option) at a fixed time and price. Upon exercise of the option by the holder, the contract market clearing house establishes a corresponding short position for the writer of the option (in the case of a call option) or a corresponding long position (in the case of a put option). If the option is exercised, the parties will be subject to the futures contracts. In addition, the writer of an option on a futures contract is subject to initial and variation margin requirements on the option position. Options on futures contracts are traded on the same contract market as the underlying futures contract.

The buyer or seller of an option on a futures contract may terminate the option early by purchasing or selling an option of the same series (i.e., the same exercise price and expiration date) as the option previously purchased or sold. The difference between the premiums paid and received represents the trader's profit or loss on the transaction.

A Fund may purchase put and call options on futures contracts instead of selling or buying futures contracts. The Fund may buy a put option on a futures contract for the same reasons it would sell a futures contract. It also may purchase such a put option in order to hedge a long position in the underlying futures contract. A Fund may buy a call option on a futures contract for the same purpose as the actual purchase of a futures contract, such as in anticipation of favorable market conditions.

A Fund may write a call option on a futures contract to hedge against a decline in the prices of the instrument underlying the futures contracts. If the price of the futures contract at expiration were below the exercise price, the Fund would retain the option premium, which would offset, in part, any decline in the value of its portfolio securities.

The writing of a put option on a futures contract is similar to the purchase of the futures contracts, except that, if the market price declines, a Fund would pay more than the market price for the underlying instrument. The premium received on the sale of the put option, less any transaction costs, would reduce the net cost to the Fund.

- **Options on Foreign Currencies**

A put option on a foreign currency gives the purchaser of the option the right to sell a foreign currency at the exercise price until the option expires. A call option on a foreign currency gives the purchaser of the option the right to purchase the currency at the exercise price until the option expires. The Funds may purchase or write put and call options on foreign currencies for the purpose of hedging against changes in future currency exchange rates.

The Funds may use foreign currency options given the same circumstances under which they could use forward foreign currency exchange contracts. For example, a decline in the U.S. dollar value of a foreign currency in which a Fund's securities are denominated would reduce the U.S. dollar value of the securities, even if their value in the foreign currency remained constant. In order to hedge against such a risk, the Fund may purchase a put option on the foreign currency. If the value of the currency then declined, the Fund could sell the currency for a fixed amount in U.S. dollars and thereby offset, at least partially, the negative effect on its securities that otherwise would have resulted. Conversely, if a Fund anticipates a rise in the U.S. dollar value of a currency in which securities to be acquired are denominated, the Fund may purchase call options on the currency in order to offset, at least partially, the effects of negative movements in exchange rates. If currency exchange rates do not move in the direction or to the extent anticipated, the Funds could sustain losses on transactions in foreign currency options.

- **Combined Positions**

The Funds may purchase and write options in combination with each other, or in combination with futures or forward contracts or swap agreements, to adjust the risk and return characteristics of the overall position. For example, a Fund could construct a combined position whose risk and return characteristics are similar to selling a futures contract by purchasing a put option and writing a call option on the same underlying instrument. Alternatively, a Fund could write a call option at one strike price and buy a call option at a lower price to reduce the risk of the written call option in the event of a substantial price increase. Because combined options positions involve multiple trades, they result in higher transaction costs and may be more difficult to open and close out.

Forward Foreign Currency Exchange Contracts. A forward foreign currency contract involves an obligation to purchase or sell a specific amount of currency at a future date or date range at a specific price. In the case of a cancelable forward contract, the holder has the unilateral right to cancel the contract at maturity by paying a specified fee. Forward foreign currency exchange contracts differ from foreign currency futures contracts in certain respects. Unlike futures contracts, forward contracts:

- Do not have standard maturity dates or amounts (i.e., the parties to the contract may fix the maturity date and the amount);
- Are typically traded directly between currency traders (usually large commercial banks) and their customers in the inter-bank markets, as opposed to on exchanges regulated by the CFTC (note, however, that under new definitions adopted by the CFTC and SEC, many non-deliverable foreign currency forwards will be considered swaps for certain purposes, including determination of whether such instruments must be traded on exchanges and centrally cleared);
- Do not require an initial margin deposit; and
- May be closed by entering into a closing transaction with the currency trader who is a party to the original forward contract, as opposed to with a commodities exchange.

- **Foreign Currency Hedging Strategies**

A “settlement hedge” or “transaction hedge” is designed to protect a Fund against an adverse change in foreign currency values between the date a security is purchased or sold and the date on which payment is made or received. Entering into a forward contract for the purchase or sale of the amount of foreign currency involved in an underlying security transaction for a fixed amount of U.S. dollars “locks in” the U.S. dollar price of the security. A Fund may also use forward contracts to purchase or sell a foreign currency when it anticipates purchasing or selling securities denominated in foreign currency, even if it has not yet selected the specific investments.

A Fund may use forward contracts to hedge against a decline in the value of existing investments denominated in foreign currency. Such a hedge, sometimes referred to as a “position hedge,” would tend to offset both positive and negative currency fluctuations, but would not offset changes in security values caused by other factors. The Fund could also hedge the position by selling another currency expected to perform similarly to the currency in which the Fund’s investment is denominated. This type of hedge, sometimes referred to as a “proxy hedge,” could offer advantages in terms of cost, yield, or efficiency, but generally would not hedge currency exposure as effectively as a direct hedge into U.S. dollars. Proxy hedges may result in losses if the currency used to hedge does not perform similarly to the currency in which the hedged securities are denominated.

Transaction and position hedging do not eliminate fluctuations in the underlying prices of the securities that a Fund owns or intends to purchase or sell. They simply establish a rate of exchange that one can achieve at some future point in time. Additionally, these techniques tend to minimize the risk of loss due to a decline in the value of the hedged currency and to limit any potential gain that might result from the increase in value of such currency.

A Fund may enter into forward contracts to shift its investment exposure from one currency into another. Such transactions may call for the delivery of one foreign currency in exchange for another foreign currency, including currencies in which its securities are not then denominated. This may include shifting exposure from U.S. dollars to a foreign currency, or from one foreign currency to another foreign currency. This type of strategy, sometimes known as a “cross-hedge,” will tend to reduce or eliminate exposure to the currency that is sold, and increase exposure to the currency that is purchased. Cross-hedges may protect against losses resulting from a decline in the hedged currency but will cause the Fund to assume the risk of fluctuations in the value of the currency it purchases. Cross-hedging transactions also involve the risk of imperfect correlation between changes in the values of the currencies involved.

It is difficult to forecast with precision the market value of portfolio securities at the expiration or maturity of a forward or futures contract. Accordingly, a Fund may have to purchase additional foreign currency on the spot (cash) market if the market value of a security it is hedging is less than the amount of foreign currency it is obligated to deliver. Conversely, the Fund may have to sell on the spot market some of the foreign currency it received upon the sale of a security if the market value of such security exceeds the amount of foreign currency it is obligated to deliver.

Equity-Linked Securities. The Funds may invest in privately issued securities whose investment results are designed to correspond generally to the performance of a specified stock index or “basket” of securities, or sometimes a single stock (referred to as “equity-linked securities”). These securities are used for many of the same purposes as derivative instruments and share many of the same risks.

Swap Agreements. A swap agreement is a financial instrument that typically involves the exchange of cash flows between two parties on specified dates (settlement dates), where the cash flows are based on agreed-upon prices, rates, indices, etc. The nominal amount on which the cash flows are calculated is called the notional amount. Swap agreements are individually negotiated and structured to include exposure to a variety of different types of investments or market factors, such as interest rates, foreign currency rates, mortgage securities, corporate borrowing rates, security prices or inflation rates.

Swap agreements may increase or decrease the overall volatility of the investments of a Fund and its share price. The performance of swap agreements may be affected by a change in the specific interest rate, currency, or other factors that determine the amounts of payments due to and from the Fund. If a swap agreement calls for payments by the Fund, the Fund must be prepared to make such payments when due. In addition, if the counterparty’s creditworthiness declined, the value of a swap agreement would be likely to decline, potentially resulting in losses.

Generally, swap agreements have a fixed maturity date that will be agreed upon by the parties. The agreement can be terminated before the maturity date under certain circumstances, such as default by one of the parties or insolvency, among others, and can be transferred by a party only with the prior written consent of the other party. A Fund may be able to eliminate its exposure under a swap agreement either by assignment or by other disposition, or by entering into an offsetting swap agreement with the same party or a similarly creditworthy party. If the counterparty is unable to meet its obligations under the contract, declares bankruptcy, defaults or becomes insolvent, a Fund may not be able to recover the money it expected to receive under the swap agreement. The Funds will not enter into any swap agreement unless the investment managers believe that the counterparty to the transaction is creditworthy.

A swap agreement can be a form of leverage, which can magnify the Funds’ gains or losses. In order to reduce the risk associated with leveraging, the Funds may cover their current obligations under swap agreements according to guidelines established by the SEC. If a Fund enters into a swap agreement on a net basis, it will segregate assets with a daily value at least equal to the excess, if any, of the Fund’s accrued obligations under the swap agreement over the accrued amount the Fund is entitled to receive under the agreement. If a Fund enters into a swap agreement on other than a net basis, it will segregate assets with a value equal to the full amount of the Fund’s accrued obligations under the swap agreement.

▪ **Equity Swaps**

In a typical equity swap, one party agrees to pay another party the return on a stock, stock index or basket of stocks in return for a specified interest rate. By entering into an equity index swap, for example, the index receiver can gain exposure to stocks making up the index of securities without actually purchasing those stocks. Equity index swaps involve not only the risk associated with investment in the securities represented in the index, but also the risk that the performance of such securities, including dividends, will not exceed the return on the interest rate that a Fund will be committed to pay.

- **Total Return Swaps**

Total return swaps are contracts in which one party agrees to make payments of the total return from a reference instrument—which may be a single asset, a pool of assets or an index of assets—during a specified period, in return for payments equal to a fixed or floating rate of interest or the total return from another underlying reference instrument. The total return includes appreciation or depreciation on the underlying asset, plus any interest or dividend payments. Payments under the swap are based upon an agreed upon principal amount but, since the principal amount is not exchanged, it represents neither an asset nor a liability to either counterparty, and is referred to as notional. Total return swaps are marked to market daily using different sources, including quotations from counterparties, pricing services, brokers or market makers. The unrealized appreciation or depreciation related to the change in the valuation of the notional amount of the swap is combined with the amount due to a Fund at termination or settlement. The primary risks associated with total return swaps are credit risks (if the counterparty fails to meet its obligations) and market risk (if there is no liquid market for the swap or unfavorable changes occur to the underlying reference instrument).

- **Interest Rate Swaps**

Interest rate swaps are financial instruments that involve the exchange of one type of interest rate for another type of interest rate cash flow on specified dates in the future. Some of the different types of interest rate swaps are “fixed-for-floating rate swaps,” “termed basis swaps” and “index amortizing swaps.” Fixed-for-floating rate swaps involve the exchange of fixed interest rate cash flows for floating rate cash flows. Termed basis swaps entail cash flows to both parties based on floating interest rates, where the interest rate indices are different. Index amortizing swaps are typically fixed-for-floating rate swaps where the notional amount changes if certain conditions are met.

As with a traditional investment in a debt security, a Fund could lose money by investing in an interest rate swap if interest rates change adversely. For example, if a Fund enters into a swap where it agrees to exchange a floating rate of interest for a fixed rate of interest, the Fund may have to pay more money than it receives. Similarly, if a Fund enters into a swap where it agrees to exchange a fixed rate of interest for a floating rate of interest, the Fund may receive less money than it has agreed to pay.

- **Currency Swaps**

A currency swap is an agreement between two parties in which one party agrees to make interest rate payments in one currency and the other promises to make interest rate payments in another currency. A Fund may enter into a currency swap when it has one currency and desires a different currency. Typically, the interest rates that determine the currency swap payments are fixed, although occasionally one or both parties may pay a floating rate of interest. Unlike an interest rate swap, however, the principal amounts are exchanged at the beginning of the agreement and returned at the end of the agreement. Changes in foreign exchange rates and changes in interest rates, as described above, may negatively affect currency swaps.

- **Inflation Swaps**

Inflation swaps are fixed-maturity, over-the-counter derivatives where one party pays a fixed rate in exchange for payments tied to an inflation index, such as the Consumer Price Index. The fixed rate, which is set by the parties at the initiation of the swap, is often referred to as the “breakeven inflation” rate and generally represents the current difference between treasury yields and Treasury Inflation Protected Securities yields of similar maturities at the initiation of the swap agreement. Inflation swaps are typically designated as “zero coupon,” where all cash flows are exchanged at maturity. The value of an inflation swap is expected to fluctuate in response to changes in the relationship between nominal interest rates and the rate of inflation. An inflation swap can lose value if the realized rate of inflation over the life of the swap is less than the fixed market implied inflation rate (the breakeven inflation rate) the investor agreed to pay at the initiation of the swap.

- **Credit Default Swaps**

A credit default swap is an agreement between a “buyer” and a “seller” for credit protection. The credit default swap agreement may have as reference obligations one or more securities that are not then held by a Fund. The protection buyer is generally obligated to pay the protection seller an upfront payment and/or a periodic stream of payments over the term of the agreement until a credit event on a reference obligation has occurred. If no default occurs, the seller would keep the stream of payments and would have no payment obligations. If a credit event occurs, the seller generally must pay the buyer the full notional amount (the “par value”) of the swap.

- **Caps, Collars and Floors**

Caps and floors have an effect similar to buying or writing options. In a typical cap or floor agreement, one party agrees to make payments only under specified circumstances, usually in return for payment of a fee by the other party. For example, the buyer of an interest rate cap obtains the right to receive payments to the extent that a specified interest rate exceeds an agreed-upon level. The seller of an interest rate floor is obligated to make payments to the extent that a specified interest rate falls below an agreed-upon level. An interest rate collar combines elements of buying a cap and selling a floor.

Risks of Derivatives:

While transactions in derivatives may reduce certain risks, these transactions themselves entail certain other risks. For example, unanticipated changes in interest rates, securities prices or currency exchange rates may result in a poorer overall performance of the Funds than if they had not entered into any derivatives transactions. Derivatives may magnify the Funds’ gains or losses, causing them to make or lose substantially more than they invested.

When used for hedging purposes, increases in the value of the securities a Fund holds or intends to acquire should offset any losses incurred with a derivative. Purchasing derivatives for purposes other than hedging could expose the Fund to greater risks.

Use of derivatives involves transaction costs, which may be significant, and may also increase the amount of taxable income to shareholders.

Correlation of Prices. The Funds’ ability to hedge their securities through derivatives depends on the degree to which price movements in the underlying index or instrument correlate with price movements in the relevant securities. In the case of poor correlation, the price of the securities a Fund is hedging may not move in the same amount, or even in the same direction as the hedging instrument. The investment managers will try to minimize this risk by investing in only those contracts whose behavior they expect to correlate with the behavior of the portfolio securities they are trying to hedge. However, if the investment managers’ prediction of interest and currency rates, market value, volatility or other economic factors is incorrect, a Fund may lose money, or may not make as much money as it expected.

Derivative prices can diverge from the prices of their underlying instruments, even if the characteristics of the underlying instruments are very similar to the derivative. Listed below are some of the factors that may cause such a divergence:

- Current and anticipated short-term interest rates, changes in volatility of the underlying instrument, and the time remaining until expiration of the contract;
- A difference between the derivatives and securities markets, including different levels of demand, how the instruments are traded, the imposition of daily price fluctuation limits or discontinued trading of an instrument; and

- Differences between the derivatives, such as different margin requirements, different liquidity of such markets and the participation of speculators in such markets.

Derivatives based upon a narrower index of securities, such as those of a particular industry group, may present greater risk than derivatives based on a broad market index. Since narrower indices are made up of a smaller number of securities, they are more susceptible to rapid and extreme price fluctuations because of changes in the value of those securities.

While currency futures and options values are expected to correlate with exchange rates, they may not reflect other factors that affect the value of the investments of the Funds. A currency hedge, for example, should protect a yen-denominated security from a decline in the yen, but will not protect the Funds against a price decline resulting from deterioration in the issuer's creditworthiness. Because the value of the Funds' foreign-denominated investments changes in response to many factors other than exchange rates, it may not be possible to match the amount of currency options and futures to the value of the Funds' investments precisely over time.

Lack of Liquidity. Before a futures contract or option is exercised or expires, a Fund can terminate it only by entering into a closing purchase or sale transaction. Moreover, a Fund may close out a futures contract only on the exchange the contract was initially traded. Although the Funds intend to purchase options and futures only where there appears to be an active market, there is no guarantee that such a liquid market will exist. If there is no secondary market for the contract, or the market is illiquid, a Fund may not be able to close out its position. In an illiquid market, a Fund may:

- Have to sell securities to meet its daily margin requirements at a time when it is disadvantageous to do so;
- Have to purchase or sell the instrument underlying the contract;
- Not be able to hedge its investments; and/or
- Not be able to realize profits or limit its losses.

Derivatives may become difficult to sell at a desired time and price under a variety of market conditions. For example:

- An exchange may suspend or limit trading in a particular derivative instrument, an entire category of derivatives or all derivatives, which sometimes occurs because of increased market volatility;
- Unusual or unforeseen circumstances may interrupt normal operations of an exchange;
- The facilities of the exchange may not be adequate to handle current trading volume;
- Equipment failures, government intervention, insolvency of a brokerage firm or clearing house or other occurrences may disrupt normal trading activity; or
- Investors may lose interest in a particular derivative or category of derivatives.

Management Risk. Successful use of derivatives by the Funds is subject to the ability of the investment managers to forecast stock market and interest rate trends. If the investment managers incorrectly predict stock market and interest rate trends, the Funds may lose money by investing in derivatives. For example, if a Fund were to write a call option based on the investment managers' expectation that the price of the underlying security would fall, but the price were to rise instead, the Fund could be required to sell the security upon exercise at a price below the current market price. Similarly, if a Fund were to write a put option based on the investment managers' expectation that the price of the underlying security would rise, but the price were to fall instead, the Fund could be required to purchase the security upon exercise at a price higher than the current market price.

Pricing Risk. At times, market conditions might make it hard to value some investments. For example, if a Fund has valued its securities too high, shareholders may end up paying too much for Fund shares when they buy into the Fund. If the Fund underestimates its price, shareholders may not receive the full market value for their Fund shares when they sell.

Margin. Because of the low margin deposits required upon the opening of a derivative position, such transactions involve an extremely high degree of leverage. Consequently, a relatively small price movement in a derivative may result in an immediate and substantial loss (as well as gain) to a Fund and it may lose more than it originally invested in the derivative.

If the price of a futures contract changes adversely, a Fund may have to sell securities at a time when it is disadvantageous to do so to meet its minimum daily margin requirement. A Fund may lose its margin deposits if a broker-dealer with whom it has an open futures contract or related option becomes insolvent or declares bankruptcy.

Volatility and Leverage. The Funds' use of derivatives may have a leveraging effect. Leverage generally magnifies the effect of any increase or decrease in value of an underlying asset and results in increased volatility, which means the Funds will have the potential for greater gains, as well as the potential for greater losses, than if the Funds do not use derivative instruments that have a leveraging effect. The prices of derivatives are volatile (i.e., they may change rapidly, substantially and unpredictably) and are influenced by a variety of factors, including:

- Actual and anticipated changes in interest rates;
- Fiscal and monetary policies; and
- National and international political events.

Most exchanges limit the amount by which the price of a derivative can change during a single trading day. Daily trading limits establish the maximum amount that the price of a derivative may vary from the settlement price of that derivative at the end of trading on the previous day. Once the price of a derivative reaches that value, the Funds may not trade that derivative at a price beyond that limit. The daily limit governs only price movements during a given day and does not limit potential gains or losses. Derivative prices have occasionally moved to the daily limit for several consecutive trading days, preventing prompt liquidation of the derivative.

Government Regulation. The regulation of derivatives markets in the U.S. is a rapidly changing area of law and is subject to modification by government and judicial action. In particular, the Dodd-Frank Wall Street Reform and Consumer Protection Act, signed into law in 2010, grants significant new authority to the SEC and the CFTC to impose comprehensive regulations on the over-the-counter and cleared derivatives markets. These regulations include, but are not limited to, mandatory clearing of certain derivatives and requirements relating to disclosure, margin and trade reporting. The new law and regulations may negatively impact the Funds by increasing transaction and/or regulatory compliance costs, limiting the availability of certain derivatives or otherwise adversely affecting the value or performance of the derivatives the Funds trade. In addition, in November 2019, the SEC published a proposed rulemaking related to the use of derivatives and certain other transactions by registered investment companies that would, if adopted, for the most part rescind the guidance of the SEC and its staff regarding asset segregation and cover transactions. Instead of complying with current guidance, the Funds would need to trade derivatives and other instruments that create future payment or delivery obligations (other than reverse repurchase agreements and similar financing transactions) subject to a value-at-risk ("VaR") leverage limit, certain other derivatives risk management program and testing requirements, and requirements related to board and SEC reporting. These new requirements would apply unless a Fund qualifies as a "limited derivatives user," as defined in the SEC's proposal. If a Fund trades reverse repurchase agreements or similar financing transactions, it would need to aggregate the amount of indebtedness associated with the reverse repurchase agreements or similar financing transactions with the aggregate amount of any other senior securities representing indebtedness when calculating the Fund's asset coverage ratio. Reverse repurchase agreements or similar financing transactions would not be included in the calculation of whether a Fund is a limited derivatives user, but if a Fund is subject to the VaR testing, reverse repurchase agreements and similar financing transactions would be included for purposes of such testing. Any new requirements, if adopted, may increase the cost of the Funds' investments and cost of doing business, which could adversely affect investors. Other potentially adverse regulatory obligations can develop suddenly and without notice.

Illiquid Investments. A Fund may not acquire an illiquid investment if, immediately after the acquisition, the Fund would have invested more than 15% of its net assets in “illiquid investments” that are assets. Illiquid investments are investments that a Fund reasonably expects cannot be sold or disposed of in current market conditions in seven calendar days or less without the sale or disposition significantly changing the market value of the investment. For each Fund, each portfolio investment must be classified at least monthly into one of four liquidity categories (highly liquid, moderately liquid, less liquid and illiquid), which are defined pursuant to Rule 22e-4 under the 1940 Act. Such classification is to be made using information obtained after reasonable inquiry and taking into account relevant market, trading and investment-specific considerations. Under the supervision of the Board, the investment managers determine the liquidity of a Fund’s investments. The investment managers may be assisted in classification determinations by one or more third-party service providers. Because of their illiquid nature, illiquid investments often must be priced at fair value as determined in good faith pursuant to procedures approved by the Board. Despite such good faith efforts to determine fair value prices, a Fund’s illiquid investments are subject to the risk that the investment’s fair value price may differ from the actual price which the Fund may ultimately realize upon its sale or disposition. Difficulty in selling illiquid investments may result in a loss or may be costly to a Fund.

Securities Lending. A Fund may lend portfolio securities to brokers, dealers and other financial organizations that meet capital and other credit requirements or other criteria established by the Board. These loans, if and when made, may not exceed 33 1/3% of the total asset value of the Fund (including the loan collateral). A Fund will not lend portfolio securities to the investment managers or their affiliates unless permissible under the 1940 Act and the rules and promulgations thereunder. Loans of portfolio securities will be fully collateralized by cash, letters of credit or U.S. government securities, and the collateral will be maintained in an amount equal to at least 100% of the current market value of the loaned securities by marking to market daily. Any gain or loss in the market price of the securities loaned that might occur during the term of the loan would be for the account of a Fund.

A Fund may pay a part of the interest earned from the investment of collateral, or other fee, to an unaffiliated third party for acting as the Fund’s securities lending agent, but will bear all of any losses from the investment of collateral.

By lending its securities, a Fund may increase its income by receiving payments from the borrower that reflect the amount of any interest or any dividends payable on the loaned securities as well as by either investing cash collateral received from the borrower in short-term instruments or obtaining a fee from the borrower when U.S. government securities or letters of credit are used as collateral. Investing cash collateral subjects a Fund to market risk. A Fund remains obligated to return all collateral to the borrower under the terms of its securities lending arrangements, even if the value of investments made with the collateral decline. Accordingly, if the value of a security in which the cash collateral has been invested declines, the loss would be borne by a Fund, and the Fund may be required to liquidate other investments in order to return collateral to the borrower at the end of the loan. A Fund will adhere to the following conditions whenever its portfolio securities are loaned: (i) the Fund must receive at least 100% cash collateral or equivalent securities of the type discussed above from the borrower; (ii) the borrower must increase such collateral whenever the market value of the securities rises above the level of such collateral; (iii) the Fund must be able to terminate the loan on demand; (iv) the Fund must receive reasonable interest on the loan, as well as any dividends, interest or other distributions on the loaned securities and any increase in market value; (v) the Fund may pay only reasonable fees in connection with the loan (which fees may include fees payable to the lending agent, the borrower, the Fund’s administrator and the custodian); and (vi) voting rights on the loaned securities may pass to the borrower, provided, however, that if a material event adversely affecting the investment occurs, the Fund must terminate the loan and regain the right to vote the securities. In such instances, the investment managers will vote the securities in accordance with their proxy voting policies and procedures. The Board has adopted procedures reasonably designed to ensure that the foregoing criteria will be met. Loan agreements involve certain risks in the event of default or insolvency of the borrower, including possible delays or restrictions upon a Fund’s ability to recover the loaned securities or dispose of the collateral for the loan, which could give rise to loss because of adverse market action, expenses and/or delays in connection with the disposition of the underlying securities.

Restricted Securities. The Funds may purchase restricted securities. Restricted securities are securities that may not be sold freely to the public absent registration under the Securities Act of 1933, as amended (the “1933 Act”) or an exemption from registration. This generally includes securities that are unregistered that can be sold to qualified institutional buyers in accordance with Rule 144A under the 1933 Act or securities that are exempt from registration under the 1933 Act, such as commercial paper. Institutional markets for restricted securities have developed as a result of the promulgation of Rule 144A under the 1933 Act, which provides a “safe harbor” from 1933 Act registration requirements for qualifying sales to institutional investors. When Rule 144A restricted securities present an attractive investment opportunity and meet other selection criteria, a Fund may make such investments whether or not such securities are classified as “illiquid” depending on the market that exists for the particular security.

Short Sales. The Funds may engage in short sales that are either “uncovered” or “against the box.” A short sale is “against the box” if at all times during which the short position is open, a Fund owns at least an equal amount of the securities or securities convertible into, or exchangeable without further consideration for, securities of the same issue as the securities that are sold short. A short sale against the box is a taxable transaction to a Fund with respect to the securities that are sold short.

Uncovered short sales are transactions under which the Funds sell a security they do not own. To complete such a transaction, a Fund must borrow the security to make delivery to the buyer. A Fund then is obligated to replace the security borrowed by purchasing the security at the market price at the time of the replacement. The price at such time may be more or less than the price at which the security was sold by the Fund. Until the security is replaced, the Fund is required to pay the lender amounts equal to any dividends or interest that accrue during the period of the loan. To borrow the security, the Fund also may be required to pay a premium, which would increase the cost of the security sold. The proceeds of the short sale will be retained by the broker, to the extent necessary to meet margin requirements, until the short position is closed out.

Until a Fund closes its short position or replaces the borrowed security, the Fund may: (a) segregate cash or liquid securities at such a level that the amount segregated plus the amount deposited with the broker as collateral will equal the current value of the security sold short; or (b) otherwise cover the Fund’s short position.

When-Issued, Delayed-Delivery and Forward-Delivery Transactions. A when-issued security is one whose terms are available and for which a market exists, but which has not been issued. In a forward-delivery transaction, a Fund contracts to purchase securities for a fixed price at a future date beyond customary settlement time. “Delayed-delivery” refers to securities transactions on the secondary market where settlement occurs in the future. In each of these transactions, the parties fix the payment obligation and the interest rate that they will receive on the securities at the time the parties enter the commitment; however, they do not pay money or deliver securities until a later date. Typically, no income accrues on securities a Fund has committed to purchase before the securities are delivered, although the Fund may earn income on securities it has in a segregated account to cover its position. A Fund will only enter into these types of transactions with the intention of actually acquiring the securities, but may sell them before the settlement date.

A Fund may use when-issued, delayed-delivery and forward-delivery transactions to secure what it considers an advantageous price and yield at the time of purchase. When a Fund engages in when-issued, delayed-delivery or forward-delivery transactions, it relies on the other party to consummate the sale. If the other party fails to complete the sale, the Fund may miss the opportunity to obtain the security at a favorable price or yield.

When purchasing a security on a when-issued, delayed-delivery, or forward-delivery basis, a Fund assumes the rights and risks of ownership of the security, including the risk of price and yield changes. At the time of settlement, the market value of the security may be more or less than the purchase price. The yield available in the market when the delivery takes place also may be higher than those obtained in the transaction itself. Because the Fund does not pay for the security until the delivery date, these risks are in addition to the risks associated with its other investments.

The Funds will segregate cash or liquid securities equal in value to commitments for the when-issued, delayed-delivery or forward-delivery transactions. The Funds will segregate additional liquid assets daily so that the value of such assets is equal to the amount of the commitments.

Quantitative Investing Risk (Large Cap Growth Fund, Large Cap Value Fund, Small Cap Fund and International Equity Fund). For each of the Funds, the Adviser may use quantitative models, algorithms, methods or other similar techniques or analytical tools (“quantitative tools”) in managing the Funds, including to generate investment ideas, identify investment opportunities or as a component of its overall portfolio construction processes and investment selection or screening criteria. Quantitative tools may also be used in connection with risk management and hedging processes. The value of securities selected using quantitative tools can react differently to issuer, political, market, and economic developments than the market as a whole or securities selected using only fundamental or other similar means of analysis. The factors used in quantitative tools and the weight placed on those factors may not be predictive of a security’s value or a successful weighting. In addition, factors that affect a security’s value can change over time and these changes may not be reflected in the quantitative tools. Thus, a Fund is subject to the risk that any quantitative tools used by the Adviser will not be successful in, among other things, forecasting movements in industries, sectors or companies and/or in determining the size, direction, and/or weighting of investment positions.

There is no guarantee that quantitative tools, and the investments selected based on such tools, will produce the desired results or enable a Fund to achieve its investment objective. A Fund may be adversely affected by imperfections, errors or limitations in construction and implementation (for example, limitations in a model, proprietary or third-party data imprecision or unavailability, software or other technology malfunctions, or programming inaccuracies) and the Adviser’s ability to monitor and timely adjust the metrics or update the data or features underlying the quantitative tools, including accounting for changes in the overall market environment, and identify and address omissions of relevant data or assumptions. A quantitative tool may not perform as expected and a quantitative tool that has been formulated on the basis of past market data or trends may not be predictive of future price movements. A Fund may also be adversely affected by the Adviser’s ability to make accurate qualitative judgments regarding a quantitative tool’s output or operational complications relating to a quantitative tool.

Cyber Security and Operational Risk. As with any entity that conducts business through electronic means in the modern marketplace, the Funds, and their service providers, may be susceptible to operational and information security risks resulting from cyber incidents. Cyber incidents can result from unintentional events (such as an inadvertent release of confidential information) or deliberate attacks by insiders or third parties, including cyber criminals, competitors, nation-states and “hacktivists,” and can be perpetrated by a variety of complex means, including the use of stolen access credentials, malware or other computer viruses, ransomware, phishing, structured query language injection attacks, and distributed denial of service attacks, among other means. Cyber incidents may result in actual or potential adverse consequences for critical information and communications technology, systems and networks that are vital to the Funds’ or their service providers’ operations or otherwise impair Fund or service provider operations. For example, a cyber incident may cause operational disruptions and failures impacting information systems or information that a system processes, stores, or transmits, such as by theft, damage or destruction, or corruption or modification of and denial of access to data maintained online or digitally, denial of service on websites rendering the websites unavailable to intended users or not accessible for such users in a timely manner, and the unauthorized release or other exploitation of confidential information.

Cyber incidents could adversely impact the Funds and their shareholders, potentially resulting in, among other things, financial losses or the inability of Fund shareholders to transact business. For instance, cyber incidents may interfere with the processing of shareholder transactions or other operational functionality, impact a Fund’s ability to calculate its net asset value or other data, cause the release of private shareholder information (i.e., identity theft or other privacy breaches) or confidential Fund information or otherwise compromise the security and reliability of information, impede trading, cause reputational damage, and subject the Funds to regulatory fines, penalties or financial losses, reimbursement or other compensation or remediation costs, and litigation expenses, which may be substantial. The Funds may also incur additional costs for cyber security risk management purposes designed to mitigate or prevent the risk of cyber incidents. Such costs may be ongoing because threats of cyber incidents are constantly evolving as cyber attackers become more sophisticated and their techniques become more complex.

Although the Funds and their service providers may have established business continuity plans and systems reasonably designed to protect from and/or defend against the risks or adverse consequences associated with cyber incidents there are inherent limitations in these plans and systems, including that certain risks may not yet be identified, in large part because different or unknown threats may emerge in the future and the threats continue to rapidly evolve and increase in sophistication. As a result, it is not possible to anticipate and prevent every cyber incident and attempts to mitigate the occurrence or impact of a cyber incident may be unsuccessful. The nature, extent, and potential magnitude of the adverse consequences of a cyber incident cannot be predicted accurately but may result in significant risks and costs to the Funds and their shareholders. The issuers of securities in which the Funds may invest are also subject to the ongoing risks and threats associated with cyber incidents. These incidents could result in adverse consequences for such issuers and may cause the Funds’ investments in such companies to lose value. There can be no assurance that the Funds, the Funds’ service providers, or the issuers of the securities in which the Funds invest will not suffer losses relating to cyber incidents or other information security breaches in the future.

The Funds’ and their service providers are also subject to the risks associated with technological and operational disruptions or failures arising from, for example, processing errors and human errors, inadequate or failed internal or external processes, failures in systems and technology, errors in algorithms used with respect to the Funds, changes in personnel, and errors caused by third parties or trading counterparties. Although the Funds attempt to minimize such failures through controls and oversight, it is not possible to identify all of the operational risks that may affect a Fund or to develop processes and controls that completely eliminate or mitigate the occurrence of such failures or other disruptions in service.

Cyber incidents and operational errors or failures or other technological issues may adversely affect a Fund's ability to calculate its net asset value correctly, in a timely manner or process trades or Fund or shareholder transactions, including over a potentially extended period. The Funds do not control the cyber security or other operational defense plans or systems of its service providers, intermediaries, companies in which it invests or other third-parties. The value of an investment in Fund shares may be adversely affected by the occurrence of the cyber incidents and operational errors or failures or technological issues summarized above or other similar events and the Funds and their shareholders may bear costs tied to these risks.

LIBOR Replacement Risk. The London Inter-Bank Offered Rate ("LIBOR"), which is used extensively in the U.S. and globally as a benchmark or reference rate for various commercial and financial contracts, is expected to be discontinued. The elimination of LIBOR may adversely affect the interest rates on, and value of, certain Fund investments for which the value is tied to LIBOR. Such investments may include bank loans, derivatives, floating rate securities, and other assets or liabilities tied to LIBOR. On July 27, 2017, the U.K. Financial Conduct Authority announced that it intends to stop compelling or inducing banks to submit LIBOR rates after 2021. As a result, it is anticipated that LIBOR will be discontinued or will no longer be sufficiently robust to be representative of its underlying market. Actions by regulators have resulted in the establishment of alternative reference rates to LIBOR in most major currencies. The U.S. Federal Reserve, based on the recommendations of the New York Federal Reserve's Alternative Reference Rate Committee (comprised of major derivative market participants and their regulators), has begun publishing a Secured Overnight Financing Rate ("SOFR"), which is intended to replace U.S. dollar LIBOR. Alternative reference rates for other currencies have also been announced or have already begun publication. Markets are slowly developing in response to these new rates. Questions around liquidity impacted by these rates, and how to appropriately adjust these rates at the time of transition, remain a concern for the Funds. The effect of any changes to, or discontinuation of, LIBOR on the Funds will vary depending on, among other things, (1) existing fallback or termination provisions in individual contracts and (2) whether, how, and when industry participants develop and adopt new reference rates and fallbacks for both legacy and new products and instruments. The expected discontinuation of LIBOR could have a significant impact on the financial markets in general and may also present heightened risk to market participants, including public companies, investment advisers, other investment companies, and broker-dealers. The risks associated with this discontinuation and transition will be exacerbated if the work necessary to effect an orderly transition to an alternative reference rate is not completed in a timely manner. Accordingly, it is difficult to predict the full impact of the transition away from LIBOR on the Funds and their investments until new reference rates and fallbacks for both legacy and new products, instruments and contracts are commercially accepted.

INVESTMENT LIMITATIONS

Fundamental Policies

The following investment limitations are fundamental, which means that the Funds cannot change them without approval by the vote of a majority of the outstanding shares of the Funds. The phrase "majority of the outstanding shares" means the vote of (i) 67% or more of a Fund's shares present at a meeting, if more than 50% of the outstanding shares of the Fund are present or represented by proxy, or (ii) more than 50% of a Fund's outstanding shares, whichever is less.

Each Fund may not:

1. Purchase securities of an issuer that would cause the Fund to fail to satisfy the diversification requirement for a diversified management company under the 1940 Act, the rules or regulations thereunder or any exemption therefrom, as such statute, rules or regulations may be amended or interpreted from time to time.
2. Concentrate investments in a particular industry or group of industries, as concentration is defined under the 1940 Act, the rules and regulations thereunder or any exemption therefrom, as such statute, rules or regulations may be amended or interpreted from time to time; provided, however, that the U.S. All Cap Index Fund will concentrate its investments in a particular industry or group of industries to approximately the same extent that the index whose performance the Fund seeks to track is so concentrated.
3. Borrow money or issue senior securities (as defined under the 1940 Act), except to the extent permitted under the 1940 Act, the rules and regulations thereunder or any exemption therefrom, as such statute, rules or regulations may be amended or interpreted from time to time.
4. Make loans, except to the extent permitted under the 1940 Act, the rules and regulations thereunder or any exemption therefrom, as such statute, rules or regulations may be amended or interpreted from time to time.
5. Purchase or sell commodities or real estate, except to the extent permitted under the 1940 Act, the rules and regulations thereunder or any exemption therefrom, as such statute, rules or regulations may be amended or interpreted from time to time.
6. Underwrite securities issued by other persons, except to the extent that it may be deemed to be an underwriter in connection with the disposition of portfolio securities, or to the extent otherwise permitted under the 1940 Act, the rules and regulations thereunder or any exemption therefrom, as such statute, rules or regulations may be amended or interpreted from time to time.

Non-Fundamental Policies

Each Fund's investment objective as well as the following investment limitations of each Fund are non-fundamental and may be changed by the Board without shareholder approval.

Each Fund may not:

1. Purchase or sell real estate, real estate limited partnership interests, physical commodities or commodities contracts based on physical commodities, except that a Fund may (i) purchase marketable securities issued by companies which own or invest in real estate (including REITs), physical commodities or commodities contracts based on physical commodities, and (ii) purchase securities or instruments that are secured by real estate or interests therein, and hold and dispose of real estate or interests therein acquired through the exercise of its rights as a holder of such securities or instruments.

The following descriptions of certain provisions of the 1940 Act may assist investors in understanding the above policies and restrictions:

Diversification. Under the 1940 Act and the rules, regulations and interpretations thereunder, a "diversified company," as to 75% of its total assets, may not purchase securities of any issuer (other than obligations of, or guaranteed by, the U.S. government or its agencies, or instrumentalities or securities of other investment companies) if, as a result, more than 5% of its total assets would be invested in the securities of such issuer, or more than 10% of the issuer's voting securities would be held by the fund.

Concentration. The 1940 Act requires that every investment company have a fundamental investment policy regarding concentration. The SEC has defined concentration as investing 25% or more of an investment company's total assets in any particular industry or group of industries, with certain exceptions. For purposes of a Fund's concentration policy, the Fund may classify and re-classify companies in a particular industry and define and re-define industries in any reasonable manner, consistent with SEC and SEC staff guidance.

Borrowing. The 1940 Act presently allows an investment company to borrow from any bank in an amount up to 33 1/3% of its total assets (including the amount borrowed) and to borrow for temporary purposes in an amount not exceeding 5% of the value of its total assets.

Lending. Under the 1940 Act, an investment company may only make loans if expressly permitted by its investment policies.

Senior Securities. Senior securities may include any obligation or instrument issued by a fund evidencing indebtedness. The 1940 Act generally prohibits funds from issuing senior securities, although it does not treat certain transactions as senior securities, such as certain derivatives, short sales, reverse repurchase agreements, firm commitment agreements and standby commitments, with appropriate earmarking or segregation of assets to cover such obligation.

Real Estate and Commodities. The 1940 Act does not directly restrict an investment company's ability to invest in real estate or commodities, but does require that every investment company have a fundamental investment policy governing such investments.

Underwriting. Under the 1940 Act, underwriting securities involves an investment company purchasing securities directly from an issuer for the purpose of selling (distributing) them or participating in any such activity either directly or indirectly. Under the 1940 Act, a diversified fund may not make any commitment as underwriter, if immediately thereafter the amount of its outstanding underwriting commitments, plus the value of its investments in securities of issuers (other than investment companies) of which it owns more than 10% of the outstanding voting securities, exceeds 25% of the value of its total assets.

Except with respect to the Funds' policies concerning borrowing, if a percentage restriction is adhered to at the time of an investment, a later increase or decrease in percentage resulting from changes in values or assets will not constitute a violation of such restriction. With respect to the limitation on borrowing, in the event that a subsequent change in net assets or other circumstances causes a Fund to exceed its limitation, the Fund will take steps to bring the aggregate amount of borrowing back within the limitation within three days thereafter (not including Sundays and holidays).

THE ADVISER AND SUB-ADVISERS

Investment Adviser

General. Knights of Columbus Asset Advisors LLC, a Delaware limited liability company, organized in 2014, serves as the investment adviser to the Funds and is registered with the SEC as an investment adviser. The Adviser's principal place of business is located at One Columbus Plaza, New Haven, Connecticut 06510. The Adviser is a wholly-owned subsidiary of Knights of Columbus, a fraternal benefit society organized under the laws of the State of Connecticut. As of December 31, 2019, the Adviser had \$26.22 billion in assets under management.

The Adviser makes investment decisions for the Funds and continuously reviews, supervises and administers each Fund’s investment program. In addition, the Adviser oversees L2 Asset Management, LLC (“L2 Asset Management”) and Ranger Global Real Estate Advisors, LLC (“Ranger,” and, together with L2 Asset Management, the “Sub-Advisers”) to ensure each Sub-Adviser’s compliance with the investment policies and guidelines of the Fund(s) managed by the Sub-Adviser, and monitors each Sub-Adviser’s adherence to its investment styles. The Board supervises the Adviser and the Sub-Advisers and establishes policies that the Adviser and the Sub-Advisers must follow in their management activities.

Advisory Agreement. The Trust and the Adviser have entered into an investment advisory agreement dated February 26, 2015, as amended (the “Advisory Agreement”), with respect to the Funds. Under the Advisory Agreement, the Adviser serves as the investment adviser and makes investment decisions for each Fund and continuously reviews, supervises and administers the investment program of each Fund, subject to the supervision of, and policies established by, the Board.

After the initial two-year term, the continuance of the Advisory Agreement must be specifically approved at least annually: (i) by the vote of the Trustees or by a vote of the majority of the outstanding voting securities of each Fund; and (ii) by the vote of a majority of the Trustees who are not parties to the Advisory Agreement or “interested persons” of any party thereto, cast in person at a meeting called for the purpose of voting on such approval. The Advisory Agreement will terminate automatically in the event of its assignment, and is terminable at any time without penalty by the Trustees or, with respect to a Fund, by a majority of the outstanding voting securities of that Fund, or, by the Adviser, on not less than 30 days’ nor more than 60 days’ written notice to the Trust. As used in the Advisory Agreement, the terms “majority of the outstanding voting securities,” “interested persons” and “assignment” have the same meaning as such terms in the 1940 Act.

Advisory Fees Paid to the Adviser. For its services under the Advisory Agreement, the Adviser is entitled to a fee, which is calculated daily and paid monthly, at the following annual rates based on the average daily net assets of each Fund:

Fund	Advisory Fee Rate
Core Bond Fund	0.40%
Limited Duration Fund	0.40%
Large Cap Growth Fund	0.60%
Large Cap Value Fund	0.60%
Small Cap Fund	0.725%
International Equity Fund	0.90%
Long/Short Equity Fund	1.25%
U.S. All Cap Index Fund	0.20%
Global Real Estate Fund	0.85%

The Adviser pays the Sub-Advisers out of the advisory fees it receives from the Long/Short Equity Fund, the U.S. All Cap Index Fund and the Global Real Estate Fund.

The Adviser has contractually agreed to reduce its fees and/or reimburse expenses to the extent necessary to keep total annual Fund operating expenses (excluding interest, taxes, brokerage commissions and other costs and expenses relating to the securities that are purchased and sold by the Fund, acquired fund fees and expenses, other expenditures which are capitalized in accordance with generally accepted accounting principles, dividend and interest expenses on securities sold short, non-routine expenses, and any class-specific expenses (including distribution and/or service (12b-1) fees and shareholder servicing fees) (collectively, “excluded expenses”)) for I Shares, Class S Shares and Investor Shares from exceeding certain levels as set forth below until February 28, 2021 (each, a “contractual expense limit”). This agreement may be terminated by: (i) the Board, for any reason at any time; or (ii) the Adviser, upon ninety (90) days’ prior written notice to the Trust, effective as of the close of business on February 28, 2021.

Fund	Contractual Expense Limits
Core Bond Fund	0.50%
Limited Duration Fund	0.50%
Large Cap Growth Fund	0.90%
Large Cap Value Fund	0.90%
Small Cap Fund	1.05%
International Equity Fund	1.10%
Long/Short Equity Fund	1.50%
U.S. All Cap Index Fund	0.25%
Global Real Estate Fund	1.00%

Prior to February 28, 2019, class-specific expenses (including distribution and/or service (12b-1) fees and shareholder servicing fees) were not excluded expenses, and the contractual expense limits for the Funds were as follows:

Fund	Contractual Expense Limit		
	I Shares	Class S Shares	Investor Shares
Core Bond Fund	0.50%	0.70%	0.95%
Limited Duration Fund	0.50%	0.70%	0.95%
Large Cap Growth Fund	0.90%	1.10%	1.35%
Large Cap Value Fund	0.90%	1.10%	1.35%
Small Cap Fund	1.05%	1.25%	1.50%
International Equity Fund	1.10%	1.30%	1.55%
Long/Short Equity Fund	N/A ¹	N/A ¹	N/A ¹
U.S. All Cap Index Fund	N/A ¹	N/A ¹	N/A ¹
Global Real Estate Fund	N/A ¹	N/A ¹	N/A ¹

¹ Not in operation during the period.

In addition, the Adviser may receive from a Fund the difference between the total annual Fund operating expenses (not including excluded expenses) and the contractual expense limit to recoup all or a portion of its prior fee waivers or expense reimbursements made during the rolling three-year period preceding the recoupment if at any point total annual Fund operating expenses (not including excluded expenses) are below the contractual expense limit (i) at the time of the fee waiver and/or expense reimbursement and (ii) at the time of the recoupment.

For the fiscal years ended October 31, 2017, 2018 and 2019, the Funds paid the Adviser the following advisory fees:

Fund	Contractual Advisory Fees			Fees Waived by the Adviser ¹			Total Fees Paid to the Adviser (After Waivers)		
	2017	2018	2019	2017	2018	2019	2017	2018	2019
Core Bond Fund	\$221,600	\$305,699	\$343,789	\$221,600	\$280,473	\$296,098	\$0	\$25,226	\$47,691
Limited Duration Fund	\$260,595	\$390,003	\$387,127	\$260,595	\$327,100	\$311,945	\$0	\$62,903	\$75,182
Large Cap Growth Fund	\$214,440	\$352,483	\$390,313	\$158,206	\$119,348	\$99,769	\$56,234	\$233,135	\$290,544
Large Cap Value Fund	\$217,716	\$336,568	\$380,582	\$156,395	\$117,036	\$100,569	\$61,321	\$219,532	\$280,013

International Equity Fund	\$464,514	\$632,333	\$673,325	\$236,440	\$200,870	\$191,742	\$228,074	\$431,463	\$481,583
Long/Short Equity Fund	N/A ²	N/A ²	N/A ²	N/A ²	N/A ²	N/A ²	N/A ²	N/A ²	N/A ²
U.S. All Cap Index Fund	N/A ²	N/A ²	N/A ²	N/A ²	N/A ²	N/A ²	N/A ²	N/A ²	N/A ²
Global Real Estate Fund	N/A ²	N/A ²	\$33,655 ³	N/A ²	N/A ²	\$33,655 ³	N/A ²	N/A ²	\$0 ³

1 For the fiscal year ended October 31, 2017, the Adviser additionally reimbursed fees of \$76,771 for the Core Bond Fund and \$70,170 for the Limited Duration Fund to maintain the stated expense caps under its contractual expense limitation agreement with the Funds. For the fiscal year ended October 31, 2019, the Adviser additionally reimbursed fees of \$4,340 for the Global Real Estate Fund to maintain the stated expense cap under its contractual expense limitation agreement with the Fund.

2 Not in operation during the period.

3 Reflects the period from September 30, 2019 (commencement of Fund operations) to October 31, 2019.

Investment Sub-Advisers

L2 Asset Management, LLC. L2 Asset Management, LLC, a Delaware limited liability company, serves as the investment sub-adviser to the Long/Short Equity Fund and U.S. All Cap Index Fund. L2 Asset Management is 100% employee-owned. L2 Asset Management, LLC's principal place of business is located at 66 Glezen Lane, Wayland, Massachusetts 01778. As of December 31, 2019, L2 Asset Management had approximately \$156.76 million in assets under management.

Ranger Global Real Estate Advisors, LLC. Ranger Global Real Estate Advisors, LLC, a Delaware limited liability company, serves as the investment sub-adviser to the Global Real Estate Fund. Ranger is employee controlled. Knights of Columbus is a minority shareholder of Ranger. Ranger's principal place of business is located at 415 Madison Avenue, 14th Floor, New York, New York 10017. As of December 31, 2019, Ranger had approximately \$1.12 billion in assets under management.

Sub-Advisory Agreements. The provision of investment advisory services by the Sub-Advisers is governed by individual investment sub-advisory agreements between the relevant Sub-Adviser and the Adviser (“the Sub-Advisory Agreements”). Under each Sub-Advisory Agreement, each Sub-Adviser is responsible for the day-to-day management of the Fund(s) managed by the Sub-Adviser, makes investment decisions for such Fund(s) and administers the investment program of such Fund(s), subject to the supervision of, and policies established by, the Adviser and the Board.

After the initial two-year term, the continuance of each Sub-Advisory Agreement must be specifically approved at least annually: (i) by the vote of the Trustees or by a vote of the majority of the outstanding voting securities of the Fund and (ii) by the vote of a majority of the Trustees who are not parties to the Sub-Advisory Agreement or “interested persons” of any party thereto, cast in person at a meeting called for the purpose of voting on such approval. A Sub-Advisory Agreement will terminate automatically in the event of its assignment or in the event of the termination of the Advisory Agreement, and is terminable at any time without penalty by the Board.

Knights of Columbus’s ownership interest in Ranger raises a potential conflict of interest with respect to the Adviser’s decisions to recommend the hiring and retention of Ranger. These conflicts are mitigated, however, because the Adviser subjects Ranger to at least the same performance and oversight standards as it would apply to any other sub-adviser, and the Board subjects its reviews and approvals of Ranger’s Sub-Advisory Agreement to at least the same standards as it would apply to any other sub-advisory agreement.

Sub-Advisory Fees. For the services provided pursuant to the Sub-Advisory Agreements, each Sub-Adviser receives an annual fee from the Adviser at the following annual rates based on the average daily net assets of the Fund(s) managed by the Sub-Adviser:

Fund	Sub-Advisory Fee Rate
<u>L2 Asset Management, LLC</u>	
Long/Short Equity Fund	0.25%
U.S. All Cap Index Fund	0.10%
<u>Ranger Global Real Estate Advisors, LLC</u>	
Global Real Estate Fund	0.60%

For the fiscal year ended October 31, 2019, the Adviser paid the Sub-Advisers the following sub-advisory fees:

Fund	Contractual Fees Paid
	2019
<u>L2 Asset Management, LLC</u>	
Long/Short Equity Fund	N/A ¹
U.S. All Cap Index Fund	N/A ¹
<u>Ranger Global Real Estate Advisors, LLC</u>	
Global Real Estate Fund	\$23,756 ²

1 Not in operation during the period.

2 Reflects the period from September 30, 2019 (commencement of Fund operations) to October 31, 2019.

Prior to October 1, 2019, Boston Advisors, LLC served as the investment sub-adviser to the Large Cap Growth Fund, the Large Cap Value Fund, the Small Cap Fund and the International Equity Fund. For the services provided to the Large Cap Growth Fund, the Large Cap Value Fund, the Small Cap Fund and the International Equity Fund, Boston Advisors, LLC received an annual fee from the Adviser at the following annual rates based on the average daily net assets of each Fund:

Fund	Sub-Advisory Fee Rate
Large Cap Growth Fund	0.35%
Large Cap Value Fund	0.35%
Small Cap Fund	0.425%
International Equity Fund	0.50%

For the fiscal years ended October 31, 2017, 2018 and 2019, the Adviser paid Boston Advisors, LLC the following sub-advisory fees:

Fund	Contractual Fees Paid		
	2017	2018	2019
Large Cap Growth Fund	\$125,181	\$204,510	\$206,744
Large Cap Value Fund	\$127,090	\$195,307	\$201,056
Small Cap Fund	\$285,472	\$354,174	\$324,846
International Equity Fund	\$258,273	\$349,568	\$340,444

THE PORTFOLIO MANAGERS

This section includes information about the Funds' portfolio managers, including information about other accounts they manage, the dollar range of Fund shares they own and how they are compensated.

Compensation.

Knights of Columbus

Knights of Columbus Asset Advisors' portfolio managers are compensated with a base salary and discretionary bonus based on the overall performance of the firm. The bonus structure is formula driven and is not tied strictly to the investment returns generated by any particular fund or portfolio.

L2 Asset Management

L2 Asset Management's portfolio managers are the principal owners of L2 Asset Management. The portfolio managers' compensation is based on their share, as owners, of L2 Asset Management's net income from all sources, including management fees that L2 Asset Management receives from the Long/Short Equity Fund and U.S. All Cap Index Fund.

Ranger

Andrew J. Duffy, CFA receives compensation for his services as portfolio manager in the form of a salary paid by Ranger plus a discretionary annual bonus and equity participation in the net income of Ranger. The discretionary annual bonus is based on Ranger's overall performance and the portfolio manager's contribution to Ranger's success.

Fund Shares Owned by the Portfolio Managers. The following table shows the dollar amount range of each portfolio manager's "beneficial ownership" of shares of the Funds as of the end of the most recently completed fiscal year. Dollar amount ranges disclosed are established by the SEC. "Beneficial ownership" is determined in accordance with Rule 16a-1(a)(2) under the Securities Exchange Act of 1934, as amended (the "1934 Act").

2 This account is subject to a performance-based advisory fee.

Conflicts of Interest. The following are the areas in which potential conflicts of interest may exist as a result of the Adviser's and the Sub-Advisers' management of multiple accounts, including the Funds: the allocation of investment opportunities among accounts, the personal trading activities of the members of the portfolio management teams, and the use of soft dollars.

The Adviser and the Sub-Advisers manage multiple accounts for institutional clients, each of which may have distinct investment objectives and strategies, some similar to the Funds and others different. At times the Adviser or a Sub-Adviser may determine that an investment opportunity may be appropriate for only some accounts or may decide that certain of the accounts should take differing positions with respect to a particular security. In these cases, the Adviser or a Sub-Adviser may place separate transactions for one or more accounts, which may affect the market price of the security or the execution of the transaction, or both, to the benefit of one account over another, including a Fund. The Adviser or a Sub-Adviser may receive a greater advisory fee for managing another account than received for advising a Fund which may create an incentive to allocate more favorable transactions to such account. The Adviser or a Sub-Adviser may buy or sell for themselves, or other accounts, investments that they buy or sell on behalf of the Funds. Consistent with their duty to seek best execution, the Adviser and the Sub-Advisers select the brokers with whom to execute transactions on behalf of the Funds. The Adviser and the Sub-Advisers utilize soft dollars whereby they may purchase research and services using commission dollars generated by the Funds. Often, the research and services purchased using the Funds' commissions benefit other accounts of the Adviser and the Sub-Advisers. Soft dollars may create an actual or perceived conflict of interest because the Adviser or a Sub-Adviser may have an incentive to initiate more transactions to generate soft dollars or may select only those brokers willing to offer soft dollars when placing transactions for the Funds.

The Adviser and the Sub-Advisers have adopted trade aggregation policies, as well as other compliance policies and procedures, which require that all clients be treated equitably. The trade aggregation policy and compliance policies and procedures are designed to detect the types of conflicts of interest described above. However, there is no guarantee that such policies and procedures will always detect or prevent every situation in which an actual or perceived conflict of interest may arise.

THE ADMINISTRATOR

General. SEI Investments Global Funds Services (the “Administrator”), a Delaware statutory trust, has its principal business offices at One Freedom Valley Drive, Oaks, Pennsylvania 19456. SEI Investments Management Corporation (“SIMC”), a wholly-owned subsidiary of SEI Investments Company (“SEI Investments”), is the owner of all beneficial interest in the Administrator. SEI Investments and its subsidiaries and affiliates, including the Administrator, are leading providers of funds evaluation services, trust accounting systems, and brokerage and information services to financial institutions, institutional investors, and money managers. The Administrator and its affiliates also serve as administrator or sub-administrator to other mutual funds.

Administration Agreement with the Trust. The Trust and the Administrator have entered into an administration agreement, dated February 12, 2014, as amended (the “Administration Agreement”). Under the Administration Agreement, the Administrator provides the Trust with administrative services, including regulatory reporting and all necessary office space, equipment, personnel and facilities.

The Administration Agreement provides that the Administrator shall not be liable for any error of judgment or mistake of law or for any loss suffered by the Trust in connection with the matters to which the Administration Agreement relates, except a loss resulting from willful misfeasance, bad faith or gross negligence on the part of the Administrator in the performance of its duties or from reckless disregard by it of its duties and obligations thereunder.

Administration Fees Paid to the Administrator. For its services under the Administration Agreement, the Administrator is paid a fee, which varies based on the average daily net assets of the Funds, subject to certain minimums. For the fiscal years ended October 31, 2017, 2018 and 2019, the Funds paid the following amounts for these services:

Fund	Administration Fees Paid		
	2017	2018	2019
Core Bond Fund	\$167,306	\$153,597	\$152,378
Limited Duration Fund	\$196,831	\$195,979	\$171,886
Large Cap Growth Fund	\$107,819	\$117,498	\$115,125
Large Cap Value Fund	\$109,475	\$112,469	\$112,255
Small Cap Fund	\$202,968	\$168,436	\$148,575

Global Real Estate Fund	N/A ¹	N/A ¹	\$5,965 ²

1 Not in operation during the period.

2 Reflects the period from September 30, 2019 (commencement of Fund operations) to October 31, 2019.

THE DISTRIBUTOR

The Trust and SEI Investments Distribution Co. (the “Distributor”), a wholly-owned subsidiary of SEI Investments, and an affiliate of the Administrator, are parties to a distribution agreement dated February 12, 2014, as amended (the “Distribution Agreement”), whereby the Distributor acts as principal underwriter for the Trust’s shares. The principal business address of the Distributor is One Freedom Valley Drive, Oaks, Pennsylvania 19456.

The continuance of the Distribution Agreement must be specifically approved at least annually (i) by the vote of the Trustees or by a vote of the majority of the outstanding voting securities of the Trust and (ii) by the vote of a majority of the Trustees who are not “interested persons” of the Trust and have no direct or indirect financial interest in the operations of the Distribution Agreement or any related agreement, cast in person at a meeting called for the purpose of voting on such approval. The Distribution Agreement will terminate automatically in the event of its assignment (as such term is defined in the 1940 Act), and is terminable at any time without penalty by the Board or by a majority of the outstanding voting securities of the Trust, or by the Distributor, upon not less than 60 days’ written notice to the other party.

PAYMENTS TO FINANCIAL INTERMEDIARIES

Distribution Plan. The Trust has adopted a Distribution Plan with respect to the Investor Shares (the “Plan”) in accordance with the provisions of Rule 12b-1 under the 1940 Act, which regulates circumstances under which an investment company may directly or indirectly bear expenses relating to the distribution of its shares. Continuance of the Plan must be approved annually by a majority of the Trustees and by a majority of the Trustees who are not interested persons (as defined in the 1940 Act) of the Trust and have no direct or indirect financial interest in the Plan or in any agreements related to the Plan (“Qualified Trustees”). The Plan requires that quarterly written reports of amounts spent under the Plan and the purposes of such expenditures be furnished to and reviewed by the Trustees. The Plan may not be amended to increase materially the amount that may be spent thereunder without approval by a majority of the outstanding shares of the affected Fund(s). All material amendments of the Plan will require approval by a majority of the Trustees and of the Qualified Trustees.

The Plan provides a method of paying for distribution and shareholder services, which may help the Fund(s) grow or maintain asset levels to provide operational efficiencies and economies of scale, provided by the Distributor or other financial intermediaries that enter into agreements with the Distributor. The Fund(s) may make payments to financial intermediaries, such as banks, savings and loan associations, insurance companies, investment counselors, broker-dealers, mutual fund “supermarkets” and the Distributor’s affiliates and subsidiaries, as compensation for services, reimbursement of expenses incurred in connection with distribution assistance or provision of shareholder services. The Distributor may, at its discretion, retain a portion of such payments to compensate itself for distribution services and distribution related expenses such as the costs of preparation, printing, mailing or otherwise disseminating sales literature, advertising, and prospectuses (other than those furnished to current shareholders of a Fund), promotional and incentive programs, and such other marketing expenses that the Distributor may incur.

Under the Plan, the Distributor or financial intermediaries may receive up to 0.25% of the average daily net assets of the Investor Shares as compensation for distribution and shareholder services. The Plan is characterized as a compensation plan since the distribution fee will be paid to the Distributor without regard to the distribution or shareholder service expenses incurred by the Distributor or the amount of payments made to financial intermediaries. The Trust intends to operate the Plan in accordance with its terms and with Financial Industry Regulatory Authority (“FINRA”) rules concerning sales charges.

Payments under the Distribution Plan. For the fiscal years ended October 31, 2017, 2018 and 2019, the Funds paid the Distributor the following fees pursuant to the Plan:

Fund	12b-1 Fees Paid			12b-1 Fees Retained by the Distributor		
	2017	2018	2019	2017	2018	2019
Core Bond Fund	\$46	\$69	\$345	\$46	\$69	\$112

¹ Not in operation during the period.

² Reflects the period from September 30, 2019 (commencement of Fund operations) to October 31, 2019.

Shareholder Servicing Plan. The Funds have adopted a shareholder servicing plan under which a shareholder servicing fee of up to 0.20% of average daily net assets of Class S Shares and Investor Shares of the Funds will be paid to financial intermediaries. Under the plan, financial intermediaries may perform, or may compensate other financial intermediaries for performing, certain shareholder and/or administrative services or similar non-distribution services, including: (i) maintaining shareholder accounts; (ii) arranging for bank wires; (iii) responding to shareholder inquiries relating to the services performed by the financial intermediaries; (iv) responding to inquiries from shareholders concerning their investment in the Funds; (v) assisting shareholders in changing dividend options, account designations and addresses; (vi) providing information periodically to shareholders showing their position in the Funds; (vii) forwarding shareholder communications from the Funds such as proxies, shareholder reports, annual reports, and dividend and capital gain distribution and tax notices to shareholders; (viii) processing purchase, exchange and redemption requests from shareholders and placing orders with the Funds or their service providers; (ix) providing sub-accounting services; (x) processing dividend and capital gain payments from the Funds on behalf of shareholders; (xi) preparing tax reports; and (xii) providing such other similar non-distribution services as the Funds may reasonably request to the extent that the financial intermediary is permitted to do so under applicable laws or regulations.

Payments by the Adviser. The Adviser and/or its affiliates, in their discretion, may make payments from their own resources and not from Fund assets to affiliated or unaffiliated brokers, dealers, banks (including bank trust departments), trust companies, registered investment advisers, financial planners, retirement plan administrators, insurance companies, and any other institution having a service, administration, or any similar arrangement with the Funds, their service providers or their respective affiliates, as incentives to help market and promote the Funds and/or in recognition of their distribution, marketing, administrative services, and/or processing support.

These additional payments may be made to financial intermediaries that sell Fund shares or provide services to the Funds, the Distributor or shareholders of the Funds through the financial intermediary's retail distribution channel and/or fund supermarkets. Payments may also be made through the financial intermediary's retirement, qualified tuition, fee-based advisory, wrap fee bank trust, or insurance (e.g., individual or group annuity) programs. These payments may include, but are not limited to, placing the Funds in a financial intermediary's retail distribution channel or on a preferred or recommended fund list; providing business or shareholder financial planning assistance; educating financial intermediary personnel about the Funds; providing access to sales and management representatives of the financial intermediary; promoting sales of Fund shares; providing marketing and educational support; maintaining share balances and/or for sub-accounting, administrative or shareholder transaction processing services. A financial intermediary may perform the services itself or may arrange with a third party to perform the services.

The Adviser and/or its affiliates may also make payments from their own resources to financial intermediaries for costs associated with the purchase of products or services used in connection with sales and marketing, participation in and/or presentation at conferences or seminars, sales or training programs, client and investor entertainment and other sponsored events. The costs and expenses associated with these efforts may include travel, lodging, sponsorship at educational seminars and conferences, entertainment and meals to the extent permitted by law.

Revenue sharing payments may be negotiated based on a variety of factors, including the level of sales, the amount of Fund assets attributable to investments in the Funds by financial intermediaries' customers, a flat fee or other measures as determined from time to time by the Adviser and/or its affiliates. A significant purpose of these payments is to increase the sales of Fund shares, which in turn may benefit the Adviser through increased fees as Fund assets grow.

Investors should understand that some financial intermediaries may also charge their clients fees in connection with purchases of shares or the provision of shareholder services.

THE TRANSFER AGENT

DST Systems, Inc., 333 West 11th Street, Kansas City, Missouri 64105 (the "Transfer Agent"), serves as the Funds' transfer agent.

THE CUSTODIAN

Brown Brothers Harriman & Co., 40 Water Street, Boston, Massachusetts 02109 (the "Custodian"), acts as the custodian of the Funds. The Custodian holds cash, securities and other assets of the Funds as required by the 1940 Act.

INDEPENDENT REGISTERED PUBLIC ACCOUNTING FIRM

PricewaterhouseCoopers LLP, Two Commerce Square, 2001 Market Street, Suite 1800, Philadelphia, Pennsylvania 19103, serves as the independent registered public accounting firm for the Funds. The financial statements and notes thereto incorporated by reference for the Funds have been audited by PricewaterhouseCoopers LLP, as indicated in their report with respect thereto, and are incorporated by reference in reliance on the authority of their report as experts in accounting and auditing.

LEGAL COUNSEL

Morgan, Lewis & Bockius LLP, 1701 Market Street, Philadelphia, Pennsylvania 19103-2921, serves as legal counsel to the Trust.

SECURITIES LENDING

The Funds did not engage in securities lending activities during the fiscal year ended October 31, 2019.

TRUSTEES AND OFFICERS OF THE TRUST

Board Responsibilities. The management and affairs of the Trust and its series, including the Funds described in this SAI, are overseen by the Trustees. The Board has approved contracts, as described above, under which certain companies provide essential management services to the Trust.

Like most mutual funds, the day-to-day business of the Trust, including the management of risk, is performed by third party service providers, such as the Adviser, the Sub-Advisers, the Distributor and the Administrator. The Trustees are responsible for overseeing the Trust's service providers and, thus, have oversight responsibility with respect to risk management performed by those service providers. Risk management seeks to identify and address risks, i.e., events or circumstances that could have material adverse effects on the business, operations, shareholder services, investment performance or reputation of the funds. The funds and their service providers employ a variety of processes, procedures and controls to identify various possible events or circumstances, to lessen the probability of their occurrence and/or to mitigate the effects of such events or circumstances if they do occur. Each service provider is responsible for one or more discrete aspects of the Trust's business (e.g., the Adviser is responsible for the day-to-day management of each Fund's portfolio investments) and, consequently, for managing the risks associated with that business. The Board has emphasized to the Funds' service providers the importance of maintaining vigorous risk management.

The Trustees' role in risk oversight begins before the inception of a fund, at which time certain of the fund's service providers present the Board with information concerning the investment objectives, strategies and risks of the fund as well as proposed investment limitations for the fund. Additionally, the fund's adviser provides the Board with an overview of, among other things, its investment philosophy, brokerage practices and compliance infrastructure. Thereafter, the Board continues its oversight function as various personnel, including the Trust's Chief Compliance Officer, as well as personnel of the adviser and other service providers, such as the fund's independent accountants, make periodic reports to the Audit Committee or to the Board with respect to various aspects of risk management. The Board and the Audit Committee oversee efforts by management and service providers to manage risks to which the funds may be exposed.

The Board is responsible for overseeing the nature, extent and quality of the services provided to the funds by the adviser and receives information about those services at its regular meetings. In addition, on an annual basis, in connection with its consideration of whether to renew the advisory agreement with the adviser, the Board meets with the adviser to review such services. Among other things, the Board regularly considers the adviser's adherence to the funds' investment restrictions and compliance with various fund policies and procedures and with applicable securities regulations. The Board also reviews information about the funds' investments, including, for example, reports on the adviser's use of derivatives in managing the funds, if any, as well as reports on the funds' investments in other investment companies, if any.

The Trust's Chief Compliance Officer reports regularly to the Board to review and discuss compliance issues and fund and adviser risk assessments. At least annually, the Trust's Chief Compliance Officer provides the Board with a report reviewing the adequacy and effectiveness of the Trust's policies and procedures and those of its service providers, including the adviser. The report addresses the operation of the policies and procedures of the Trust and each service provider since the date of the last report; any material changes to the policies and procedures since the date of the last report; any recommendations for material changes to the policies and procedures; and any material compliance matters since the date of the last report.

The Board receives reports from the funds' service providers regarding operational risks and risks related to the valuation and liquidity of portfolio securities. The Trust's Fair Value Pricing Committee makes regular reports to the Board concerning investments for which market quotations are not readily available. Annually, the independent registered public accounting firm reviews with the Audit Committee its audit of the funds' financial statements, focusing on major areas of risk encountered by the funds and noting any significant deficiencies or material weaknesses in the funds' internal controls. Additionally, in connection with its oversight function, the Board oversees fund management's implementation of disclosure controls and procedures, which are designed to ensure that information required to be disclosed by the Trust in its periodic reports with the SEC are recorded, processed, summarized, and reported within the required time periods. The Board also oversees the Trust's internal controls over financial reporting, which comprise policies and procedures designed to provide reasonable assurance regarding the reliability of the Trust's financial reporting and the preparation of the Trust's financial statements.

From their review of these reports and discussions with the adviser, the Chief Compliance Officer, the independent registered public accounting firm and other service providers, the Board and the Audit Committee learn in detail about the material risks of the funds, thereby facilitating a dialogue about how management and service providers identify and mitigate those risks.

The Board recognizes that not all risks that may affect the funds can be identified and/or quantified, that it may not be practical or cost-effective to eliminate or mitigate certain risks, that it may be necessary to bear certain risks (such as investment-related risks) to achieve the funds' goals, and that the processes, procedures and controls employed to address certain risks may be limited in their effectiveness. Moreover, reports received by the Trustees as to risk management matters are typically summaries of the relevant information. Most of the funds' investment management and business affairs are carried out by or through the funds' advisers and other service providers, each of which has an independent interest in risk management but whose policies and the methods by which one or more risk management functions are carried out may differ from the funds' and each other's in the setting of priorities, the resources available or the effectiveness of relevant controls. As a result of the foregoing and other factors, the Board's ability to monitor and manage risk, as a practical matter, is subject to limitations.

Members of the Board. There are five members of the Board, four of whom are not interested persons of the Trust, as that term is defined in the 1940 Act ("independent Trustees"). Mr. Doran, an interested person of the Trust, serves as Chairman of the Board. Mr. Hunt, an independent Trustee, serves as the lead independent Trustee. The Trust has determined its leadership structure is appropriate given the specific characteristics and circumstances of the Trust. The Trust made this determination in consideration of, among other things, the fact that the independent Trustees constitute more than three-quarters of the Board, the fact that the chairperson of each Committee of the Board is an independent Trustee, the amount of assets under management in the Trust, and the number of funds (and classes of shares) overseen by the Board. The Board also believes that its leadership structure facilitates the orderly and efficient flow of information to the independent Trustees from fund management.

The Board has two standing committees: the Audit Committee and the Governance Committee. The Audit Committee and the Governance Committee are chaired by an independent Trustee and composed of all of the independent Trustees. In addition, the Board has a lead independent Trustee.

In his role as lead independent Trustee, Mr. Hunt, among other things: (i) presides over Board meetings in the absence of the Chairman of the Board; (ii) presides over executive sessions of the independent Trustees; (iii) along with the Chairman of the Board, oversees the development of agendas for Board meetings; (iv) facilitates communication between the independent Trustees and management, and among the independent Trustees; (v) serves as a key point person for dealings between the independent Trustees and management; and (vi) has such other responsibilities as the Board or independent Trustees determine from time to time.

Set forth below are the names, years of birth, position with the Trust and length of time served, and the principal occupations and other directorships held during at least the last five years of each of the persons currently serving as a Trustee. There is no stated term of office for the Trustees. Nevertheless, an independent Trustee must retire from the Board as of the end of the calendar year in which such independent Trustee first attains the age of seventy-five years; provided, however, that, an independent Trustee may continue to serve for one or more additional one calendar year terms after attaining the age of seventy-five years (each calendar year a “Waiver Term”) if, and only if, prior to the beginning of such Waiver Term: (1) the Governance Committee (a) meets to review the performance of the independent Trustee; (b) finds that the continued service of such independent Trustee is in the best interests of the Trust; and (c) unanimously approves excepting the independent Trustee from the general retirement policy set out above; and (2) a majority of the Trustees approves excepting the independent Trustee from the general retirement policy set out above. Unless otherwise noted, the business address of each Trustee is SEI Investments, One Freedom Valley Drive, Oaks, Pennsylvania 19456.

Name and Year of Birth	Position with Trust and Length of Time Served	Principal Occupations in the Past 5 Years	Other Directorships Held in the Past 5 Years

Trustee of Winton Series Trust to 2017. Trustee of Winton Diversified Opportunities Fund (closed-end investment company) to 2018.
Thomas P. Lemke (Born: 1954)	Trustee (since 2014)	Retired since 2013. Executive Vice President and General Counsel, Legg Mason, Inc. from 2005 to 2013.	Current Directorships: Trustee of Gallery Trust, Schroder Series Trust, Schroder Global Series Trust, JP Morgan Active Exchange-Traded Funds (33 Portfolios) and Symmetry Panoramic Trust (8 portfolios). Former Directorships: Trustee of Munder Funds to 2014. Trustee of Victory Funds to 2015. Trustee of O’Connor EQUUS (closed-end investment company) to 2016. Trustee of Winton Series Trust and AXA Premier VIP Trust to 2017. Trustee of Winton Diversified Opportunities Fund (closed-end investment company) to 2018.

Name and Year of Birth	Position with Trust and Length of Time Served	Principal Occupations in the Past 5 Years	Other Directorships Held in the Past 5 Years
Jay C. Nadel (Born: 1958)	Trustee (since 2016)	Self-Employed Consultant since 2004. Executive Vice President, Bank of New York Broker Dealer from 2002 to 2004. Partner/Managing Director, Weiss Peck & Greer/Robeco from 1986 to 2001.	Current Directorships: Trustee of City National Rochdale Funds, Gallery Trust, Schroder Series Trust and Schroder Global Series Trust. Former Directorships: Trustee of Winton Series Trust to 2017. Director of Lapolla Industries, Inc. to 2017. Trustee of Winton Diversified Opportunities Fund (closed-end investment company) to 2018.
Randall S. Yanker (Born: 1960)	Trustee (since 2014)	Co-Founder and Senior Partner, Alternative Asset Managers, L.P. since 2004.	Current Directorships: Trustee of Gallery Trust, Schroder Series Trust and Schroder Global Series Trust. Independent Non-Executive Director of HFA Holdings Limited. Former Directorships: Trustee of O'Connor EQUUS (closed-end investment company) to 2016. Trustee of Winton Series Trust to 2017. Trustee of Winton Diversified Opportunities Fund (closed-end investment company) to 2018.

- 1 Mr. Doran may be deemed to be an “interested” person of the Funds as that term is defined in the 1940 Act by virtue of his affiliation with the Distributor and/or its affiliates.

Individual Trustee Qualifications

The Trust has concluded that each of the Trustees should serve on the Board because of their ability to review and understand information about the Funds provided to them by management, to identify and request other information they may deem relevant to the performance of their duties, to question management and other service providers regarding material factors bearing on the management and administration of the Funds, and to exercise their business judgment in a manner that serves the best interests of the Funds’ shareholders. The Trust has concluded that each of the Trustees should serve as a Trustee based on their own experience, qualifications, attributes and skills as described below.

The Trust has concluded that Mr. Doran should serve as Trustee because of the experience he gained serving as a Partner in the Investment Management and Securities Industry Practice of a large law firm, his experience in and knowledge of the financial services industry, and the experience he has gained serving on other mutual fund boards.

The Trust has concluded that Mr. Hunt should serve as Trustee because of the experience he gained in a variety of leadership roles with different investment management institutions, his experience in and knowledge of the financial services industry, and the experience he has gained as a board member of open-end, closed-end and private funds investing in a broad range of asset classes, including alternative asset classes.

The Trust has concluded that Mr. Lemke should serve as Trustee because of the extensive experience he gained in the financial services industry, including experience in various senior management positions with financial services firms and multiple years of service with a regulatory agency, his background in controls, including legal, compliance and risk management, and his service as general counsel for several financial services firms.

The Trust has concluded that Mr. Nadel should serve as Trustee because of the experience he gained in a variety of leadership roles with an audit firm and various financial services firms, his experience in and knowledge of the financial services industry, and the experience he has gained serving on other mutual fund and operating company boards.

The Trust has concluded that Mr. Yanker should serve as Trustee because of the experience he gained in a variety of leadership roles with the alternative asset management divisions of various financial services firms, his experience in and knowledge of the financial services industry, and the experience he has gained advising institutions on alternative asset management.

In its periodic assessment of the effectiveness of the Board, the Board considers the complementary individual skills and experience of the individual Trustees primarily in the broader context of the Board's overall composition so that the Board, as a body, possesses the appropriate (and appropriately diverse) skills and experience to oversee the business of the funds.

Board Committees. The Board has established the following standing committees:

- **Audit Committee.** The Board has a standing Audit Committee that is composed of each of the independent Trustees. The Audit Committee operates under a written charter approved by the Board. The principal responsibilities of the Audit Committee include: (i) recommending which firm to engage as each fund's independent registered public accounting firm and whether to terminate this relationship; (ii) reviewing the independent registered public accounting firm's compensation, the proposed scope and terms of its engagement, and the firm's independence; (iii) pre-approving audit and non-audit services provided by each fund's independent registered public accounting firm to the Trust and certain other affiliated entities; (iv) serving as a channel of communication between the independent registered public accounting firm and the Trustees; (v) reviewing the results of each external audit, including any qualifications in the independent registered public accounting firm's opinion, any related management letter, management's responses to recommendations made by the independent registered public accounting firm in connection with the audit, reports submitted to the Committee by the internal auditing department of the Administrator that are material to the Trust as a whole, if any, and management's responses to any such reports; (vi) reviewing each fund's audited financial statements and considering any significant disputes between the Trust's management and the independent registered public accounting firm that arose in connection with the preparation of those financial statements; (vii) considering, in consultation with the independent registered public accounting firm and the Trust's senior internal accounting executive, if any, the independent registered public accounting firms' reports on the adequacy of the Trust's internal financial controls; (viii) reviewing, in consultation with each fund's independent registered public accounting firm, major changes regarding auditing and accounting principles and practices to be followed when preparing each fund's financial statements; and (ix) other audit related matters. Mr. Hunt, Mr. Lemke, Mr. Nadel and Mr. Yanker currently serve as members of the Audit Committee. Mr. Nadel serves as the Chairman of the Audit Committee. The Audit Committee meets periodically, as necessary, and met four (4) times during the most recently completed fiscal year.

- **Governance Committee.** The Board has a standing Governance Committee that is composed of each of the independent Trustees. The Governance Committee operates under a written charter approved by the Board. The principal responsibilities of the Governance Committee include: (i) considering and reviewing Board governance and compensation issues; (ii) conducting a self-assessment of the Board’s operations; (iii) selecting and nominating all persons to serve as independent Trustees and considering proposals of and making recommendations for “interested” Trustee candidates to the Board; and (iv) reviewing shareholder recommendations for nominations to fill vacancies on the Board if such recommendations are submitted in writing and addressed to the Committee at the Trust’s office. Mr. Hunt, Mr. Lemke, Mr. Nadel and Mr. Yanker currently serve as members of the Governance Committee. Mr. Lemke serves as the Chairman of the Governance Committee. The Governance Committee meets periodically, as necessary, and met two (2) times during the most recently completed fiscal year.

Fair Value Pricing Committee. The Board has also established a standing Fair Value Pricing Committee that is composed of various representatives of the Trust’s service providers, as appointed by the Board. The Fair Value Pricing Committee operates under procedures approved by the Board. The principal responsibility of the Fair Value Pricing Committee is to determine the fair value of securities for which current market quotations are not readily available. The Fair Value Pricing Committee’s determinations are reviewed by the Board.

Fund Shares Owned by Board Members. The following table shows the dollar amount range of each Trustee’s “beneficial ownership” of shares of each of the Funds as of the end of the most recently completed calendar year. Dollar amount ranges disclosed are established by the SEC. “Beneficial ownership” is determined in accordance with Rule 16a-1(a)(2) under the 1934 Act. The Trustees and officers of the Trust own less than 1% of the outstanding shares of the Trust.

Name	Dollar Range of Fund Shares (Fund) ¹	Aggregate Dollar Range of Shares (All Funds in the Family of Investment Companies) ^{1,2}
<u>Interested Trustee</u>		
William M. Doran	None	None
<u>Independent Trustees</u>		
Jon C. Hunt	None	None
Thomas P. Lemke	None	None
Jay C. Nadel	None	None
Randall S. Yanker	None	None

1 Valuation date is December 31, 2019.

2 The Funds are the only funds in the family of investment companies.

Board Compensation. The Trust paid the following fees to the Trustees during the fiscal year ended October 31, 2019.

Name	Aggregate Compensation from the Trust	Pension or Retirement Benefits Accrued as Part of Fund Expenses	Estimated Annual Benefits Upon Retirement	Total Compensation from the Trust and Fund Complex ¹
Interested Trustee				
William M. Doran	\$0	N/A	N/A	\$0 for service on one (1) board
Independent Trustees				
Jon C. Hunt	\$77,202	N/A	N/A	\$77,202 for service on one (1) board
Thomas P. Lemke	\$77,202	N/A	N/A	\$77,202 for service on one (1) board
Jay C. Nadel	\$77,202	N/A	N/A	\$77,202 for service on one (1) board
Randall S. Yanker	\$77,202	N/A	N/A	\$77,202 for service on one (1) board

¹ All funds in the Fund Complex are series of the Trust.

Trust Officers. Set forth below are the names, years of birth, position with the Trust and length of time served, and the principal occupations for the last five years of each of the persons currently serving as executive officers of the Trust. There is no stated term of office for the officers of the Trust. Unless otherwise noted, the business address of each officer is SEI Investments, One Freedom Valley Drive, Oaks, Pennsylvania 19456. The Chief Compliance Officer is the only officer who receives compensation from the Trust for his services.

Certain officers of the Trust also serve as officers of one or more mutual funds for which SEI Investments or its affiliates act as investment manager, administrator or distributor.

Name and Year of Birth	Position with Trust and Length of Time Served	Principal Occupations in Past 5 Years
Michael Beattie (Born: 1965)	President (since 2014)	Director of Client Service, SEI Investments, since 2004.
James Bernstein (Born: 1962)	Vice President and Assistant Secretary (since 2017)	Attorney, SEI Investments, since 2017. Prior Positions: Self-employed consultant, 2017. Associate General Counsel & Vice President, Nationwide Funds Group and Nationwide Mutual Insurance Company, from 2002 to 2016. Assistant General Counsel & Vice President, Market Street Funds and Provident Mutual Insurance Company, from 1999 to 2002.
John Bourgeois (Born: 1973)	Assistant Treasurer (since 2017)	Fund Accounting Manager, SEI Investments, since 2000.
Stephen Connors (Born: 1984)	Treasurer, Controller and Chief Financial Officer (since 2015)	Director, SEI Investments, Fund Accounting, since 2014. Audit Manager, Deloitte & Touche LLP, from 2011 to 2014.

Name and Year of Birth	Position with Trust and Length of Time Served	Principal Occupations in Past 5 Years
Russell Emery (Born: 1962)	Chief Compliance Officer (since 2014)	Chief Compliance Officer of SEI Structured Credit Fund, LP since 2007. Chief Compliance Officer of O'Connor EQUUS (closed-end investment company) to 2016. Chief Compliance Officer of SEI Liquid Asset Trust to 2016. Chief Compliance Officer of Winton Series Trust to 2017. Chief Compliance Officer of Winton Diversified Opportunities Fund (closed-end investment company) to 2018.
Matthew M. Maher (Born: 1975)	Vice President and Assistant Secretary (since 2018)	Counsel at SEI Investments since 2018. Attorney, Blank Rome LLP, from 2015 to 2018. Assistant Counsel & Vice President, Bank of New York Mellon, from 2013 to 2014. Attorney, Dilworth Paxson LLP, from 2006 to 2013.
Robert Morrow (Born: 1968)	Vice President (since 2017)	Account Manager, SEI Investments, since 2007.
Bridget E. Sudall (Born: 1980)	Privacy Officer (since 2015) Anti-Money Laundering Officer (since 2015)	Senior Associate and AML Officer, Morgan Stanley Alternative Investment Partners, from 2011 to 2015. Investor Services Team Lead, Morgan Stanley Alternative Investment Partners, from 2007 to 2011.

PURCHASING AND REDEEMING SHARES

Purchases and redemptions may be made through the Transfer Agent on any day the New York Stock Exchange (the "NYSE") is open for business. Shares of the Funds are offered and redeemed on a continuous basis. Currently, the Trust is closed for business when the following holidays are observed: New Year's Day, Martin Luther King Jr. Day, Presidents' Day, Good Friday, Memorial Day, Independence Day, Labor Day, Thanksgiving and Christmas.

It is currently the Trust's policy to pay all redemptions in cash. The Trust retains the right, however, to alter this policy to provide for redemptions in whole or in part by a distribution in-kind of securities held by the Funds in lieu of cash. Shareholders may incur brokerage charges on the sale of any such securities so received in payment of redemptions.

The Trust reserves the right to suspend the right of redemption and/or to postpone the date of payment upon redemption for more than seven days during times when the NYSE is closed, other than during customary weekends or holidays, for any period on which trading on the NYSE is restricted (as determined by the SEC by rule or regulation), or during the existence of an emergency (as determined by the SEC by rule or regulation) as a result of which the disposal or valuation of the Funds' securities is not reasonably practicable, or for such other periods as the SEC has by order permitted. The Trust also reserves the right to suspend sales of shares of the Funds for any period during which the NYSE, the Adviser, a Sub-Adviser, the Administrator, the Transfer Agent and/or the Custodian are not open for business.

DETERMINATION OF NET ASSET VALUE

General Policy. The Funds adhere to Section 2(a)(41), and Rule 2a-4 thereunder, of the 1940 Act with respect to the valuation of portfolio securities. In general, securities for which market quotations are readily available are valued at current market value, and all other securities are valued at fair value in accordance with procedures adopted by the Board. In complying with the 1940 Act, the Trust relies on guidance provided by the SEC and by the SEC staff in various interpretive letters and other guidance.

Equity Securities. Securities listed on a securities exchange, market or automated quotation system for which quotations are readily available (except for securities traded on NASDAQ), including securities traded over the counter, are valued at the last quoted sale price on an exchange or market (foreign or domestic) on which they are traded on the valuation date (or at approximately 4:00 p.m. Eastern Time if such exchange is normally open at that time), or, if there is no such reported sale on the valuation date, at the most recent quoted bid price. For securities traded on NASDAQ, the NASDAQ Official Closing Price will be used. If such prices are not available or determined to not represent the fair value of the security as of the Funds' pricing time, the security will be valued at fair value as determined in good faith using methods approved by the Board.

Money Market Securities and other Debt Securities. If available, money market securities and other debt securities are priced based upon valuations provided by recognized independent, third-party pricing agents. Such values generally reflect the last reported sales price if the security is actively traded. The third-party pricing agents may also value debt securities by employing methodologies that utilize actual market transactions, broker-supplied valuations, or other methodologies designed to identify the market value for such securities. Such methodologies generally consider such factors as security prices, yields, maturities, call features, ratings and developments relating to specific securities in arriving at valuations. Money market securities and other debt securities with remaining maturities of sixty days or less may be valued at their amortized cost, which approximates market value. If such prices are not available or determined to not represent the fair value of the security as of each Fund's pricing time, the security will be valued at fair value as determined in good faith using methods approved by the Board.

Foreign Securities. The prices for foreign securities are reported in local currency and converted to U.S. dollars using currency exchange rates. Exchange rates are provided daily by recognized independent pricing agents.

Derivatives and Other Complex Securities. Exchange-traded options on securities and indices purchased by the Funds generally are valued at their last trade price or, if there is no last trade price, the last bid price. Exchange-traded options on securities and indices written by the Funds generally are valued at their last trade price or, if there is no last trade price, the last asked price. In the case of options traded in the over-the-counter market, if the OTC option is also an exchange-traded option, the Funds will follow the rules regarding the valuation of exchange-traded options. If the OTC option is not also an exchange-traded option, the Funds will value the option at fair value in accordance with procedures adopted by the Board.

Futures and swaps cleared through a central clearing house ("centrally cleared swaps") are valued at the settlement price established each day by the board of the exchange on which they are traded. The daily settlement prices for financial futures are provided by an independent source. On days when there is excessive volume or market volatility, or the future or centrally cleared swap does not end trading by the time the Funds calculate net asset value, the settlement price may not be available at the time at which each Fund calculates its net asset value. On such days, the best available price (which is typically the last sales price) may be used to value a Fund's futures or centrally cleared swaps position.

Foreign currency forward contracts are valued at the current day's interpolated foreign exchange rate, as calculated using the current day's spot rate, and the thirty, sixty, ninety and one-hundred eighty day forward rates provided by an independent source.

If available, non-centrally cleared swaps, collateralized debt obligations, collateralized loan obligations and bank loans are priced based on valuations provided by an independent third party pricing agent. If a price is not available from an independent third party pricing agent, the security will be valued at fair value as determined in good faith using methods approved by the Board.

Use of Third-Party Independent Pricing Agents and Independent Brokers. Pursuant to contracts with the Administrator, prices for most securities held by the Funds are provided daily by third-party independent pricing agents that are approved by the Board. The valuations provided by third-party independent pricing agents are reviewed daily by the Administrator.

If a security price cannot be obtained from an independent, third-party pricing agent, the Administrator shall seek to obtain a bid price from at least one independent broker.

Fair Value Procedures. Securities for which market prices are not "readily available" or which cannot be valued using the methodologies described above are valued in accordance with Fair Value Procedures established by the Board and implemented through the Fair Value Pricing Committee. The members of the Fair Value Pricing Committee report, as necessary, to the Board regarding portfolio valuation determinations. The Board, from time to time, will review these methods of valuation and will recommend changes which may be necessary to assure that the investments of the Funds are valued at fair value.

Some of the more common reasons that may necessitate a security being valued using Fair Value Procedures include: the security's trading has been halted or suspended; the security has been de-listed from a national exchange; the security's primary trading market is temporarily closed at a time when under normal conditions it would be open; the security has not been traded for an extended period of time; the security's primary pricing source is not able or willing to provide a price; trading of the security is subject to local government-imposed restrictions; or a significant event with respect to a security has occurred after the close of the market or exchange on which the security principally trades and before the time the Funds calculate net asset value. When a security is valued in accordance with the Fair Value Procedures, the Fair Value Pricing Committee will determine the value after taking into consideration relevant information reasonably available to the Fair Value Pricing Committee.

Fair Valuation of Foreign Securities Based on U.S. Market Movements. A third party fair valuation vendor provides a fair value for foreign securities held by the Core Bond Fund, Limited Duration Fund, Large Cap Growth Fund, Large Cap Value Fund, Small Cap Fund, International Equity Fund and Global Real Estate Fund based on certain factors and methodologies (involving, generally, tracking valuation correlations between the U.S. market and each foreign security) applied by the fair valuation vendor in the event that there are movements in the U.S. market that exceed a specific threshold that has been established by the Fair Value Pricing Committee. The Fair Value Pricing Committee has also established a "confidence interval" that is used to determine the level of correlation between the value of a foreign security and movements in the U.S. market that is required for a particular security to be fair valued when the threshold is exceeded. In the event that the threshold established by the Fair Value Pricing Committee is exceeded on a specific day, the Funds value the foreign securities in their portfolios that exceed the applicable "confidence interval" based upon the fair values provided by the fair valuation vendor. In such event, it is not necessary to hold a Fair Value Pricing Committee meeting. In the event that the Adviser believes that the fair values provided by the fair valuation vendor are not reliable, the Adviser can contact the Administrator and request that a meeting of the Fair Value Pricing Committee be held.

TAXES

The following is only a summary of certain additional U.S. federal income tax considerations generally affecting the Funds and their shareholders that is intended to supplement the discussion contained in the Prospectus. No attempt is made to present a detailed explanation of the tax treatment of the Funds or their shareholders, and the discussion here and in the Prospectus is not intended as a substitute for careful tax planning. Shareholders are urged to consult their tax advisors with specific reference to their own tax situations, including their state, local, and foreign tax liabilities.

The following general discussion of certain federal income tax consequences is based on the Code and the regulations issued thereunder as in effect on the date of this SAI. New legislation, as well as administrative changes or court decisions, may significantly change the conclusions expressed herein, and may have a retroactive effect with respect to the transactions contemplated herein.

The Tax Cuts and Jobs Act (the “Tax Act”) made significant changes to the U.S. federal income tax rules for taxation of individuals and corporations, generally effective for taxable years beginning after December 31, 2017. Many of the changes applicable to individuals are temporary and only apply to taxable years beginning after December 31, 2017 and before January 1, 2026. There are only minor changes with respect to the specific rules applicable to regulated investment companies (“RICs”), such as the Funds. The Tax Act, however, made numerous other changes to the tax rules that may affect shareholders and the Funds. You are urged to consult your own tax advisor regarding how the Tax Act affects your investment in the Funds.

Qualification as a Regulated Investment Company. Each Fund has elected and intends to qualify each year to be treated as a RIC. By following such a policy, each Fund expects to eliminate or reduce to a nominal amount the federal taxes to which it may be subject. If a Fund qualifies as a RIC, it will generally not be subject to federal income taxes on the net investment income and net realized capital gains that it timely distributes to its shareholders. The Board reserves the right not to maintain the qualification of a Fund as a RIC if it determines such course of action to be beneficial to shareholders.

In order to qualify as a RIC under the Code, each Fund must distribute annually to its shareholders at least 90% of its net investment income (which, includes dividends, taxable interest, and the excess of net short-term capital gains over net long-term capital losses, less operating expenses) and at least 90% of its net tax exempt interest income, for each tax year, if any (the “Distribution Requirement”) and also must meet certain additional requirements. Among these requirements are the following: (i) at least 90% of each Fund’s gross income each taxable year must be derived from dividends, interest, payments with respect to certain securities loans, and gains from the sale or other disposition of stock, securities, or foreign currencies, or other income (including but not limited to gains from options, futures or forward contracts) derived with respect to its business of investing in such stock, securities, or currencies, and net income derived from an interest in a qualified publicly traded partnership (the “Qualifying Income Test”); and (ii) at the close of each quarter of each Fund’s taxable year: (A) at least 50% of the value of each Fund’s total assets must be represented by cash and cash items, U.S. government securities, securities of other RICs and other securities, with such other securities limited, in respect to any one issuer, to an amount not greater than 5% of the value of each Fund’s total assets and that does not represent more than 10% of the outstanding voting securities of such issuer, including the equity securities of a qualified publicly traded partnership, and (B) not more than 25% of the value of each Fund’s total assets is invested, including through corporations in which each Fund owns a 20% or more voting stock interest, in the securities (other than U.S. government securities or the securities of other RICs) of any one issuer or the securities (other than the securities of another RIC) of two or more issuers that a Fund controls and which are engaged in the same or similar trades or businesses or related trades or businesses, or the securities of one or more qualified publicly traded partnerships (the “Asset Test”).

Although the Funds intend to distribute substantially all of their net investment income and may distribute their capital gains for any taxable year, the Funds will be subject to federal income taxation to the extent any such income or gains are not distributed. Each Fund is treated as a separate corporation for federal income tax purposes. A Fund therefore is considered to be a separate entity in determining its treatment under the rules for RICs described herein. Losses in one Fund do not offset gains in another and the requirements (other than certain organizational requirements) for qualifying RIC status are determined at the Fund level rather than at the Trust level.

If a Fund fails to satisfy the Qualifying Income or Asset Tests in any taxable year, such Fund may be eligible for relief provisions if the failures are due to reasonable cause and not willful neglect and if a penalty tax is paid with respect to each failure to satisfy the applicable requirements. Additionally, relief is provided for certain *de minimis* failures of the diversification requirements where the Fund corrects the failure within a specified period. If a Fund fails to maintain qualification as a RIC for a tax year, and the relief provisions are not available, such Fund will be subject to federal income tax at the regular corporate rate (which the Tax Act reduced to 21%) without any deduction for distributions to shareholders. In such case, its shareholders would be taxed as if they received ordinary dividends, although corporate shareholders could be eligible for the dividends received deduction (subject to certain limitations) and individuals may be able to benefit from the lower tax rates available to qualified dividend income. In addition, a Fund could be required to recognize unrealized gains, pay substantial taxes and interest, and make substantial distributions before requalifying as a RIC.

A Fund may elect to treat part or all of any “qualified late year loss” as if it had been incurred in the succeeding taxable year in determining the Fund’s taxable income, net capital gain, net short-term capital gain, and earnings and profits. The effect of this election is to treat any such “qualified late year loss” as if it had been incurred in the succeeding taxable year in characterizing Fund distributions for any calendar year. A “qualified late year loss” generally includes net capital loss, net long-term capital loss, or net short-term capital loss incurred after October 31 of the current taxable year (commonly referred to as “post-October losses”) and certain other late-year losses.

The treatment of capital loss carryovers for the Funds is similar to the rules that apply to capital loss carryovers of individuals, which provide that such losses are carried over indefinitely. If a Fund has a “net capital loss” (that is, capital losses in excess of capital gains), the excess of the Fund’s net short-term capital losses over its net long-term capital gains is treated as a short-term capital loss arising on the first day of the Fund’s next taxable year, and the excess (if any) of the Fund’s net long-term capital losses over its net short-term capital gains is treated as a long-term capital loss arising on the first day of the Fund’s next taxable year. The carryover of capital losses may be limited under the general loss limitation rules if a Fund experiences an ownership change as defined in the Code.

Federal Excise Tax. Notwithstanding the Distribution Requirement described above, which generally requires a Fund to distribute at least 90% of its annual investment company taxable income and the excess of its exempt interest income (but does not require any minimum distribution of net capital gain), a Fund will be subject to a nondeductible 4% federal excise tax to the extent it fails to distribute, by the end of the calendar year at least 98% of its ordinary income and 98.2% of its capital gain net income (the excess of short- and long-term capital gains over short- and long-term capital losses) for the one-year period ending on October 31 of such year (including any retained amount from the prior calendar year on which a Fund paid no federal income tax). The Funds intend to make sufficient distributions to avoid liability for federal excise tax, but can make no assurances that such tax will be completely eliminated. The Funds may in certain circumstances be required to liquidate Fund investments in order to make sufficient distributions to avoid federal excise tax liability at a time when the investment managers might not otherwise have chosen to do so, and liquidation of investments in such circumstances may affect the ability of the Funds to satisfy the requirement for qualification as RICs.

Distributions to Shareholders. The Funds receive income generally in the form of dividends and interest on investments. This income, plus net short-term capital gains, if any, less expenses incurred in the operation of a Fund, constitutes the Fund's net investment income from which dividends may be paid to you. Any distributions by a Fund from such income will be taxable to you as ordinary income or at the lower capital gains rates that apply to individuals receiving qualified dividend income, whether you take them in cash or in additional shares.

Distributions by the Funds are currently eligible for the reduced maximum tax rate to individuals of 20% (lower rates apply to individuals in lower tax brackets) to the extent that the Funds receive qualified dividend income on the securities they hold and the Funds report the distributions as qualified dividend income. Qualified dividend income is, in general, dividend income from taxable domestic corporations and certain foreign corporations (e.g., foreign corporations incorporated in a possession of the United States or in certain countries with a comprehensive tax treaty with the United States, or the stock of which is readily tradable on an established securities market in the United States). A dividend will not be treated as qualified dividend income to the extent that: (i) the shareholder has not held the shares on which the dividend was paid for more than 60 days during the 121-day period that begins on the date that is 60 days before the date on which the shares become "ex-dividend" (which is the day on which declared distributions (dividends or capital gains) are deducted from each Fund's assets before it calculates the net asset value) with respect to such dividend, (ii) each Fund has not satisfied similar holding period requirements with respect to the securities it holds that paid the dividends distributed to the shareholder, (iii) the shareholder is under an obligation (whether pursuant to a short sale or otherwise) to make related payments with respect to substantially similar or related property, or (iv) the shareholder elects to treat such dividend as investment income under section 163(d)(4)(B) of the Code. Therefore, if you lend your shares in a Fund, such as pursuant to a securities lending arrangement, you may lose the ability to treat dividends (paid while the shares are held by the borrower) as qualified dividend income. Distributions that a Fund receives from an ETF, an underlying fund taxable as a RIC or from a REIT will be treated as qualified dividend income only to the extent so reported by such ETF, underlying fund or REIT. It is not anticipated that any distributions by the Core Bond Fund and Limited Duration Fund will be eligible for the reduced tax rates applicable to qualified dividend income. In addition, certain of the Funds' investment strategies may limit their ability to make distributions eligible for the reduced tax rates applicable to qualified dividend income.

Distributions by the Funds of their net short-term capital gains will be taxable as ordinary income. Capital gain distributions consisting of a Fund's net capital gains will be taxable as long-term capital gains for individual shareholders at a maximum rate of 20% regardless of how long you have held your shares in such Fund.

In the case of corporate shareholders, Fund distributions (other than capital gain distributions) generally qualify for the dividends-received deduction to the extent such distributions are so reported and do not exceed the gross amount of qualifying dividends received by such Fund for the year. Generally, and subject to certain limitations (including certain holding period limitations), a dividend will be treated as a qualifying dividend if it has been received from a domestic corporation. It is not anticipated that any distributions by the Core Bond Fund and Limited Duration Fund will be eligible for the dividends-received deduction for corporate shareholders. In addition, certain of the Funds' investment strategies may limit their ability to make distributions eligible for the dividends-received deduction for corporate shareholders.

To the extent that a Fund makes a distribution of income received by such Fund in lieu of dividends (a "substitute payment") with respect to securities on loan pursuant to a securities lending transaction, such income will not constitute qualified dividend income to individual shareholders and will not be eligible for the dividends received deduction for corporate shareholders.

If a Fund's distributions exceed its taxable income and capital gains realized during a taxable year, all or a portion of the distributions made in the same taxable year may be recharacterized as a return of capital to shareholders. A return of capital distribution will generally not be taxable, but will reduce each shareholder's cost basis in a Fund and result in a higher reported capital gain or lower reported capital loss when those shares on which the distribution was received are sold.

A dividend or distribution received shortly after the purchase of shares reduces the net asset value of the shares by the amount of the dividend or distribution and, although in effect a return of capital, will be taxable to the shareholder. If the net asset value of shares were reduced below the shareholder's cost by dividends or distributions representing gains realized on sales of securities, such dividends or distributions would be a return of investment though taxable to the shareholder in the same manner as other dividends or distributions.

The Funds (or their administrative agent) will inform you of the amount of your ordinary income dividends, qualified dividend income and capital gain distributions, if any, and will advise you of their tax status for federal income tax purposes shortly after the close of each calendar year. If you have not held Fund shares for a full year, the Funds may report and distribute to you, as ordinary income, qualified dividend income or capital gain, a percentage of income that is not equal to the actual amount of such income earned during the period of your investment in the Funds.

Dividends declared to shareholders of record in October, November or December and actually paid in January of the following year will be treated as having been received by shareholders on December 31 of the calendar year in which declared. Under this rule, therefore, a shareholder may be taxed in one year on dividends or distributions actually received in January of the following year.

Sales, Exchanges or Redemptions. Any gain or loss recognized on a sale, exchange, or redemption of shares of a Fund by a shareholder who is not a dealer in securities will generally, for individual shareholders, be treated as a long-term capital gain or loss if the shares have been held for more than twelve months and otherwise will be treated as a short-term capital gain or loss. However, if shares on which a shareholder has received a long-term capital gain distribution are subsequently sold, exchanged, or redeemed and such shares have been held for six months or less, any loss recognized will be treated as a long-term capital loss to the extent of the long-term capital gain distribution. In addition, the loss realized on a sale or other disposition of shares will be disallowed to the extent a shareholder repurchases (or enters into a contract to or option to repurchase) shares within a period of 61 days (beginning 30 days before and ending 30 days after the disposition of the shares). This loss disallowance rule will apply to shares received through the reinvestment of dividends during the 61-day period. For tax purposes, an exchange of your Fund shares for shares of a different fund is the same as a sale.

U.S. individuals with income exceeding \$200,000 (\$250,000 if married and filing jointly) are subject to a 3.8% Medicare contribution tax on their "net investment income," including interest, dividends, and capital gains (including any capital gains realized on the sale or exchange of shares of a Fund).

The Funds (or their administrative agent) must report to the Internal Revenue Service ("IRS") and furnish to Fund shareholders the cost basis information for purchases of Fund shares. In addition to the requirement to report the gross proceeds from the sale of Fund shares, a Fund (or its administrative agent) is also required to report the cost basis information for such shares and indicate whether these shares had a short-term or long-term holding period. For each sale of Fund shares, a Fund will permit shareholders to elect from among several IRS-accepted cost basis methods, including the average basis method. In the absence of an election, a Fund will use the average basis method as its default cost basis method. The cost basis method elected by a Fund shareholder (or the cost basis method applied by default) for each sale of Fund shares may not be changed after the settlement date of each such sale of Fund shares. Fund shareholders should consult their tax advisors to determine the best IRS-accepted cost basis method for their tax situation and to obtain more information about how cost basis reporting applies to them. Shareholders also should carefully review the cost basis information provided to them by a Fund and make any additional basis, holding period or other adjustments that are required when reporting these amounts on their federal income tax returns.

Tax Treatment of Complex Securities. The Funds may invest in complex securities and these investments may be subject to numerous special and complex tax rules. These rules could affect a Fund's ability to qualify as a RIC, affect whether gains and losses recognized by the Funds are treated as ordinary income or capital gain, accelerate the recognition of income to the Funds and/or defer the Funds' ability to recognize losses, and, in limited cases, subject the Funds to U.S. federal income tax on income from certain of their foreign securities. In turn, these rules may affect the amount, timing or character of the income distributed to you by the Funds.

Each Fund is required for federal income tax purposes to mark-to-market and recognize as income for each taxable year its net unrealized gains and losses on certain futures and options contracts subject to section 1256 of the Code ("Section 1256 Contracts") as of the end of the year as well as those actually realized during the year. Gain or loss from Section 1256 Contracts on broad-based indexes required to be marked to market will be 60% long-term and 40% short-term capital gain or loss. Application of this rule may alter the timing and character of distributions to shareholders. A Fund may be required to defer the recognition of losses on Section 1256 Contracts to the extent of any unrecognized gains on offsetting positions held by the Fund. These provisions may also require the Funds to mark-to-market certain types of positions in their portfolios (i.e., treat them as if they were closed out), which may cause a Fund to recognize income without receiving cash with which to make distributions in amounts necessary to satisfy the Distribution Requirement and for avoiding the excise tax discussed above. Accordingly, in order to avoid certain income and excise taxes, a Fund may be required to liquidate its investments at a time when the investment managers might not otherwise have chosen to do so.

Any forward contract or other position entered into or held by a Fund in conjunction with any other position held by that Fund may constitute a "straddle" for federal income tax purposes. A straddle of which at least one, but not all, the positions are Section 1256 Contracts may constitute a "mixed straddle." In general, straddles are subject to certain rules that may affect the amount, character and timing of a Fund's gains and losses with respect to straddle positions by requiring, among other things, that: (1) any loss realized on disposition of one position of a straddle may not be recognized to the extent that the Fund has unrealized gains with respect to the other position in such straddle; (2) the Fund's holding period in straddle positions be suspended while the straddle exists (possibly resulting in a gain being treated as short-term capital gain rather than long-term capital gain); (3) the losses recognized with respect to certain straddle positions that are part of a mixed straddle and that are non-Section 1256 Contracts be treated as 60% long-term and 40% short-term capital loss; (4) losses recognized with respect to certain straddle positions that would otherwise constitute short-term capital losses be treated as long-term capital losses; and (5) the deduction of interest and carrying charges attributable to certain straddle positions may be deferred. Various elections are available to a Fund, which may mitigate the effects of the straddle rules, particularly with respect to mixed straddles.

In general, the straddle rules described above do not apply to any straddles held by a Fund if all of the offsetting positions consist of Section 1256 Contracts. The straddle rules described above also do not apply if all the offsetting positions making up a straddle consist of one or more "qualified covered call options" and the stock to be purchased under the options and the straddle is not part of a larger straddle. A qualified covered call option is generally any option granted by a Fund to purchase stock it holds (or stock it acquires in connection with granting the option) if, among other things, (1) the option is traded on a national securities exchange that is registered with the SEC or other market the IRS determined has rules adequate to carry out the purposes of the applicable Code provision, (2) the option is granted more than 30 days before it expires, (3) the option is not a "deep-in-the-money option," and (4) gain or loss with respect to the option is not ordinary income or loss.

To the extent a Fund writes options that are not subject to the rules of section 1256 of the Code, the amount of the premium received by the Fund for writing such options will generally be entirely short-term capital gain to the Fund. In addition, if such an option is closed by the Fund, any gain or loss realized by the Fund as a result of closing the transaction will also generally be short-term capital gain or loss. If such an option is exercised any gain or loss realized by the Fund upon the sale of the underlying security pursuant to such exercise will generally be short-term or long-term capital gain or loss to the Fund depending on the Fund's holding period for the underlying security.

If a Fund enters into a "constructive sale" of any appreciated financial position in its portfolio, such Fund will be treated as if it had sold and immediately repurchased the property and must recognize gain (but not loss) with respect to that position. A constructive sale of an appreciated financial position occurs when a Fund enters into certain offsetting transactions with respect to the same or substantially identical property, including, but not limited to: (i) a short sale; (ii) an offsetting notional principal contract; (iii) a futures or forward contract; or (iv) other transactions identified in future Treasury Regulations. The character of the gain from constructive sales will depend upon a Fund's holding period in the appreciated financial position. Losses realized from a sale of a position that was previously the subject of a constructive sale will be recognized when the position is subsequently disposed of. The character of such losses will depend upon a Fund's holding period in the position beginning with the date the constructive sale was deemed to have occurred and the application of various loss deferral provisions in the Code. Constructive sale treatment does not apply to certain closed transactions, including if such a transaction is closed on or before the 30th day after the close of a Fund's taxable year and such Fund holds the appreciated financial position unhedged throughout the 60-day period beginning with the day such transaction was closed.

If a Fund owns shares in certain foreign investment entities, referred to as "passive foreign investment companies" or "PFICs," the Fund will generally be subject to one of the following special tax regimes: (i) the Fund may be liable for U.S. federal income tax, and an additional interest charge, on a portion of any "excess distribution" from such foreign entity or any gain from the disposition of such shares, even if the entire distribution or gain is paid out by the Fund as a dividend to its shareholders; (ii) if the Fund were able and elected to treat a PFIC as a "qualified electing fund" or "QEF," the Fund would be required each year to include in income, and distribute to shareholders in accordance with the distribution requirements set forth above, the Fund's pro rata share of the ordinary earnings and net capital gains of the PFIC, whether or not such earnings or gains are distributed to the Fund; or (iii) the Fund may be entitled to mark-to-market annually shares of the PFIC, and in such event would be required to distribute to shareholders any such mark-to-market gains in accordance with the distribution requirements set forth above. Such Fund intends to make the appropriate tax elections, if possible, and take any additional steps that are necessary to mitigate the effect of these rules. Amounts included in income each year by a Fund arising from a QEF election will be "qualifying income" under the Qualifying Income Test (as described above) even if not distributed to the Fund, if the Fund derives such income from its business of investing in stock, securities or currencies.

A Fund may invest in REITs. Investments in REIT equity securities may require a Fund to accrue and distribute income not yet received. To generate sufficient cash to make the requisite distributions, a Fund may be required to sell securities in its portfolio (including when it is not advantageous to do so) that it otherwise would have continued to hold. A Fund's investments in REIT equity securities may at other times result in a Fund's receipt of cash in excess of the REIT's earnings; if a Fund distributes these amounts, these distributions could constitute a return of capital to such Fund's shareholders for federal income tax purposes. Dividends paid by a REIT, other than capital gain distributions, will be taxable as ordinary income up to the amount of the REIT's current and accumulated earnings and profits. Capital gain dividends paid by a REIT to a Fund will be treated as long term capital gains by the Fund and, in turn, may be distributed by the Fund to its shareholders as a capital gain distribution. Dividends received by a Fund from a REIT generally will not constitute qualified dividend income or qualify for the dividends received deduction. If a REIT is operated in a manner such that it fails to qualify as a REIT, an investment in the REIT would become subject to double taxation, meaning the taxable income of the REIT would be subject to federal income tax at the regular corporate rate without any deduction for dividends paid to shareholders and the dividends would be taxable to shareholders as ordinary income (or possibly as qualified dividend income) to the extent of the REIT's current and accumulated earnings and profits.

REITs in which a Fund invests often do not provide complete and final tax information to the Fund until after the time that the Fund issues a tax reporting statement. As a result, a Fund may at times find it necessary to reclassify the amount and character of its distributions to you after it issues your tax reporting statement. When such reclassification is necessary, a Fund (or its administrative agent) will send you a corrected, final Form 1099-DIV to reflect the reclassified information. If you receive a corrected Form 1099-DIV, use the information on this corrected form, and not the information on the previously issued tax reporting statement, in completing your tax returns.

The Tax Act treats “qualified REIT dividends” (i.e., ordinary REIT dividends other than capital gain dividends and portions of REIT dividends designated as qualified dividend income eligible for capital gain tax rates) as eligible for a 20% deduction by non-corporate taxpayers. This deduction, if allowed in full, equates to a maximum effective tax rate of 29.6% (37% top rate applied to income after 20% deduction). Pursuant to recently proposed regulations on which the Funds may rely, distributions by a Fund to its shareholders that are attributable to qualified REIT dividends received by the Fund and which the Fund properly reports as “section 199A dividends,” are treated as “qualified REIT dividends” in the hands of non-corporate shareholders. A section 199A dividend is treated as a qualified REIT dividend only if the shareholder receiving such dividend holds the dividend-paying RIC shares for at least 46 days of the 91-day period beginning 45 days before the shares become ex-dividend, and is not under an obligation to make related payments with respect to a position in substantially similar or related property. A Fund is permitted to report such part of its dividends as section 199A dividends as are eligible, but is not required to do so.

Certain Foreign Currency Tax Issues. A Fund’s transactions in foreign currencies and forward foreign currency contracts will generally be subject to special provisions of the Code that, among other things, may affect the character of gains and losses realized by the Fund (i.e., may affect whether gains or losses are ordinary or capital), accelerate recognition of income to the Fund and defer losses. These rules could therefore affect the character, amount and timing of distributions to shareholders. These provisions also may require a Fund to mark-to-market certain types of positions in its portfolio (i.e., treat them as if they were closed out) which may cause the Fund to recognize income without receiving cash with which to make distributions in amounts necessary to satisfy the Distribution Requirements and for avoiding the excise tax described above. The Funds intend to monitor their transactions, intend to make the appropriate tax elections, and intend to make the appropriate entries in their books and records when they acquire any foreign currency or forward foreign currency contract in order to mitigate the effect of these rules so as to prevent disqualification of a Fund as a RIC and minimize the imposition of income and excise taxes.

Foreign Taxes. Dividends and interest received by a Fund may be subject to income, withholding or other taxes imposed by foreign countries and U.S. possessions that would reduce the yield on the Funds’ stock or securities. Tax conventions between certain countries and the United States may reduce or eliminate these taxes. Foreign countries generally do not impose taxes on capital gains with respect to investments by foreign investors.

If more than 50% of the value of a Fund's total assets at the close of its taxable year consists of stocks or securities of foreign corporations, the Fund will be eligible to and intends to file an election with the IRS that may enable shareholders, in effect, to receive either the benefit of a foreign tax credit, or a deduction from such taxes, with respect to any foreign and U.S. possessions income taxes paid by the Fund, subject to certain limitations. Pursuant to the election, such Fund will treat those taxes as dividends paid to its shareholders. Each such shareholder will be required to include a proportionate share of those taxes in gross income as income received from a foreign source and must treat the amount so included as if the shareholder had paid the foreign tax directly. The shareholder may then either deduct the taxes deemed paid by him or her in computing his or her taxable income or, alternatively, use the foregoing information in calculating any foreign tax credit they may be entitled to use against the shareholders' federal income tax. If a Fund makes the election, such Fund (or its administrative agent) will report annually to its shareholders the respective amounts per share of the Fund's income from sources within, and taxes paid to, foreign countries and U.S. possessions.

If a Fund does not hold sufficient foreign securities to meet the above threshold, then shareholders will not be entitled to claim a credit or further deduction with respect to foreign taxes paid by such Fund.

A shareholder's ability to claim a foreign tax credit or deduction in respect of foreign taxes paid by a Fund may be subject to certain limitations imposed by the Code, which may result in a shareholder not receiving a full credit or deduction (if any) for the amount of such taxes. In particular, shareholders must hold their Fund shares (without protection from risk of loss) on the ex-dividend date and for at least 15 additional days during the 30-day period surrounding the ex-dividend date to be eligible to claim a foreign tax credit with respect to a given dividend. Shareholders who do not itemize on their federal income tax returns may claim a credit (but no deduction) for such foreign taxes. Even if a Fund were eligible to make such an election for a given year, it may determine not to do so. Shareholders that are not subject to U.S. federal income tax, and those who invest in a Fund through tax-advantaged accounts (including those who invest through individual retirement accounts or other tax-advantaged retirement plans), generally will receive no benefit from any tax credit or deduction passed through by a Fund.

Tax-Exempt Shareholders. Certain tax-exempt shareholders, including qualified pension plans, individual retirement accounts, salary deferral arrangements, 401(k)s, and other tax-exempt entities, generally are exempt from federal income taxation except with respect to their unrelated business taxable income ("UBTI"). Under the Tax Act, tax-exempt entities are not permitted to offset losses from one trade or business against the income or gain of another trade or business. Certain net losses incurred prior to January 1, 2018 are permitted to offset gain and income created by an unrelated trade or business, if otherwise available. Under current law, the Funds generally serve to block UBTI from being realized by their tax-exempt shareholders. However, notwithstanding the foregoing, the tax-exempt shareholder could realize UBTI by virtue of an investment in a Fund where, for example: (i) the Fund invests in residual interests of Real Estate Mortgage Investment Conduits ("REMICs"), (ii) the Fund invests in a REIT that is a taxable mortgage pool ("TMP") or that has a subsidiary that is a TMP or that invests in the residual interest of a REMIC, or (iii) shares in the Fund constitute debt-financed property in the hands of the tax-exempt shareholder within the meaning of section 514(b) of the Code. Charitable remainder trusts are subject to special rules and should consult their tax advisor. The IRS has issued guidance with respect to these issues and prospective shareholders, especially charitable remainder trusts, are strongly encouraged to consult their tax advisors regarding these issues.

A Fund's shares held in a tax-qualified retirement account will generally not be subject to federal taxation on income and capital gains distributions from the Fund until a shareholder begins receiving payments from their retirement account. Because each shareholder's tax situation is different, shareholders should consult their tax advisor about the tax implications of an investment in the Funds.

Backup Withholding. A Fund will be required in certain cases to withhold at a rate of 24% and remit to the U.S. Treasury the amount withheld on amounts payable to any shareholder who: (i) has provided the Fund either an incorrect tax identification number or no number at all; (ii) is subject to backup withholding by the IRS for failure to properly report payments of interest or dividends; (iii) has failed to certify to the Fund that such shareholder is not subject to backup withholding; or (iv) has failed to certify to the Fund that the shareholder is a U.S. person (including a resident alien).

Non-U.S. Investors. Any non-U.S. investors in the Funds may be subject to U.S. withholding and estate tax and are encouraged to consult their tax advisors prior to investing in the Funds. Foreign shareholders (i.e., nonresident alien individuals and foreign corporations, partnerships, trusts and estates) are generally subject to U.S. withholding tax at the rate of 30% (or a lower tax treaty rate) on distributions derived from taxable ordinary income. A Fund may, under certain circumstances, report all or a portion of a dividend as an “interest-related dividend” or a “short-term capital gain dividend,” which would generally be exempt from this 30% U.S. withholding tax, provided certain other requirements are met. Short-term capital gain dividends received by a nonresident alien individual who is present in the U.S. for a period or periods aggregating 183 days or more during the taxable year are not exempt from this 30% withholding tax. Gains realized by foreign shareholders from the sale or other disposition of shares of a Fund generally are not subject to U.S. taxation, unless the recipient is an individual who is physically present in the U.S. for 183 days or more per year. Foreign shareholders who fail to provide an applicable IRS form may be subject to backup withholding on certain payments from a Fund. Backup withholding will not be applied to payments that are subject to the 30% (or lower applicable treaty rate) withholding tax described above. Different tax consequences may result if the foreign shareholder is engaged in a trade or business within the United States. In addition, the tax consequences to a foreign shareholder entitled to claim the benefits of a tax treaty may be different than those described above.

Under legislation generally known as “FATCA” (the Foreign Account Tax Compliance Act), the Funds are required to withhold 30% of certain ordinary dividends they pay to shareholders that fail to meet prescribed information reporting or certification requirements. In general, no such withholding will be required with respect to a U.S. person or non-U.S. person that timely provides the certifications required by a Fund or its agent on a valid IRS Form W-9 or applicable IRS Form W-8, respectively. Shareholders potentially subject to withholding include foreign financial institutions (“FFIs”), such as non-U.S. investment funds, and non-financial foreign entities (“NFFEs”). To avoid withholding under FATCA, an FFI generally must enter into an information sharing agreement with the IRS in which it agrees to report certain identifying information (including name, address, and taxpayer identification number) with respect to its U.S. account holders (which, in the case of an entity shareholder, may include its direct and indirect U.S. owners), and an NFFE generally must identify and provide other required information to the Funds or other withholding agent regarding its U.S. owners, if any. Such non-U.S. shareholders also may fall into certain exempt, excepted or deemed compliant categories as established by regulations and other guidance. A non-U.S. shareholder resident or doing business in a country that has entered into an intergovernmental agreement with the U.S. to implement FATCA will be exempt from FATCA withholding provided that the shareholder and the applicable foreign government comply with the terms of the agreement.

A non-U.S. entity that invests in a Fund will need to provide such Fund with documentation properly certifying the entity’s status under FATCA in order to avoid FATCA withholding. Non-U.S. investors in the Funds should consult their tax advisors in this regard.

Tax Shelter Reporting Regulations. Under U.S. Treasury regulations, generally, if a shareholder recognizes a loss of \$2 million or more for an individual shareholder or \$10 million or more for a corporate shareholder, the shareholder must file with the IRS a disclosure statement on Form 8886. Direct shareholders of portfolio securities are in many cases excepted from this reporting requirement, but under current guidance, shareholders of a RIC such as a Fund are not excepted. Future guidance may extend the current exception from this reporting requirement to shareholders of most or all RICs. The fact that a loss is reportable under these regulations does not affect the legal determination of whether the taxpayer’s treatment of the loss is proper. Shareholders should consult their tax advisors to determine the applicability of these regulations in light of their individual circumstances.

State Taxes. Depending upon state and local law, distributions by a Fund to its shareholders and the ownership of such shares may be subject to state and local taxes. Rules of state and local taxation of dividend and capital gains distributions from RICs often differ from the rules for federal income taxation described above. It is expected that a Fund will not be liable for any corporate tax in Delaware if it qualifies as a RIC for federal income tax purposes.

Many states grant tax-free status to dividends paid to you from interest earned on direct obligations of the U.S. government, subject in some states to minimum investment requirements that must be met by a Fund. Investment in Ginnie Mae or Fannie Mae securities, banker's acceptances, commercial paper, and repurchase agreements collateralized by U.S. government securities do not generally qualify for such tax-free treatment. The rules on exclusion of this income are different for corporate shareholders. Shareholders are urged to consult their tax advisors regarding state and local taxes applicable to an investment in a Fund.

FUND TRANSACTIONS

Brokerage Transactions. Generally, equity securities, both listed and over-the-counter, are bought and sold through brokerage transactions for which commissions are payable. Purchases from underwriters will include the underwriting commission or concession, and purchases from dealers serving as market makers will include a dealer's mark-up or reflect a dealer's mark-down. Money market securities and other debt securities are usually bought and sold directly from the issuer or an underwriter or market maker for the securities. Generally, the Funds will not pay brokerage commissions for such purchases. When a debt security is bought from an underwriter, the purchase price will usually include an underwriting commission or concession. The purchase price for securities bought from dealers serving as market makers will similarly include the dealer's mark up or reflect a dealer's mark down. When the Funds execute transactions in the over-the-counter market, they will generally deal with primary market makers unless prices that are more favorable are otherwise obtainable.

In addition, the investment managers may place a combined order for two or more accounts they manage, including the Funds, engaged in the purchase or sale of the same security if, in their judgment, joint execution is in the best interest of each participant and will result in best price and execution. Transactions involving commingled orders are allocated in a manner deemed equitable to each account or fund. Although it is recognized that, in some cases, the joint execution of orders could adversely affect the price or volume of the security that a particular account or the Funds may obtain, it is the opinion of the investment managers that the advantages of combined orders outweigh the possible disadvantages of combined orders.

For the fiscal years ended October 31, 2017, 2018 and 2019, the Funds paid the following aggregate brokerage commissions on Fund transactions:

Fund	Aggregate Dollar Amount of Brokerage Commissions Paid		
	2017	2018	2019
Core Bond Fund	\$0	\$0	\$0
Limited Duration Fund	\$0	\$0	\$0
Large Cap Growth Fund	\$14,616	\$26,842	\$38,344
Large Cap Value Fund	\$12,279	\$28,117	\$22,515
Small Cap Fund	\$83,148	\$84,460	\$84,070
International Equity Fund	\$24,509	\$37,693	\$50,605
Long/Short Equity Fund	N/A ¹	N/A ¹	N/A ¹
U.S. All Cap Index Fund	N/A ¹	N/A ¹	N/A ¹
Global Real Estate Fund	N/A ¹	N/A ¹	\$42,096 ²

¹ Not in operation during the period.

² Reflects the period from September 30, 2019 (commencement of Fund operations) to October 31, 2019.

Brokerage Selection. The Trust does not expect to use one particular broker or dealer, and when one or more brokers is believed capable of providing the best combination of price and execution, the investment managers may select a broker based upon brokerage or research services provided to the investment managers. The investment managers may pay a higher commission than otherwise obtainable from other brokers in return for such services only if a good faith determination is made that the commission is reasonable in relation to the services provided.

Section 28(e) of the 1934 Act permits the investment managers, under certain circumstances, to cause the Funds to pay a broker or dealer a commission for effecting a transaction in excess of the amount of commission another broker or dealer would have charged for effecting the transaction in recognition of the value of brokerage and research services provided by the broker or dealer. In addition to agency transactions, the investment managers may receive brokerage and research services in connection with certain riskless principal transactions, in accordance with applicable SEC guidance. Brokerage and research services include: (1) furnishing advice as to the value of securities, the advisability of investing in, purchasing or selling securities, and the availability of securities or purchasers or sellers of securities; (2) furnishing analyses and reports concerning issuers, industries, securities, economic factors and trends, portfolio strategy, and the performance of accounts; and (3) effecting securities transactions and performing functions incidental thereto (such as clearance, settlement, and custody). In the case of research services, the investment managers believe that access to independent investment research is beneficial to their investment decision-making processes and, therefore, to the Funds.

To the extent research services may be a factor in selecting brokers, such services may be in written form or through direct contact with individuals and may include information as to particular companies and securities as well as market, economic, or institutional areas and information which assists in the valuation and pricing of investments. Examples of research-oriented services for which the investment managers might utilize Fund commissions include research reports and other information on the economy, industries, sectors, groups of securities, individual companies, statistical information, political developments, technical market action, pricing and appraisal services, credit analysis, risk measurement analysis, performance and other analysis. The investment managers may use research services furnished by brokers in servicing all client accounts and not all services may necessarily be used by the investment managers in connection with the Funds or any other specific client account that paid commissions to the broker providing such services. Information so received by the investment managers will be in addition to and not in lieu of the services required to be performed by the Adviser under the Advisory Agreement or the Sub-Advisers under the Sub-Advisory Agreements. Any advisory or other fees paid to the investment managers are not reduced as a result of the receipt of research services.

In some cases the investment managers may receive a service from a broker that has both a “research” and a “non-research” use. When this occurs, the investment managers make a good faith allocation, under all the circumstances, between the research and non-research uses of the service. The percentage of the service that is used for research purposes may be paid for with client commissions, while the investment managers will use their own funds to pay for the percentage of the service that is used for non-research purposes. In making this good faith allocation, the investment managers face a potential conflict of interest, but the investment managers believe that their allocation procedures are reasonably designed to ensure that they appropriately allocate the anticipated use of such services to their research and non-research uses.

From time to time, the investment managers may purchase new issues of securities for clients, including the Funds, in a fixed price offering. In these situations, the seller may be a member of the selling group that will, in addition to selling securities, provide the investment managers with research services. FINRA has adopted rules expressly permitting these types of arrangements under certain circumstances. Generally, the seller will provide research “credits” in these situations at a rate that is higher than that which is available for typical secondary market transactions. These arrangements may not fall within the safe harbor of Section 28(e).

For the fiscal year ended October 31, 2019, the Funds paid the following commissions on brokerage transactions directed to brokers pursuant to an agreement or understanding whereby the broker provides research services to the Adviser:

Fund	Total Dollar Amount of Brokerage Commissions for Research Services	Total Dollar Amount of Transactions Involving Brokerage Commissions for Research Services
Core Bond Fund	\$0	\$0
Limited Duration Fund	\$0	\$0
Large Cap Growth Fund	\$12,625	\$26,868,725
Large Cap Value Fund	\$8,443	\$10,775,510
Small Cap Fund	\$23,679	\$16,728,413
International Equity Fund	\$28	\$209,806
Long/Short Equity Fund	N/A ¹	N/A ¹
U.S. All Cap Index Fund	N/A ¹	N/A ¹
Global Real Estate Fund	\$42,094 ²	\$50,040,442 ²

1 Not in operation during the period.

2 Reflects the period from September 30, 2019 (commencement of Fund operations) to October 31, 2019.

Brokerage with Fund Affiliates. The Funds may execute brokerage or other agency transactions through registered broker-dealer affiliates of the Funds, the Adviser or a Sub-Adviser for a commission in conformity with the 1940 Act and rules promulgated by the SEC. The 1940 Act requires that commissions paid to the affiliate by the Funds for exchange transactions not exceed “usual and customary” brokerage commissions. The rules define “usual and customary” commissions to include amounts which are “reasonable and fair compared to the commission, fee or other remuneration received or to be received by other brokers in connection with comparable transactions involving similar securities being purchased or sold on a securities exchange during a comparable period of time.” The Trustees, including those who are not “interested persons” of the Funds, have adopted procedures for evaluating the reasonableness of commissions paid to affiliates and review these procedures periodically.

For the fiscal years ended October 31, 2017, 2018 and 2019, the Funds did not pay any brokerage commissions on portfolio transactions effected by affiliated brokers.

Securities of “Regular Broker-Dealers.” The Funds are required to identify any securities of their “regular brokers and dealers” (as such term is defined in the 1940 Act) that each Fund held during its most recent fiscal year. During the fiscal year ended October 31, 2019, the Funds held securities of their "regular brokers and dealers" as follows:

Fund	Name of Broker/Dealer	Type of Security Held	Dollar Amount at FYE (in thousands)
Core Bond Fund	JPMorgan Chase	Debt	\$993
	UBS	Debt	\$414
Limited Duration Fund	JPMorgan Chase	Debt	\$1,136
Large Cap Growth Fund	Citigroup	Equity	\$404
Large Cap Value Fund	JPMorgan Chase	Equity	\$3,363

Portfolio Turnover Rates. Portfolio turnover is calculated by dividing the lesser of total purchases or sales of portfolio securities for the fiscal year by the monthly average value of portfolio securities owned during the fiscal year. Excluded from both the numerator and denominator are amounts relating to securities whose maturities at the time of acquisition were one year or less. Instruments excluded from the calculation of portfolio turnover generally would include the futures contracts in which the Funds may invest since such contracts generally have remaining maturities of less than one year. The Funds may at times hold investments in other short-term instruments, such as repurchase agreements, which are excluded for purposes of computing portfolio turnover. During the fiscal years ended October 31, 2018 and 2019, the Funds’ portfolio turnover rates were as follows:

Fund	Portfolio Turnover Rates	
	2018	2019
Core Bond Fund	45%	47%
Limited Duration Fund	79%	76%
Large Cap Growth Fund	118%	113%
Large Cap Value Fund	56%	41%
Small Cap Fund	92%	65%
International Equity Fund	45%	49%
Long/Short Equity Fund	N/A ¹	N/A ¹
U.S. All Cap Index Fund	N/A ¹	N/A ¹
Global Real Estate Fund	N/A ¹	10% ²

¹ Not in operation during the period.

² Reflects the period from September 30, 2019 (commencement of Fund operations) to October 31, 2019.

PORTFOLIO HOLDINGS

The Board has approved policies and procedures that govern the timing and circumstances regarding the disclosure of Fund portfolio holdings information to shareholders and third parties. These policies and procedures are designed to ensure that disclosure of information regarding the Funds’ portfolio securities is in the best interests of the Funds’ shareholders, and include procedures to address conflicts between the interests of the Funds’ shareholders, on the one hand, and those of the Adviser, a Sub-Adviser, principal underwriter or any affiliated person of the Funds, the Adviser, a Sub-Adviser, or their principal underwriter, on the other. Pursuant to such procedures, the Board has authorized the Adviser’s Chief Compliance Officer (the “Authorized Person”) to authorize the release of the Funds’ portfolio holdings, as necessary, in conformity with the foregoing principles. The Authorized Person, either directly or through reports by the Trust’s Chief Compliance Officer, reports quarterly to the Board regarding the operation and administration of such policies and procedures.

Pursuant to applicable law, the Funds are required to disclose their complete portfolio holdings quarterly, within 60 days of the end of each fiscal quarter (currently, each January 31, April 30, July 31, and October 31). The Funds disclose a complete or summary schedule of investments (which includes a Fund's 50 largest holdings in unaffiliated issuers and each investment in unaffiliated issuers that exceeds one percent of the Fund's net asset value ("Summary Schedule")) in their Semi-Annual and Annual Reports which are distributed to Fund shareholders. The Funds' complete schedule of investments following the first and third fiscal quarters will be available in quarterly holdings reports filed with the SEC on Form N-Q or as exhibits to Form N-PORT, and the Funds' complete schedule of investments following the second and fourth fiscal quarters will be available in shareholder reports filed with the SEC on Form N-CSR.

Complete schedules of investments filed with the SEC on Form N-Q, Form N-CSR, and as exhibits to Form N-PORT, are not distributed to Fund shareholders but are available, free of charge, on the EDGAR database on the SEC's website at www.sec.gov. Should a Fund include only a Summary Schedule rather than a complete schedule of investments in its Semi-Annual and Annual Reports, its complete schedule of investments will be available without charge, upon request, by calling 1-844-KC-FUNDS (1-844-523-8637).

In addition, each Fund publishes a list of its ten largest portfolio holdings, and the percentage of the Fund's assets that each of these holdings represents, on a monthly basis, within thirty (30) days after the end of the month. For example, the Funds' investments as of the end of January would ordinarily be published at the end of February. The portfolio information described above can be found on the internet at www.kofcassetadvisors.org. The Adviser may exclude any portion of a Fund's portfolio holdings from such publication when deemed in the best interest of the Fund. The portfolio holdings information placed on the Funds' website generally will remain there until replaced by new postings as described above.

In addition to information provided to shareholders and the general public, portfolio holdings information may be disclosed as frequently as daily to certain service providers, such as the Custodian, Administrator or Transfer Agent, in connection with their services to the Funds. From time to time rating and ranking organizations, such as S&P, Lipper and Morningstar, Inc., may request non-public portfolio holdings information in connection with rating the Funds. Similarly, institutional investors, financial planners, pension plan sponsors and/or their consultants or other third-parties may request portfolio holdings information in order to assess the risks of the Funds' portfolios along with related performance attribution statistics. The lag time for such disclosures will vary. The Funds believe that these third parties have legitimate objectives in requesting such portfolio holdings information.

The Funds' policies and procedures provide that the Authorized Person may authorize disclosure of non-public portfolio holdings information to such parties at differing times and/or with different lag times. Prior to making any disclosure to a third party, the Authorized Person must determine that such disclosure serves a reasonable business purpose, is in the best interests of a Fund's shareholders and that to the extent conflicts between the interests of a Fund's shareholders and those of the Adviser, a Sub-Adviser, principal underwriter, or any affiliated person of the Funds exist, such conflicts are addressed. Portfolio holdings information may be disclosed no more frequently than monthly to ratings agencies, consultants and other qualified financial professionals or individuals. The disclosures will not be made sooner than three days after the date of the information. The Trust's Chief Compliance Officer will regularly review these arrangements and will make periodic reports to the Board regarding disclosure pursuant to such arrangements.

With the exception of disclosures to rating and ranking organizations as described above, the Funds require any third party receiving non-public holdings information to enter into a confidentiality agreement with the Adviser. The confidentiality agreement provides, among other things, that non-public portfolio holdings information will be kept confidential and that the recipient has a duty not to trade on the non-public information and will use such information solely to analyze and rank the Funds, or to perform due diligence and asset allocation, depending on the recipient of the information.

The Funds' policies and procedures prohibit any compensation or other consideration from being paid to or received by any party in connection with the disclosure of portfolio holdings information, including the Funds, the Adviser, the Sub-Advisers and their affiliates or recipients of the Funds' portfolio holdings information.

The Adviser and/or a Sub-Adviser may manage other accounts that are not subject to these policies and procedures with investment objectives and strategies that are substantially similar to those of a Fund. Because the portfolio holdings of such accounts may be substantially similar, and in some cases nearly identical, to those of a Fund, an investor in such an account may be able to infer the portfolio holdings of a Fund from the portfolio holdings of the account.

DESCRIPTION OF SHARES

The Declaration of Trust authorizes the issuance of an unlimited number of funds and shares of each fund, each of which represents an equal proportionate interest in that fund with each other share. Shares are entitled upon liquidation to a pro rata share in the net assets of the fund. Shareholders have no preemptive rights. The Declaration of Trust provides that the Trustees may create additional series or classes of shares. All consideration received by the Trust for shares of any additional funds and all assets in which such consideration is invested would belong to that fund and would be subject to the liabilities related thereto. Share certificates representing shares will not be issued. The Funds' shares, when issued, are fully paid and non-assessable.

LIMITATION OF TRUSTEES' LIABILITY

The Declaration of Trust provides that a Trustee shall be liable only for his or her own willful misfeasance, bad faith, gross negligence or reckless disregard of the duties involved in the conduct of the office of Trustee, and shall not be liable for errors of judgment or mistakes of fact or law. The Trustees shall not be responsible or liable in any event for any neglect or wrongdoing of any officer, agent, employee, investment adviser or principal underwriter of the Trust, nor shall any Trustee be responsible for the act or omission of any other Trustee. The Declaration of Trust also provides that the Trust shall indemnify each person who is, or has been, a Trustee, officer, employee or agent of the Trust, and any person who is serving or has served at the Trust's request as a Trustee, officer, employee or agent of another organization in which the Trust has any interest as a shareholder, creditor or otherwise to the extent and in the manner provided in the By-Laws. However, nothing in the Declaration of Trust shall protect or indemnify a Trustee against any liability for his or her willful misfeasance, bad faith, gross negligence or reckless disregard of the duties involved in the conduct of the office of Trustee. Nothing contained in this section attempts to disclaim a Trustee's individual liability in any manner inconsistent with the federal securities laws.

PROXY VOTING

The Board has delegated the responsibility for decisions regarding proxy voting for securities held by the Funds to the Adviser.

The Adviser does not invest in voting securities for the Core Bond Fund and the Limited Duration Fund.

For the Large Cap Growth Fund, Large Cap Value Fund, Small Cap Fund and International Equity Fund, the Adviser will vote such proxies in accordance with its proxy voting policies and procedures, which are included in Appendix B to this SAI.

The Adviser has delegated the responsibility for decisions regarding proxy voting for securities held by the Long/Short Equity Fund, U.S. All Cap Index Fund and Global Real Estate Fund to its Sub-Adviser. Each Sub-Adviser will vote such proxies in accordance with its proxy voting policies and procedures, which are included in Appendix B to this SAI.

The Trust is required to disclose annually the Funds' complete proxy voting record during the most recent 12-month period ended June 30 on Form N-PX. This voting record is available: (i) without charge, upon request, by calling 1-844-KC-FUNDS (1-844-523-8637) and (ii) on the SEC's website at <http://www.sec.gov>.

CODES OF ETHICS

The Board, on behalf of the Trust, has adopted a Code of Ethics pursuant to Rule 17j-1 under the 1940 Act. In addition, the Adviser, the Sub-Advisers, the Administrator and the Distributor have adopted Codes of Ethics pursuant to Rule 17j-1. These Codes of Ethics apply to the personal investing activities of trustees, officers and certain employees ("Access Persons"). Rule 17j-1 and the Codes of Ethics are designed to prevent unlawful practices in connection with the purchase or sale of securities by Access Persons. Under each Code of Ethics, Access Persons are permitted to engage in personal securities transactions, including securities that may be purchased or held by the Funds, but are required to report their personal securities transactions for monitoring purposes. In addition, certain Access Persons are required to obtain approval before investing in initial public offerings or private placements or are prohibited from making such investments. Copies of these Codes of Ethics are on file with the SEC, and are available to the public.

PRINCIPAL SHAREHOLDERS AND CONTROL PERSONS

To the knowledge of the Trust, as of February 3, 2020, no person owned beneficially or of record 5% or more of the outstanding shares of any class of any Fund, and no person is listed on the Funds' records as owning 5% or more of the outstanding voting securities of any class of any Fund, except as set forth below.

To the knowledge of the Trust, as of February 3, 2020, no person owned beneficially 25% or more of the outstanding voting securities of any Fund, and no person is listed on the Funds' records as owning 25% or more of the outstanding voting securities of any Fund, except as set forth below. Persons beneficially owning more than 25% of a Fund's outstanding shares may be deemed to "control" the Fund within the meaning of the 1940 Act. Shareholders controlling a Fund may have a significant impact on any shareholder vote of the Fund.

APPENDIX A

DESCRIPTION OF RATINGS

Description of Ratings

The following descriptions of securities ratings have been published by Moody's Investors Services, Inc. ("Moody's"), Standard & Poor's ("S&P"), and Fitch Ratings ("Fitch"), respectively.

Description of Moody's Global Ratings

Ratings assigned on Moody's global long-term and short-term rating scales are forward-looking opinions of the relative credit risks of financial obligations issued by non-financial corporates, financial institutions, structured finance vehicles, project finance vehicles, and public sector entities. Long-term ratings are assigned to issuers or obligations with an original maturity of one year or more and reflect both on the likelihood of a default or impairment on contractual financial obligations and the expected financial loss suffered in the event of default or impairment. Short-term ratings are assigned to obligations with an original maturity of thirteen months or less and reflect both on the likelihood of a default or impairment on contractual financial obligations and the expected financial loss suffered in the event of default or impairment.

Description of Moody's Global Long-Term Ratings

Aaa Obligations rated Aaa are judged to be of the highest quality, subject to the lowest level of credit risk.

Aa Obligations rated Aa are judged to be of high quality and are subject to very low credit risk.

A Obligations rated A are judged to be upper-medium grade and are subject to low credit risk.

Baa Obligations rated Baa are judged to be medium-grade and subject to moderate credit risk and as such may possess certain speculative characteristics.

Ba Obligations rated Ba are judged to be speculative and are subject to substantial credit risk.

B Obligations rated B are considered speculative and are subject to high credit risk.

Caa Obligations rated Caa are judged to be speculative of poor standing and are subject to very high credit risk.

Ca Obligations rated Ca are highly speculative and are likely in, or very near, default, with some prospect of recovery of principal and interest.

C Obligations rated C are the lowest rated and are typically in default, with little prospect for recovery of principal or interest.

Note: Moody's appends numerical modifiers 1, 2, and 3 to each generic rating classification from Aa through Caa. The modifier 1 indicates that the obligation ranks in the higher end of its generic rating category; the modifier 2 indicates a mid-range ranking; and the modifier 3 indicates a ranking in the lower end of that generic rating category.

Hybrid Indicator (hyb)

The hybrid indicator (hyb) is appended to all ratings of hybrid securities issued by banks, insurers, finance companies, and securities firms. By their terms, hybrid securities allow for the omission of scheduled dividends, interest, or principal payments, which can potentially result in impairment if such an omission occurs. Hybrid securities may also be subject to contractually allowable write-downs of principal that could result in impairment. Together with the hybrid indicator, the long-term obligation rating assigned to a hybrid security is an expression of the relative credit risk associated with that security.

Description of Moody's Global Short-Term Ratings

P-1 Issuers (or supporting institutions) rated Prime-1 have a superior ability to repay short-term debt obligations.

P-2 Issuers (or supporting institutions) rated Prime-2 have a strong ability to repay short-term debt obligations.

P-3 Issuers (or supporting institutions) rated Prime-3 have an acceptable ability to repay short-term obligations.

NP Issuers (or supporting institutions) rated Not Prime do not fall within any of the Prime rating categories.

Description of Moody's U.S. Municipal Short-Term Obligation Ratings

The Municipal Investment Grade ("MIG") scale is used to rate U.S. municipal bond anticipation notes of up to five years maturity. Municipal notes rated on the MIG scale may be secured by either pledged revenues or proceeds of a take-out financing received prior to note maturity. MIG ratings expire at the maturity of the obligation, and the issuer's long-term rating is only one consideration in assigning the MIG rating. MIG ratings are divided into three levels-MIG 1 through MIG 3-while speculative grade short-term obligations are designated SG.

Moody's U.S. municipal short-term obligation ratings are as follows:

MIG 1 This designation denotes superior credit quality. Excellent protection is afforded by established cash flows, highly reliable liquidity support, or demonstrated broad-based access to the market for refinancing.

MIG 2 This designation denotes strong credit quality. Margins of protection are ample, although not as large as in the preceding group.

MIG 3 This designation denotes acceptable credit quality. Liquidity and cash-flow protection may be narrow, and market access for refinancing is likely to be less well-established.

SG This designation denotes speculative-grade credit quality. Debt instruments in this category may lack sufficient margins of protection.

Description of Moody's Demand Obligation Ratings

In the case of variable rate demand obligations ("VRDOs"), a two-component rating is assigned: a long or short-term debt rating and a demand obligation rating. The first element represents Moody's evaluation of risk associated with scheduled principal and interest payments. The second element represents Moody's evaluation of risk associated with the ability to receive purchase price upon demand ("demand feature"). The second element uses a rating from a variation of the MIG scale called the Variable Municipal Investment Grade ("VMIG") scale.

Moody's demand obligation ratings are as follows:

VMIG 1 This designation denotes superior credit quality. Excellent protection is afforded by the superior short-term credit strength of the liquidity provider and structural and legal protections that ensure the timely payment of purchase price upon demand.

VMIG 2 This designation denotes strong credit quality. Good protection is afforded by the strong short-term credit strength of the liquidity provider and structural and legal protections that ensure the timely payment of purchase price upon demand.

VMIG 3 This designation denotes acceptable credit quality. Adequate protection is afforded by the satisfactory short-term credit strength of the liquidity provider and structural and legal protections that ensure the timely payment of purchase price upon demand.

SG This designation denotes speculative-grade credit quality. Demand features rated in this category may be supported by a liquidity provider that does not have an investment grade short-term rating or may lack the structural and/or legal protections necessary to ensure the timely payment of purchase price upon demand.

Description of S&P's Issue Credit Ratings

An S&P issue credit rating is a forward-looking opinion about the creditworthiness of an obligor with respect to a specific financial obligation, a specific class of financial obligations, or a specific financial program (including ratings on medium-term note programs and commercial paper programs). It takes into consideration the creditworthiness of guarantors, insurers, or other forms of credit enhancement on the obligation and takes into account the currency in which the obligation is denominated. The opinion reflects S&P's view of the obligor's capacity and willingness to meet its financial commitments as they come due, and this opinion may assess terms, such as collateral security and subordination, which could affect ultimate payment in the event of default.

Issue credit ratings can be either long-term or short-term. Short-term ratings are generally assigned to those obligations considered short-term in the relevant market. Short-term ratings are also used to indicate the creditworthiness of an obligor with respect to put features on long-term obligations. Medium-term notes are assigned long-term ratings.

Issue credit ratings are based, in varying degrees, on S&P's analysis of the following considerations:

- The likelihood of payment—the capacity and willingness of the obligor to meet its financial commitments on a financial obligation in accordance with the terms of the obligation;
- The nature of and provisions of the financial obligation; and the promise S&P imputes; and
- The protection afforded by, and relative position of, the financial obligation in the event of bankruptcy, reorganization, or other arrangement under the laws of bankruptcy and other laws affecting creditors' rights.

An issue rating is an assessment of default risk but may incorporate an assessment of relative seniority or ultimate recovery in the event of default. Junior obligations are typically rated lower than senior obligations, to reflect lower priority in bankruptcy, as noted above. (Such differentiation may apply when an entity has both senior and subordinated obligations, secured and unsecured obligations, or operating company and holding company obligations.)

NR indicates that a rating has not been assigned or is no longer assigned.

Description of S&P's Long-Term Issue Credit Ratings*

AAA An obligation rated 'AAA' has the highest rating assigned by S&P. The obligor's capacity to meet its financial commitments on the obligation is extremely strong.

AA An obligation rated 'AA' differs from the highest-rated obligations only to a small degree. The obligor's capacity to meet its financial commitments on the obligation is very strong.

A An obligation rated 'A' is somewhat more susceptible to the adverse effects of changes in circumstances and economic conditions than obligations in higher-rated categories. However, the obligor's capacity to meet its financial commitments on the obligation is still strong.

BBB An obligation rated 'BBB' exhibits adequate protection parameters. However, adverse economic conditions or changing circumstances are more likely to weaken the obligor's capacity to meet its financial commitments on the obligation.

BB; B; CCC; CC; and C Obligations rated 'BB', 'B', 'CCC', 'CC', and 'C' are regarded as having significant speculative characteristics. 'BB' indicates the least degree of speculation and 'C' the highest. While such obligations will likely have some quality and protective characteristics, these may be outweighed by large uncertainties or major exposure to adverse conditions.

BB An obligation rated 'BB' is less vulnerable to nonpayment than other speculative issues. However, it faces major ongoing uncertainties or exposure to adverse business, financial, or economic conditions that could lead to the obligor's inadequate capacity to meet its financial commitments on the obligation.

B An obligation rated 'B' is more vulnerable to nonpayment than obligations rated 'BB', but the obligor currently has the capacity to meet its financial commitments on the obligation. Adverse business, financial, or economic conditions will likely impair the obligor's capacity or willingness to meet its financial commitments on the obligation.

CCC An obligation rated 'CCC' is currently vulnerable to nonpayment and is dependent upon favorable business, financial, and economic conditions for the obligor to meet its financial commitments on the obligation. In the event of adverse business, financial, or economic conditions, the obligor is not likely to have the capacity to meet its financial commitments on the obligation.

CC An obligation rated 'CC' is currently highly vulnerable to nonpayment. The 'CC' rating is used when a default has not yet occurred but S&P expects default to be a virtual certainty, regardless of the anticipated time to default.

C An obligation rated 'C' is currently highly vulnerable to nonpayment, and the obligation is expected to have lower relative seniority or lower ultimate recovery compared with obligations that are rated higher.

D An obligation rated 'D' is in default or in breach of an imputed promise. For non-hybrid capital instruments, the 'D' rating category is used when payments on an obligation are not made on the date due, unless S&P believes that such payments will be made within five business days in the absence of a stated grace period or within the earlier of the stated grace period or 30 calendar days. The 'D' rating also will be used upon the filing of a bankruptcy petition or the taking of similar action and where default on an obligation is a virtual certainty, for example due to automatic stay provisions. An obligation's rating is lowered to 'D' if it is subject to a distressed exchange offer.

*Ratings from 'AA' to 'CCC' may be modified by the addition of a plus (+) or minus (-) sign to show relative standing within the rating categories.

Description of S&P's Short-Term Issue Credit Ratings

A-1 A short-term obligation rated 'A-1' is rated in the highest category by S&P. The obligor's capacity to meet its financial commitments on the obligation is strong. Within this category, certain obligations are designated with a plus sign (+). This indicates that the obligor's capacity to meet its financial commitments on these obligations is extremely strong.

A-2 A short-term obligation rated 'A-2' is somewhat more susceptible to the adverse effects of changes in circumstances and economic conditions than obligations in higher rating categories. However, the obligor's capacity to meet its financial commitments on the obligation is satisfactory.

A-3 A short-term obligation rated 'A-3' exhibits adequate protection parameters. However, adverse economic conditions or changing circumstances are more likely to weaken an obligor's capacity to meet its financial commitments on the obligation.

B A short-term obligation rated 'B' is regarded as vulnerable and has significant speculative characteristics. The obligor currently has the capacity to meet its financial commitments; however, it faces major ongoing uncertainties that could lead to the obligor's inadequate capacity to meet its financial commitments.

C A short-term obligation rated 'C' is currently vulnerable to nonpayment and is dependent upon favorable business, financial, and economic conditions for the obligor to meet its financial commitments on the obligation.

D A short-term obligation rated 'D' is in default or in breach of an imputed promise. For non-hybrid capital instruments, the 'D' rating category is used when payments on an obligation are not made on the date due, unless S&P believes that such payments will be made within any stated grace period. However, any stated grace period longer than five business days will be treated as five business days. The 'D' rating also will be used upon the filing of a bankruptcy petition or the taking of a similar action and where default on an obligation is a virtual certainty, for example due to automatic stay provisions. An obligation's rating is lowered to 'D' if it is subject to a distressed exchange offer.

Description of S&P's Municipal Short-Term Note Ratings

An S&P U.S. municipal note rating reflects S&P's opinion about the liquidity factors and market access risks unique to the notes. Notes due in three years or less will likely receive a note rating. Notes with an original maturity of more than three years will most likely receive a long-term debt rating. In determining which type of rating, if any, to assign, S&P's analysis will review the following considerations:

- Amortization schedule-the larger the final maturity relative to other maturities, the more likely it will be treated as a note; and
- Source of payment-the more dependent the issue is on the market for its refinancing, the more likely it will be treated as a note.

S&P's municipal short-term note ratings are as follows:

SP-1 Strong capacity to pay principal and interest. An issue determined to possess a very strong capacity to pay debt service is given a plus (+) designation.

SP-2 Satisfactory capacity to pay principal and interest, with some vulnerability to adverse financial and economic changes over the term of the notes.

SP-3 Speculative capacity to pay principal and interest.

D 'D' is assigned upon failure to pay the note when due, completion of a distressed exchange offer, or the filing of a bankruptcy petition or the taking of similar action and where default on an obligation is a virtual certainty, for example due to automatic stay provisions.

Description of Fitch's Credit Ratings

Fitch's credit ratings relating to issuers are an opinion on the relative ability of an entity to meet financial commitments, such as interest, preferred dividends, repayment of principal, insurance claims or counterparty obligations. Credit ratings relating to securities and obligations of an issuer can include a recovery expectation. Credit ratings are used by investors as indications of the likelihood of receiving the money owed to them in accordance with the terms on which they invested.

The terms "investment grade" and "speculative grade" have established themselves over time as shorthand to describe the categories 'AAA' to 'BBB' (investment grade) and 'BB' to 'D' (speculative grade). The terms investment grade and speculative grade are market conventions, and do not imply any recommendation or endorsement of a specific security for investment purposes. Investment grade categories indicate relatively low to moderate credit risk, while ratings in the speculative categories either signal a higher level of credit risk or that a default has already occurred.

For the convenience of investors, Fitch may also include issues relating to a rated issuer that are not and have not been rated on its webpage. Such issues are denoted 'NR.'

Fitch's credit ratings do not directly address any risk other than credit risk. In particular, ratings do not deal with the risk of a market value loss on a rated security due to changes in interest rates, liquidity and other market considerations. However, in terms of payment obligation on the rated liability, market risk may be considered to the extent that it influences the ability of an issuer to pay upon a commitment. Ratings nonetheless do not reflect market risk to the extent that they influence the size or other conditionality of the obligation to pay upon a commitment (for example, in the case of index-linked bonds).

In the default components of ratings assigned to individual obligations or instruments, the agency typically rates to the likelihood of non-payment or default in accordance with the terms of that instrument's documentation. In limited cases, Fitch may include additional considerations (i.e. rate to a higher or lower standard than that implied in the obligation's documentation).

Note: The modifiers "+" or "-" may be appended to a rating to denote relative status within major rating categories. Such suffixes are not added to the 'AAA' ratings and ratings below the 'CCC' category. For the short-term rating category of 'F1', a '+' may be appended.

Description of Fitch's Long-Term Corporate Finance Obligations Ratings

AAA Highest credit quality. 'AAA' ratings denote the lowest expectation of credit risk. They are assigned only in cases of exceptionally strong capacity for payment of financial commitments. This capacity is highly unlikely to be adversely affected by foreseeable events.

AA Very high credit quality. 'AA' ratings denote expectations of very low credit risk. They indicate very strong capacity for payment of financial commitments. This capacity is not significantly vulnerable to foreseeable events.

A High credit quality. 'A' ratings denote expectations of low credit risk. The capacity for payment of financial commitments is considered strong. This capacity may, nevertheless, be more vulnerable to adverse business or economic conditions than is the case for higher ratings.

BBB Good credit quality. 'BBB' ratings indicate that expectations of credit risk are currently low. The capacity for payment of financial commitments is considered adequate, but adverse business or economic conditions are more likely to impair this capacity.

BB Speculative. 'BB' ratings indicate an elevated vulnerability to credit risk, particularly in the event of adverse changes in business or economic conditions over time; however, business or financial alternatives may be available to allow financial commitments to be met.

B Highly speculative. 'B' ratings indicate that material credit risk is present.

CCC Substantial credit risk. 'CCC' ratings indicate that substantial credit risk is present.

CC Very high levels of credit risk. 'CC' ratings indicate very high levels of credit risk.

C Exceptionally high levels of credit risk. 'C' ratings indicate exceptionally high levels of credit risk.

Ratings in the categories of 'CCC', 'CC' and 'C' can also relate to obligations or issuers that are in default. In this case, the rating does not opine on default risk but reflects the recovery expectation only.

Defaulted obligations typically are not assigned 'RD' or 'D' ratings, but are instead rated in the 'CCC' to 'C' rating categories, depending on their recovery prospects and other relevant characteristics. This approach better aligns obligations that have comparable overall expected loss but varying vulnerability to default and loss.

Description of Fitch's Short-Term Ratings

A short-term issuer or obligation rating is based in all cases on the short-term vulnerability to default of the rated entity and relates to the capacity to meet financial obligations in accordance with the documentation governing the relevant obligation. Short-term deposit ratings may be adjusted for loss severity. Short-Term Ratings are assigned to obligations whose initial maturity is viewed as “short term” based on market convention. Typically, this means up to 13 months for corporate, sovereign, and structured obligations, and up to 36 months for obligations in U.S. public finance markets.

Fitch's short-term ratings are as follows:

F1 Highest short-term credit quality. Indicates the strongest intrinsic capacity for timely payment of financial commitments; may have an added “+” to denote any exceptionally strong credit feature.

F2 Good short-term credit quality. Good intrinsic capacity for timely payment of financial commitments.

F3 Fair short-term credit quality. The intrinsic capacity for timely payment of financial commitments is adequate.

B Speculative short-term credit quality. Minimal capacity for timely payment of financial commitments, plus heightened vulnerability to near term adverse changes in financial and economic conditions.

C High short-term default risk. Default is a real possibility.

RD Restricted default. Indicates an entity that has defaulted on one or more of its financial commitments, although it continues to meet other financial obligations. Typically applicable to entity ratings only.

D Default. Indicates a broad-based default event for an entity, or the default of a short-term obligation.

APPENDIX B

PROXY VOTING POLICIES AND PROCEDURES

Exhibit	Investment Adviser or Sub-Adviser	Document
A	Knights of Columbus Asset Advisors LLC	Proxy Voting Policies and Procedures
B	L2 Asset Management, LLC	Proxy Voting Policies and Procedures
C	Ranger Global Real Estate Advisors, LLC	Proxy Voting Policies and Procedures

EXHIBIT A

KNIGHTS OF COLUMBUS ASSET ADVISORS LLC PROXY VOTING POLICIES AND PROCEDURES

A. STATEMENT OF POLICY

Rule 206(4)-6 of the Advisers Act requires any adviser who votes proxies on behalf of clients to have written policies and procedures regarding how they vote proxies.

The Adviser has adopted Proxy Voting Policies and Procedures, which it believes are reasonably designed to ensure that proxies are voted in the best interest of its Clients and Rule 206(4)-6 under the Advisers Act.

B. RESPONSIBILITY FOR IMPLEMENTING THIS POLICY

The CCO, or designee, is responsible for implementing, updating and monitoring the Proxy Voting Policies and Procedures, for ensuring appropriate disclosure is provided to Clients, and assisting in the resolution of conflicts of interests which may arise with regards to certain proxies. The Adviser is also responsible for maintaining, as part of the Adviser's books and records, copies of the Adviser procedures, proxy records and backup documentation relating to voting decisions and conflict resolution in accordance with applicable record keeping requirements.

C. PROCEDURES TO IMPLEMENT THIS POLICY

The proxy voting procedures may be amended from time to time at the sole discretion of the Adviser. Generally, it is the policy of the Adviser to accept the authority to vote proxies related to securities held in Client accounts.

The Adviser may delegate its responsibilities under these Proxy Voting Policies and Procedures to a third party, provided that the Adviser retains final authority and fiduciary responsibility for proxy voting. If the Adviser so delegates its responsibilities, the Adviser shall monitor the delegate's compliance with these Proxy Voting Policies and Procedures. With respect to select Knights of Columbus Funds, the Adviser will delegate such authority to the applicable sub-adviser for a Fund in accordance with the terms of the applicable investment advisory agreement including the guidelines. While retaining final authority to determine how each proxy is voted, the Adviser has reviewed and determined to follow in most instances the proxy voting policies and recommendations (the "Guidelines") of its third party provider (the "Provider"), a proxy research and consulting firm. The Provider will track each proxy that the Adviser is authorized to vote on behalf of its clients and will make a recommendation to management of the Adviser as how it would vote such proxy in accordance with the Guidelines. Unless otherwise directed by KOCAA, The Provider will instruct a proxy voting firm to vote on such matters on the Adviser's behalf in accordance with its recommendations. The Adviser will monitor the recommendations from The Provider and may override specific recommendations and may modify the Guidelines in the future.

The Adviser shall vote proxies on securities held by clients based upon two primary guidelines: Standard Proxy Voting Principles and Guidelines and Catholic Proxy Voting Principles and Guidelines. The Adviser will seek direction from its clients as to which guidelines best suits their needs.

The Adviser shall vote proxies on securities in the best economic interests of the Clients or, where employee benefit plan assets (ERISA) are involved, in the best economic interests of plan participants and beneficiaries, as determined by the Adviser in good faith. As a matter of policy, the officers, directors and employees of the Adviser will not be influenced by outside sources whose interests conflict with the interests of Clients, or their participants or beneficiaries when applicable. Any conflict of interest will be resolved in the interests of the Client, or the participants and beneficiaries when applicable.

For more information regarding the Proxy Voting Policies and Procedures, please see the Standard Proxy Voting Principles & Guidelines and the Catholic Screened Proxy Voting Principals and Guidelines, both attached as Exhibits to this policy.

Upon client direction to vote according to Catholic Guidelines, the Adviser shall vote proxies on securities in accordance with guidance by the United States Council of Catholic Bishops (USCCB). For applicable accounts, one of the primary factors the Adviser considers when determining the desirability of investing in a particular company is the screening of that company for complying with USCCB Investment Guidelines as determined by The Provider and depth of that company's management. Accordingly, the Adviser believes that the recommendation of The Provider's Catholic Screening criteria for Catholic Screened accounts, and management recommendations as interpreted by The Provider on any other issue should be given substantial weight in determining how proxy issues should be resolved. As a matter of practice for those clients who provide the Advisor with direction to vote according to Catholic Guidelines, the vote with respect to most issues will be cast in accordance with USCCB standards and The Provider's recommendations. However, each issue will be considered on its merits and the position of a company's management will not be supported if it is determined that ratification of management's position would adversely affect the investment merits of owning the stock. For more information regarding the Catholic Proxy Voting Policies and Procedures, please see the Catholic Proxy Voting Principles and Guidelines, attached as an Exhibit to this policy.

Limitations on the Adviser's Responsibilities

Instruction by Client - In general, the Adviser has full discretionary authority to exercise voting rights for Client accounts unless the Client has contractually reserved the obligation and right to vote proxies itself. The Adviser shall vote proxies in accordance with any resolutions or other instructions communicated to the Adviser by a Client or its representatives from time to time. The Adviser may accept directions from Clients to vote proxies in a manner which may result in their proxies being voted in a manner which is different from that which the Adviser might vote proxies of other Clients over which the Adviser has full discretionary authority. With respect to ERISA accounts, the Adviser will only accept instructions to the extent those instructions will not conflict with the best economic interests of plan participants and beneficiaries as determined by the Adviser in good faith.

Securities Held - The Adviser generally will vote proxies with respect to securities held by a Client as of the Record Date of the proxy.

Voting Restrictions - Nothing in these policies shall oblige the Adviser to exercise voting rights with respect to a security held by a Client if such exercise on behalf of the Client is restricted or prohibited by the terms of the security or by applicable law or otherwise.

Limited Value. The Adviser may abstain from voting a client proxy if the Adviser concludes that the effect on client's economic interests or the value of the portfolio holding is indeterminable or insignificant.

Unjustifiable Costs. The Adviser may abstain from voting a client proxy for cost reasons (e.g., costs associated with voting proxies of non-U.S. securities). In accordance with its fiduciary duties, the Adviser weighs the costs and benefits of voting proxy proposals relating to foreign securities and makes an informed decision with respect to whether voting a given proxy proposal is prudent. The Adviser's decision takes into account the effect that the vote of its clients, either by itself or together with other votes, is expected to have on the value of its client's investment and whether this expected effect would outweigh the cost of voting.

The CCO will monitor, evaluate and update the Procedures, as appropriate, including:

- Confirming that on an annual basis proxies have been voted in accordance with this policy and Client specific instructions and guidelines;
- When a material conflict of interest has been identified, taking the necessary steps to resolve the matter in a manner determined by the Adviser to be in the best interest of the Client, which may include utilizing an independent third party to vote such proxies; and
- Reviewing these Policies and procedures at least annually to assess their adequacy.
- The Adviser shall, from time to time, designate a person to monitor the implementation of, and compliance with, these proxy voting procedures, such person will be identified in Appendix B to these procedures. That person will be deemed the *Proxy Administrator* for purposes of these procedures

Client Disclosure

The Adviser includes a description of its policies and procedures regarding proxy voting in Part 2 of its Form ADV, along with a statement that Clients can contact the CCO to obtain a copy of these policies and procedures. In the event of any material change to the Adviser's policies and procedures, an update to Part 2 of Form ADV will be made. A client for which the Adviser is responsible for voting proxies may obtain information from the Adviser, via The Provider and Proxy Edge records, regarding how the Adviser voted the client's proxies. Any request for information about proxy voting should be promptly forwarded to the CCO, who will respond to any such requests.

Maintaining Records

The Adviser's Proxy Administrator will be responsible for maintaining the following records:

- A copy of the Adviser's policies and procedures and all amendments
- Copies of each proxy received
- Copies of communications with Clients regarding proxy voting
- Evidence of disclosure of the Proxy Voting Policies to Clients
- A record of votes cast
- A record of each Client's request for proxy voting records
- Any documentation created that is material to the voting decisions
- Any documentation created relating to the resolution of conflicts
- Copies of all periodic and annual evaluations of the Procedures

The Adviser may also rely upon a third party, such as The Provider or Proxy Edge to maintain certain records stated above.

Conflicts of Interest

In some instances it is possible for a proxy voting decision to present a conflict of interest between the interest of Clients or their participants or beneficiaries, on the one hand, and those of the Adviser (or any entity controlling, controlled by or under common control with the Adviser), the portfolio managers or another Client (or a sought-after client) on the other hand.

In identifying all actual or potential conflicts of interest with respect to each proxy to be voted, the individual responsible for voting a proxy shall take steps reasonably designed to determine whether that individual, the Adviser (or any entity controlling, controlled by or under common control with the Adviser), or any officer of the Adviser (or any entity controlling, controlled by or under common control with the Adviser) has any business or personal interest or relationship with the company soliciting the proxy that might influence that individual or the Adviser to vote Client proxies in a manner that might not be in its Clients' best interests, considering the nature of the Adviser's business and its Clients, the company soliciting the proxy, the proxy proposal, and any other relevant circumstances.

If a potential or actual conflict of interest appears to be material (i.e., not so clearly immaterial or remote as to be unlikely to influence any determination made), in order to ensure a resolution of the material conflict in the best interest of the Client, that proxy will be reviewed and voted by one of the other individuals identified in Appendix B. If all possible reviewers are subject to a material conflict of interest or the Adviser as a whole is subject to a material conflict of interest, the proxy will be voted according to the recommendation of an independent third party, such as The Provider.

A material conflict of interest may exist in situations where, for example:

the company soliciting the proxy, or a person known to be an affiliate of such company, is a client of the Adviser (or any entity controlling, controlled by or under common control with the Adviser) whose assets the Adviser actively manages;

the company soliciting the proxy, or a person known to be an affiliate of such company, to the knowledge of the individual charged with voting the proxy, is being actively solicited to be a client of the Adviser (or any entity controlling, controlled by or under common control with the Adviser);

a client or a client-supported interest group actively supports a proxy proposal; or

the Adviser (or any entity controlling, controlled by or under common control with the Adviser) or an officer of the Adviser (or any entity controlling, controlled by or under common control with the Adviser) has personal or other business relationships with participants in proxy contests, corporate directors or candidates for corporate directorships, or in any other matter coming before shareholders - for example, where an officer of the Adviser (or any entity controlling, controlled by or under common control with the Adviser) has a spouse or other close relative who serves a director or executive of the company soliciting the proxy.

The Proxy Administrator will maintain records of any conflicts of interest identified and the steps taken to address the conflict of interest. In the event that it is necessary to rely on an independent third party recommendation, a record of any such recommendation will also be maintained.

EXHIBIT B

L2 ASSET MANAGEMENT, LLC PROXY VOTING POLICIES AND PROCEDURES

An investment adviser has a duty of care and loyalty to its clients with respect to monitoring corporate events and exercising proxy authority in the best interests of its clients. As an SEC-registered investment advisor, L2 Asset Management, LLC (the “Firm”) has the authority to vote proxies on behalf of all clients. The Firm will adhere to Rule 206(4)-6 of the Advisers Act and all other applicable laws and regulations in regard to the voting of proxies, as well as the USCCB proxy voting guidelines as implemented by Institutional Shareholder Services, Inc. (“ISS”).

This Proxy Voting Policy is designed to address the complexities which may arise in cases where the Firm’s interests conflict or appear to conflict with the interests of its investors and to communicate to the Firm’s investors the methods and rationale whereby the Firm exercises proxy authority.

Proxy Decision-Making

The Firm’s general policy is to vote- not abstain from voting- on all issues presented on portfolio securities held for its clients. The Firm considers all issues presented for a vote of security holders from an investment point of view and voted in the best investment interests of the beneficial owners of the client account holding the securities that are being voted, with the goal of maximizing the long-term value of the client account. Except as described below under “Non-Voting of Proxies”, consistent with this goal, and to facilitate voting of portfolio securities, the Firm generally will vote in accordance with recommendations made by ISS.

All employees of the Firm have a duty to report any potential conflict of interest of which they become aware regarding voting on behalf of client accounts. The Firm will consider all potential conflicts of interest brought to its attention, or otherwise coming to its attention, and will determine whether there exists a material conflict of interest with respect to the vote in question. A conflict of interest will be considered material to the extent that it is determined that such conflict has the potential to influence the Firm’s decision-making regarding the vote. Where it is deemed that a material conflict of interest does not exist, the Firm may cast such vote, subject to the duty to act solely in the best interest of the clients.

The Firm may also consider information from other sources, including the management of a company presenting a proposal, shareholder groups, and independent proxy research services (such as ISS).

Where the Firm deviates from the guidelines listed below, or depends upon a third party to make the decision, the reasons shall be documented. The Firm may consult with such other experts, such as CPA’s, investment bankers, attorneys, etc., as it regards necessary to help it reach informed decisions.

Non-Voting of Proxies

The Firm will generally not vote proxies if they are received for equity securities where, at the time of receipt or as of the record date, the Firm no longer holds that position in any of the Funds it advises.

In addition, there may be situations where a proxy is not voted due to a conflict of interest (see “Conflicts of Interest”, below.)

Management Proposals

Absent good reason to the contrary, the Firm will generally give substantial weight to management recommendations regarding voting. This is based on the view that management is usually in the best position to know which corporate actions are in the best interests of common shareholders as a whole.

The Firm will vote for routine matters proposed by issuer management, such as setting a time or place for an annual meeting, changing the name or fiscal year of the company, or voting for directors in favor of the management proposed slate. Other routine matters in which the Firm will vote along with company management include: appointment of auditors, fees paid to board members, and change in the board structure.

Non-Routine Matters

Non-routine matters might include such things as (1) amendments to management incentive plans, (2) the authorization of additional common or preferred stock, (3) initiation or termination of barriers to takeover or acquisition, (4) mergers or acquisitions, (5) changes in the state of incorporation, (6) corporate reorganizations, (7) term limits for board members, and (8) “contested” director slates. In non-routine matters, the Firm will attempt to be generally familiar with the questions at issue. Non-routine matters will be voted on a case-by-case basis, given the complexity of many of these issues.

Conflicts of Interest

Potential conflicts of interest between the Firm and its clients may arise when the Firm’s relationships with an issuer or with a related third party actually conflict, or appear to conflict, with the best interests of its clients.

If the issue is specifically addressed in these policies and procedures, the Firm will vote in accordance with this Proxy Voting Policy. In a situation where the issue is not specifically addressed in this Proxy Voting Policy and an apparent or actual conflict exists, the Firm shall either: i) delegate the voting decision to an independent third party; ii) inform clients of the conflict of interest and obtain advance consent of a majority of such clients for a particular voting decision; or iii) not vote.

This document is available to any client of the Firm upon request. The Firm will also make available the record of the Firm’s votes promptly upon request. Please contact the Firm’s CCO for additional information at: 508-358-4301.

EXHIBIT C

RANGER GLOBAL REAL ESTATE ADVISORS, LLC PROXY VOTING POLICIES AND PROCEDURES

Ranger Global Real Estate Advisors, LLC (the “Firm”) has adopted these policies and procedures in accordance with Rule 206(4)-6 of the Advisers Act with respect to the Firm’s proxy voting on behalf of securities held by the Firm’s client portfolios.

I. OBJECTIVES

The Firm has three overall objectives in exercising voting rights:

(a) **Responsibility.** The Firm shall seek to ensure that there is an effective means in place to hold companies accountable for their actions. While management must be accountable to its board, the board must be accountable to a company's shareholders. Although accountability can be promoted in a variety of ways, protecting shareholder voting rights may be among our most important tools.

(b) **Rationalizing Management and Shareholder Concerns.** The Firm seeks to ensure that the interests of a company's management and board are aligned with those of the company's shareholders. In this respect, compensation must be structured to reward the creation of shareholder value.

(c) **Shareholder Communication.** Since companies are owned by their shareholders, the Firm seeks to ensure that management effectively communicates with its owners about the company's business operations and financial performance. It is only with effective communication that shareholders will be able to assess the performance of management and to make informed decisions on when to buy, sell or hold a company's securities.

II. GENERAL PRINCIPLES

In exercising voting rights, the Firm shall conduct itself in accordance with the general principles set forth below:

(a) The ability to exercise a voting right with respect to a security is a valuable right and, therefore, must be viewed as part of the asset itself.

(b) In exercising voting rights, the Firm shall engage in a careful evaluation of issues that may materially affect the rights of shareholders and the value of the security.

(c) Consistent with general fiduciary principles, the exercise of voting rights shall always be conducted with reasonable care, prudence and diligence.

(d) In exercising voting rights on behalf of clients, the Firm shall conduct itself in the same manner as if the Firm were the constructive owner of the securities.

(e) To the extent reasonably possible, the Firm shall participate in each shareholder voting opportunity.

(f) Voting rights shall not automatically be exercised in favor of management-supported proposals.

(g) The Firm, and its officers and employees, shall never accept any item of value in consideration of a favorable proxy voting decision.

Set forth below are general guidelines that the Firm shall follow in exercising proxy voting rights:

(a) Prudence. In making a proxy voting decision, the Firm shall give appropriate consideration to all relevant facts and circumstances, including the value of the securities to be voted and the likely effect any vote may have on that value. Since voting rights must be exercised on the basis of an informed judgment, investigation shall be a critical initial step.

(b) Third Party Views. While the Firm may consider the views of third parties, the Firm shall never base a proxy voting decision solely on the opinion of a third party. Rather, decisions shall be based on a reasonable and good faith determination as to how best to maximize shareholder value.

(c) Shareholder Value. Just as the decision whether to purchase or sell a security is a matter of judgment, determining whether a specific proxy resolution will increase the market value of a security is a matter of judgment as to which informed parties may differ. In determining how a proxy vote may affect the economic value of a security, the Firm shall consider both short-term and long-term views about a company's business and prospects, especially in light of our projected holding period on the stock (e.g., the Firm may discount long-term views on a short-term holding).

III. SPECIFIC ISSUES

Set forth below are guidelines as to how specific proxy voting issues shall be analyzed and assessed. While these guidelines will provide a framework for the Firm's decision making process, the mechanical application of these guidelines can never address all proxy voting decisions. When new issues arise or old issues present nuances not encountered before, the Firm must be guided by its reasonable judgment to vote in a manner that the Firm deems to be in the best interests of its clients.

3.1 *Stock-Based Compensation*

Approval of Plans or Plan Amendments. By their nature, compensation plans must be evaluated on a case-by-case basis. As a general matter the Firm always favors compensation plans that align the interests of management and shareholders. The Firm generally approves compensation plans under the following conditions:

(a) 10% Rule. The dilution effect of the newly authorized shares, plus the shares reserved for issuance in connection with all other stock related plans, generally should not exceed 10%.

(b) Exercise Price. The minimum exercise price of stock options should be at least equal to the market price of the stock on the date of grant.

(c) Plan Amendments. Compensation plans should not be materially amended without shareholder approval.

(d) Non-Employee Directors. Awards to non-employee directors should not be subject to management discretion but rather should be made under non-discretionary grants specified by the terms of the plan.

(e) Repricing/Replacement of Underwater Options. Stock options generally should not be re-priced, and never should be re-priced without shareholder approval. In addition, companies should not issue new options, with a lower strike price, to make up for previously issued options that are substantially underwater. The Firm will vote against the election of any slate of directors that, to its knowledge, has authorized a company to re-price or replace underwater options during the most recent year without shareholder approval.

(f) **Reload/Evergreen Features.** The Firm will generally vote against plans that enable the issuance of reload options and that provide an automatic share replenishment (“evergreen”) feature.

(g) **Measures to Increase Executive Long-Term Stock Ownership.** The Firm supports measures to increase the long-term stock ownership by a company’s executives. These include requiring senior executives to hold a minimum amount of stock in a company (often expressed as a percentage of annual compensation), requiring stock acquired through option exercise to be held for a certain minimum amount of time, and issuing restricted stock awards instead of options. In this respect, the Firm supports the expensing of option grants because it removes the incentive of a company to issue options in lieu of restricted stock. The Firm also support employee stock purchase plans, although we generally believe the discounted purchase price should be at least eight-five percent (85%) of the current market price.

(h) **Vesting.** Restricted stock awards normally should vest over at least a two-year period.

(i) **Other stock awards.** Stock awards other than stock options and restricted stock awards should be granted in lieu of salary or a cash bonus, and the number of shares awarded should be reasonable.

3.2 Change of Control Issues

While the Firm recognizes that a takeover attempt can be a significant distraction for the board and management to deal with, the simple fact is that the possibility of a corporate takeover keeps management focused on maximizing shareholder value. As a result, the Firm opposes measures that are designed to prevent or obstruct corporate takeovers because they can entrench current management. The following are the Firm’s guidelines on change of control issues:

(a) **Shareholder Rights Plans.** The Firm acknowledges that there are arguments for and against shareholder rights plans, also known as “poison pills.” Companies should put their case for rights plans to shareholders. The Firm generally votes against any directors who, without shareholder approval, to the Firm’s knowledge have instituted a new poison pill plan, extended an existing plan, or adopted a new plan upon the expiration of an existing plan during the past year.

(b) **Golden Parachutes.** The Firm opposes the use of accelerated employment contracts that result in cash grants of greater than three times annual compensation (salary and bonus) in the event of termination of employment following a change in control of a company. In general, the guidelines call for voting against “golden parachute” plans because they impede potential takeovers that shareholders should be free to consider. The Firm generally withholds its votes at the next shareholder meeting for directors who to our knowledge approved golden parachutes.

(c) **Approval of Mergers.** The Firm votes against proposals that require a super-majority of shareholders to approve a merger or other significant business combination. The Firm supports proposals that seek to lower super-majority voting requirements.

3.3 Routine Issues

(a) **Director Nominees in a Non-Contested Election.** The Firm generally votes in favor of management proposals on director nominees.

(b) **Director Nominees in a Contested Election.** By definition, this type of board candidate or slate runs for the purpose of seeking a significant change in corporate policy or control. Therefore, the economic impact of the vote in favor of or in opposition to that director or slate must be analyzed using a higher standard normally applied to changes in control. Criteria for evaluating director nominees as a group or individually should include: performance; compensation, corporate governance provisions and takeover activity; criminal activity; attendance at meetings; investment in the company; interlocking directorships; inside, outside and independent directors; whether the chairman and CEO titles are held by the same person; number of other board seats; and other experience. It is impossible to have a general policy regarding director nominees in a contested election.

(c) **Board Composition.** The Firm supports the election of a board that consists of at least a majority of independent directors. The Firm generally withholds its support for non-independent directors who serve on a company's audit, compensation and/or nominating committees. The Firm also generally withholds support for director candidates who have not attended a sufficient number of board or committee meetings to effectively discharge their duties as directors.

(d) **Classified Boards.** Because a classified board structure prevents shareholders from electing a full slate of directors at annual meetings, the Firm generally votes against classified boards. The Firm votes in favor of shareholder proposals to declassify a board of directors unless a company's charter or governing corporate law allows shareholders, by written consent, to remove a majority of directors at any time, with or without cause.

(e) **Barriers to Shareholder Action.** The Firm votes to support proposals that lower the barriers to shareholder action. This includes the right of shareholders to call a meeting and the right of shareholders to act by written consent.

(f) **Cumulative Voting.** Having the ability to cumulate votes for the election of directors - that is, cast more than one vote for a director about whom they feel strongly - generally increases shareholders' rights to effect change in the management of a corporation. The Firm generally supports, therefore, proposals to adopt cumulative voting.

(g) **Ratification of Auditors.** Votes generally are cast in favor of proposals to ratify an independent auditor, unless there is a reason to believe the auditing firm is no longer performing its required duties or there are exigent circumstances requiring the Firm to vote against the approval of the recommended auditor. For example, our general policy is to vote against an independent auditor that receives more than fifty percent (50%) of its total fees from a company for non-audit services.

3.4 Stock Related Items

Increase Additional Common Stock. The Firm's guidelines generally call for approval of increases in authorized shares, provided that the increase is not greater than three times the number of shares outstanding and reserved for issuance (including shares reserved for stock-related plans and securities convertible into common stock, but not shares reserved for any poison pill plan).

Votes generally are cast in favor of proposals to authorize additional shares of stock except where the proposal: (a) creates a blank check preferred stock; or (b) establishes classes of stock with superior voting rights.

(a) **Blank Check Preferred Stock.** Votes generally are cast in opposition to management proposals authorizing the creation of new classes of preferred stock with unspecific voting, conversion, distribution and other rights, and management proposals to increase the number of authorized blank check preferred shares. The Firm may vote in favor of this type of proposal when it receives assurances to its reasonable satisfaction that (i) the preferred stock was authorized by the board for the use of legitimate capital formation purposes and not for anti-takeover purposes, and (ii) no preferred stock will be issued with voting power that is disproportionate to the economic interests of the preferred stock. These representations should be made either in the proxy statement or in a separate letter from the company to the Firm.

(b) Preemptive Rights. Votes are cast in favor of shareholder proposals restoring limited preemptive rights.

(c) Dual Class Capitalizations. Because classes of common stock with unequal voting rights limit the rights of certain shareholders, the Firm votes against adoption of a dual or multiple class capitalization structure.

3.5 *Social Issues*

The Firm believes that it is the responsibility of the board and management to run a company on a daily basis. With this in mind, in the absence of unusual circumstances, the Firm does not believe that shareholders should be involved in determining how a company should address broad social and policy issues. As a result, the Firm generally votes against these types of proposals, which are generally initiated by shareholders, unless we believe the proposal has significant economic implications.

3.6 *Other Situations*

No set of guidelines can anticipate all situations that may arise. The Firm's portfolio managers and analysts will be expected to analyze proxy proposals in an effort to gauge the impact of a proposal on the financial prospects of a company, and vote accordingly. These policies are intended to provide guidelines for voting. They are not, however, hard and fast rules because corporate governance issues are so varied.

IV. PROXY VOTING PROCEDURES

The Firm shall maintain a record of all voting decisions for the period required by applicable laws. In each case in which the Firm votes contrary to the stated policies set forth in these guidelines, the record shall indicate the reason for such a vote.

The CIO shall have responsibility for voting proxies. The CIO shall be responsible for ensuring that he or she is aware of all upcoming proxy voting opportunities. The CIO shall ensure that proxy votes are properly recorded and that the requisite information regarding each proxy voting opportunity is maintained. The CCO shall have overall responsibility for ensuring that the Firm complies with all proxy voting requirements and procedures.

V. RECORDKEEPING

The CIO shall be responsible for recording and maintaining the following information with respect to each proxy voted by the Firm: (a) the name of the company; (b) ticker symbol; (c) CUSIP number; (d) shareholder meeting date; (e) brief identification of each matter voted upon; (f) whether the matter was proposed by management or a shareholder; (g) whether the Firm voted on the matter; (h) if the Firm voted and how the Firm voted; and (i) whether the Firm voted with or against management.

The CCO shall be responsible for maintaining and updating these Policies and Procedures, and for maintaining any records of written client requests for proxy voting information and documents that were prepared by the Firm and were deemed material to making a voting decision or that memorialized the basis for the decision.

The Firm shall rely on the SEC's EDGAR filing system with respect to the requirement to maintain proxy materials regarding client securities.

VI. CONFLICTS OF INTEREST

There may be situations in which the Firm may face a conflict between its interests and those of its clients or fund shareholders. Potential conflicts are most likely to fall into three general categories:

(a) **Business Relationships.** This type of conflict would occur if the Firm or an affiliate has a substantial business relationship with the company or a proponent of a proxy proposal relating to the company (such as an employee group) such that failure to vote in favor of management (or the proponent) could harm the relationship of the Firm or its affiliate with the company or proponent.

(b) **Personal Relationships.** The Firm or an affiliate could have a personal relationship with other proponents of proxy proposals, participants in proxy contests, corporate directors or director nominees.

(c) **Familial Relationships.** The Firm or an affiliate could have a familial relationship relating to a company (e.g., spouse or other relative who serves as a director or nominee of a public company).

The next step is to identify if a conflict is material. A material matter is one that is reasonably likely to be viewed as important by the average shareholder. Materiality will be judged under a two-step approach:

(a) **Financial Based Materiality.** The Firm presumes a conflict to be non-material unless it involves at least five hundred thousand dollars (\$500,000).

(b) **Non-Financial Based Materiality.** Non-financial based materiality would impact the members of the Firm's portfolio management team, who are responsible for evaluating and making proxy voting decisions.

Finally, if a material conflict exists, the Firm shall vote in accordance with the advice of a proxy voting service. The Firm currently uses ISS to provide advice on proxy voting decisions.

The CCO shall have responsibility for supervising and monitoring conflicts of interest in the proxy voting process according to the following process:

(a) **Identifying Conflicts.** The CCO is responsible for monitoring the relationships of the Firm for purposes of its Proxy Voting Guidelines. For purposes of monitoring personal or familial relationships, the CCO shall receive on at least an annual basis from each member of the portfolio management team written disclosure of any personal or familial relationships with public company directors that could raise potential conflict of interest concerns. Portfolio management team members also shall agree in writing to advise the CCO if (i) there are material changes to any previously furnished information, (ii) a person with whom a personal or familial relationship exists is subsequently nominated as a director or (iii) a personal or familial relationship exists with any proponent of a proxy proposal or a participant in a proxy contest.

(b) **Identifying Materiality.** The CCO shall be responsible for determining whether a conflict is material. He or she shall evaluate financial-based materiality in terms of both actual and potential fees to be received. Non-financial based items impacting a member of the portfolio management team shall be presumed to be material.

(c) **Communication with CIO; Voting of Proxy.** If the CCO determines that the relationship is financially material, the CCO shall communicate that information to the CIO and instruct him or her that the Firm will vote its proxy based on the advice of Institutional Shareholder Services or other consulting firm then engaged by the Firm. Any personal or familial relationship, or any other business relationship, that exists between a company and any member of the portfolio management team shall be presumed to be material, in which case the Firm again will vote its proxy based on the advice of Institutional Shareholder Services or other consulting firm then engaged by the Firm. The fact that a member of the portfolio management team personally owns securities issued by a company will not disqualify the Firm from voting common stock issued by that company, since the member's personal and professional interests will be aligned.

In cases in which the Firm will vote its proxy based on the advice of ISS or other consulting firm then engaged by the Firm, the CCO shall be responsible for ensuring that the CIO votes proxies in this manner. The CCO will maintain a written record of each instance when a conflict arises and how the conflict is resolved (e.g., whether the conflict is judged to be material, the basis on which the materiality is decision is made and how the proxy is voted).

7. REGISTERED INVESTMENT COMPANIES

Proxies relating to portfolio securities held by any fund advised by the Firm shall be voted in accordance with this Statement of Policies and Procedures. For this purpose, the Board of Trustees of the James Alpha Global Real Estate Investments Fund (the “Registered Investment Company”) has delegated to the Firm the responsibility for voting proxies on behalf of the Registered Investment Company. The CCO shall make an annual presentation to the Board regarding this Statement of Policy and Procedures, including whether any revisions are recommended, and shall report to the Board at each regular, quarterly meeting with respect to any conflict of interest situation that arose regarding the proxy voting process.

8. ANNUAL REVIEW; REPORTING

The CCO shall conduct an annual review to assess compliance with these policies and procedures. This review will include sampling a limited number of proxy votes during the prior year to determine if they were consistent with these policies and procedures. The results of this review will be reported to the Board of Trustees and the chief compliance officer of the Registered Investment Company.

Any violations of these policies and procedures shall be reported to the CCO. If the violation relates to any fund advised by the Firm, the CCO shall report such violation to the chief compliance officer of the Registered Investment Company.
