This Supplement provides new and additional information beyond that contained in the Summary Prospectuses, Prospectus and SAI, and should be read in conjunction with the Summary Prospectuses, Prospectus and SAI.

Effective October 1, 2019 (the “Effective Date”), Knights of Columbus Asset Advisors LLC (the “Adviser”) acquired the assets of Boston Advisors, LLC’s (“Boston Advisors”) institutional client business (the “Transaction”). The institutional client business of Boston Advisors involves, among other things, Boston Advisors’ business of providing sub-advisory services to certain client accounts and funds managed by the Adviser, including the Funds. In connection with the Transaction, Boston Advisors is now a division of the Adviser, resulting in a unified investment management business. The former Boston Advisors’ business is now the equity investment management business of the Adviser and the Adviser will continue its legacy business of managing fixed income assets.

In connection with the Transaction, as of the Effective Date, (1) Mr. Michael J. Vogelzang no longer serves as a portfolio manager of the Funds; (2) Mr. Eric Eaton was added as a portfolio manager of the Funds; (3) Mr. Douglas A. Riley and Mr. James W. Gaul were added as portfolio managers of the Catholic Investor International Equity Fund; (4) each of the portfolio managers of the Funds as of the Effective Date, and certain other employees of Boston Advisors prior to the Effective Date, became employees of the Adviser as part of its equity investment
management business; and (5) the sub-advisory agreement between the Adviser and Boston Advisors with respect to each Fund was terminated, and, pursuant to the existing investment advisory agreement between the Adviser and the Trust, the equity investment management business of the Adviser assumed the day-to-day portfolio management responsibilities performed by Boston Advisors for each Fund prior to the Effective Date.

Accordingly, as of the Effective Date, the Summary Prospectuses, Prospectus and SAI are hereby amended and supplemented as follows:

1. **All references and information relating to Mr. Michael J. Vogelzang are hereby deleted.**

2. **The references to “Boston Advisors” or “the Sub-Adviser” in the “Principal Investment Strategies” and “Principal Risks” sections of each Fund’s Summary Prospectus, and the corresponding sections of the Prospectus, are hereby deleted and replaced with “the Adviser.”**

3. **The disclosure in the “Portfolio Managers” section of the Catholic Investor Large Cap Growth Fund’s Summary Prospectus, the Catholic Investor Large Cap Value Fund’s Summary Prospectus and the Catholic Investor Small Cap Fund’s Summary Prospectus, and the corresponding sections of the Prospectus, is hereby deleted and replaced with the following:**

   Mr. Douglas A. Riley, CFA, Vice President and Portfolio Manager, has managed the Fund since its inception in 2015.

4. **The disclosure in the “Portfolio Managers” section of the Catholic Investor International Equity Fund’s Summary Prospectus, and the corresponding section of the Prospectus, is hereby deleted and replaced with the following:**

   Mr. Douglas A. Riley, CFA, Vice President and Portfolio Manager, has managed the Fund since its inception in 2019.

5. The “Quantitative Investing Risk” disclosure in the “More Information about Risk” section of the Prospectus is hereby deleted and replaced with the following:

Quantitative Investing Risk (Large Cap Growth Fund, Large Cap Value Fund, Small Cap Fund and International Equity Fund) – There is no guarantee that the use of quantitative models, algorithms, methods or other similar techniques (“quantitative investing”), and the investments selected based on such techniques, will produce the desired results or enable a Fund to achieve its investment objective. A Fund may be adversely affected by imperfections, errors or limitations in construction and implementation (for example, limitations in a model, proprietary or third-party data imprecision or unavailability, software or other technology malfunctions, or programming inaccuracies) and the Adviser’s ability to monitor and timely adjust the metrics or update the data or features underlying the model, algorithm or other similar analytical tools (“quantitative tools”). A Fund may also be adversely affected by the Adviser’s ability to make accurate qualitative judgments regarding the quantitative tool’s output or operational complications relating to any quantitative tool. Thus, a Fund is subject to the risk that any quantitative tools used by the Adviser will not be successful as to, for example, selecting or weighting investment positions, and that these tools may not perform as expected.

7. The “Quantitative Investing Risk” disclosure in the “Description of Permitted Investments” section of the SAI is hereby deleted and replaced with the following:

Quantitative Investing Risk (Large Cap Growth Fund, Large Cap Value Fund, Small Cap Fund and International Equity Fund). For each of the Funds, the Adviser may use quantitative models, algorithms, methods or other similar techniques or analytical tools (“quantitative tools”) in managing the Funds, including to generate investment ideas, identify investment opportunities or as a component of its overall portfolio construction processes and investment selection or screening criteria. Quantitative tools may also be used in connection with risk management and hedging processes. The value of securities selected using quantitative tools can react differently to issuer, political, market, and economic developments than the market as a whole or securities selected using only fundamental or other similar means of analysis. The factors used in quantitative tools and the weight placed on those factors may not be predictive of a security’s value or a successful weighting. In addition, factors that affect a security’s value can change over time and these changes may not be reflected in the quantitative tools. Thus, a Fund is subject to the risk that any quantitative tools used by the Adviser will not be successful in, among other things, forecasting movements in industries, sectors or companies and/or in determining the size, direction, and/or weighting of investment positions.

There is no guarantee that quantitative tools, and the investments selected based on such tools, will produce the desired results or enable a Fund to achieve its investment objective. A Fund may be adversely affected by imperfections, errors or limitations in construction and implementation (for example, limitations in a model, proprietary or third-party data imprecision or unavailability, software or other technology malfunctions, or programming inaccuracies) and the Adviser’s ability to monitor and timely adjust the metrics or update the data or features underlying the quantitative tools, including accounting for changes in the overall market environment, and identify and address omissions of relevant data or assumptions. A quantitative tool may not perform as expected and a quantitative tool that has been formulated on the basis of past market data or trends may not be predictive of future price movements. A Fund may also be adversely affected by the Adviser’s ability to make accurate qualitative judgments regarding a quantitative tool’s output or operational complications relating to a quantitative tool.

2 Knights of Columbus Asset Advisors LLC (“Knights of Columbus Asset Advisors” or the “Adviser”) has contractually agreed to waive fees and/or to reimburse expenses to the extent necessary to keep Total Annual Fund Operating Expenses (excluding interest, taxes, brokerage commissions, acquired fund fees and expenses, non-routine expenses and any class-specific expenses (including Distribution and/or Service (12b-1) Fees and Shareholder Servicing Fees) (collectively, “excluded expenses”)) from exceeding 0.90% of the average daily net assets of each of the Fund’s share classes until February 29, 2020 (the “contractual expense limit”). In addition, the Adviser may receive from the Fund the difference between the Total Annual Fund Operating Expenses (not including excluded expenses) and the contractual expense limit to recoup all or a portion of its prior fee waivers or expense reimbursements made during the three-year period preceding the recoupment if at any point Total Annual Fund Operating Expenses (not including excluded expenses) are below the contractual expense limit (i) at the time of the fee waiver and/or expense reimbursement and (ii) at the time of the recoupment. This agreement may be terminated: (i) by the Board of Trustees (the “Board”) of The Advisors’ Inner Circle Fund III (the “Trust”), for any reason at any time; or (ii) by the Adviser, upon ninety (90) days’ prior written notice to the Trust, effective as of the close of business on February 29, 2020.
**Example**

This Example is intended to help you compare the cost of investing in the Fund with the cost of investing in other mutual funds.

The Example assumes that you invest $10,000 in the Fund for the time periods indicated and then redeem all of your shares at the end of those periods. The Example also assumes that your investment has a 5% return each year and that the Fund’s operating expenses (including one year of capped expenses in each period) remain the same. Although your actual costs may be higher or lower, based on these assumptions your costs would be:

**Portfolio Turnover**

The Fund pays transaction costs, such as commissions, when it buys and sells securities (or “turns over” its portfolio). A higher portfolio turnover rate may indicate higher transaction costs and may result in higher taxes when Fund shares are held in a taxable account. These costs, which are not reflected in total annual Fund operating expenses or in the example, affect the Fund’s performance. During its most recent fiscal year, the Fund’s portfolio turnover rate was 118% of the average value of its portfolio.

**Principal Investment Strategies**

Under normal circumstances, the Fund invests at least 80% of its net assets, plus any borrowings for investment purposes, in equity securities of large-capitalization companies. This investment policy can be changed by the Fund upon 60 days’ prior written notice to shareholders. For purposes of this policy, a large-capitalization company is a company with a market capitalization within the range of the Russell 1000 Growth Index at the time of initial purchase. While the market capitalization range of the Russell 1000 Growth Index changes throughout the year, as of December 31, 2018, the market capitalization range of the Russell 1000 Growth Index was between approximately $364 million and $780 billion. The equity securities in which the Fund invests are primarily common stocks of U.S. companies. From time to time, the Fund may focus its investments in a particular sector, including the information technology sector.
The Fund makes investment decisions consistent with the United States Conference of Catholic Bishops’ Socially Responsible Investing Guidelines (the “USCCB Guidelines”), and therefore, the Fund is designed to avoid investments in companies that are believed to be involved with abortion, contraception, pornography, stem cell research/human cloning, weapons of mass destruction, or other enterprises that conflict with the USCCB Guidelines. The policies and practices of the companies selected for the Fund are monitored for various issues contemplated by the USCCB Guidelines. If Boston Advisors, LLC (“Boston Advisors” or the “Sub-Adviser”) becomes aware that the Fund is invested in a company whose policies and practices are inconsistent with the USCCB Guidelines, the Sub-Adviser may sell the company’s securities or otherwise exclude future investments in such company.

In selecting investments for the Fund, the Sub-Adviser combines quantitative and qualitative analyses that together seek to identify companies that have above-average investment potential. The quantitative process begins with understanding the market regime or investment environment. Factor exposures used by the quantitative models are tilted to areas that are believed will perform best within a specific environment. Four “super-factors” (Valuation, Growth and Profitability, Quality and Investor Sentiment) are then applied to the broad universe. By combining these factors, the investable universe is ranked by decile (1 = attractive, 10 = unattractive). The “buyable” universe for the Fund includes the top three deciles, or the most statistically attractive companies.

Fundamental research is conducted on the buyable universe to assess criteria that are difficult to quantify. The portfolio management and fundamental analyst teams construct the portfolio with only highly ranked companies. Risk is measured and monitored throughout the research and portfolio management process in different ways, including active risk to the benchmark, individual stock contribution to that active risk, value at risk (“VAR”) and sector/industry group/individual stock exposure risks. The Sub-Adviser will generally sell a stock on behalf of the Fund if the stock experiences a rankings decline or extreme price movements, or for risk management purposes.

Due to its investment strategy, the Fund may buy and sell securities frequently.
As with all mutual funds, there is no guarantee that the Fund will achieve its investment objective. You could lose money by investing in the Fund. A Fund share is not a bank deposit and is not insured or guaranteed by the FDIC or any government agency. The principal risk factors affecting shareholders’ investments in the Fund are set forth below.

**Equity Risk** – Since it purchases equity securities, the Fund is subject to the risk that stock prices will fall over short or extended periods of time. Historically, the equity markets have moved in cycles, and the value of the Fund’s equity securities may fluctuate drastically from day to day. Individual companies may report poor results or be negatively affected by industry and/or economic trends and developments. The prices of securities issued by such companies may suffer a decline in response. These factors contribute to price volatility, which is the principal risk of investing in the Fund.

**Large-Capitalization Company Risk** – The large-capitalization companies in which the Fund invests may not respond as quickly as smaller companies to competitive challenges, and their growth rates may lag the growth rates of well-managed smaller companies during strong economic periods.

**Catholic Values Investing Risk** – The Fund considers the USCCB Guidelines in its investment process and may choose not to purchase, or may sell, otherwise profitable investments in companies which have been identified as being in conflict with the USCCB Guidelines. This means that the Fund may underperform other similar mutual funds that do not consider the USCCB Guidelines when making investment decisions. In addition, there is a risk that the companies identified by the Fund’s investment process may not operate as expected when addressing issues contemplated by the USCCB Guidelines.

**Investment Style Risk** – The Sub-Adviser’s growth investment style may increase the risks of investing in the Fund. Because the prices of growth stocks are based largely on the expectation of future earnings, growth stock prices can decline rapidly and significantly when it appears that those expectations will not be met. In addition, a growth investing style may go in and out of favor over time, causing the Fund to sometimes underperform other equity funds that use differing investing styles.

**Information Technology Sector Risk** – Information technology companies face intense competition and potentially rapid product
obsolescence. They are also heavily dependent on intellectual property rights and may be adversely affected by the loss or impairment of those rights.

**Quantitative Investing Risk** – There is no guarantee that a quantitative model or algorithm used by the Sub-Adviser, and the investments selected based on the model or algorithm, will produce the desired results. The Fund may be adversely affected by imperfections, errors or limitations in the construction and implementation of the model or algorithm and the Sub-Adviser’s ability to properly analyze or timely adjust the metrics or update the data underlying the model or features of the algorithm.

**Portfolio Turnover Risk** – Due to its investment strategy, the Fund may buy and sell securities frequently. This may result in higher transaction costs and additional capital gains tax liabilities, which may affect the Fund’s performance.

**Large Purchase and Redemption Risk** – Large purchases or redemptions of the Fund’s shares may force the Fund to purchase or sell securities at times when it would not otherwise do so, and may cause the Fund’s portfolio turnover rate and transaction costs to rise, which may negatively affect the Fund’s performance and have adverse tax consequences for Fund shareholders.

**Performance Information**

The bar chart and the performance table below illustrate the risks and volatility of an investment in the Fund by showing changes in the Fund’s I Shares’ performance from year to year and by showing how the Fund’s average annual total returns for 1 year and since inception compare with those of a broad measure of market performance. Of course, the Fund’s past performance (before and after taxes) does not necessarily indicate how the Fund will perform in the future. Updated performance information is available on the Fund’s website at www.kofcassetadvisors.org or by calling toll-free to 1-844-KC-FUNDS (1-844-523-8637).
Average Annual Total Returns for Periods Ended December 31, 2018

This table compares the Fund’s average annual total returns for the periods ended December 31, 2018 to those of an appropriate broad-based index.

After-tax returns are calculated using the historical highest individual federal marginal income tax rates and do not reflect the impact of state and local taxes. Actual after-tax returns will depend on an investor’s tax situation and may differ from those shown. After-tax returns shown are not relevant to investors who hold their Fund shares through tax-deferred arrangements, such as 401(k) plans or individual retirement accounts (“IRAs”). After-tax returns are shown for I Shares only. After-tax returns for Class S Shares and Investor Shares will vary.

Returns after taxes on distributions and sale of Fund shares may be higher than before-tax returns when a net capital loss occurs upon the redemption of Fund shares.
